THESIS

Presented to the Faculty of Arts of the University
of London, June 1933, in partial fulfilment of
the requirements for the Degree of Doctor
of Philosophy.

PREFACE.

THIS is an attempt to give a descriptive account of the grammar of the oldest Kanarese inscriptions from the linguistic material available in the Inscriptions of the sixth and the seventh centuries A. D. Every effort is made to explain the forms, wherever possible, in the light of those in Tamil, Malayalam, Telugu and Tulu; and also the developments of some of the old Kanarese forms into the modern Kanarese.

I take this opportunity to express my sincere gratitude to Professor R. L. Turner, Director, the School of Oriental Studies, London, who, as my supervisor, opened my eyes to the western methods of scientific research. He has been kind enough not only to go through the whole of this thesis, but also to help me constantly with his most valuable and enlightening criticisms and suggestions for improvement.

The fact that it is published as the first volume of the series—"Studies in Dravidian Philology" is due to the kindness and active sympathy of Dr. E. P. Metcalfe, D.Sc., F.-INST.-P., and *Rajakaryapravina* N. S. Subba Rao, Esq., M.A. (Cantab.), Bar-at-law., the former and the present Vice-Chancellors of the University of Mysore. I would be failing in my duty if I did not acknowledge these obligations and express my sincere gratefulness to them and the University of Mysore.

THE UNIVERSITY LIBRARY,
MYSORE,
27th November 1941.

A. N. NARASIMHIA.

THE ABSTRACT OF THE THESIS.

The title of the Thesis : A Grammar of the Oldest Kanarese Inscriptions, with a study of the Sanskrit and Prākṛt loan-words.

The thesis is an attempt to give a descriptive account of the grammar of the oldest Kanarese inscriptions from the linguistic material available in the inscriptions of the sixth* and seventh centuries A. D.

It consists of three parts :

Part I: The Grammar: Consisting of short chapters on the history of certain consonants and consonant groups, substantives, adjectives, pronouns, numerals, verbs, adverbs and conjunctions. An attempt is made to explain the forms, wherever possible, in the light of those in Tamil, Malayālam, Telugu and Tulu; and developments of some of the old Kanarese forms into the modern Kanarese are noted. The last Chapter is devoted to remarks on the word-order.

Part II: The Inscriptions: Text of the Inscriptions studied.

Part III: The Index: Index of all words in the Inscriptions studied, with etymological notes.

* Recently an inscription of the second quarter of the fifth century A. D. (circa 450 A. D.) has been discovered at Halimiḍi, a village about five miles to the north-west of Bēlūr, Hassan District, Mysore State, S. India. (*Vide* M. A. R. 1936. pp. 73-80). The conclusions reached in this Part of the thesis are not affected by the discovery of this new inscription.

 Tel. - } Telugu.
 Tu. - Tulu.

Other abbreviations will be easily recognised.

Matter In [] is deleted.

The system of the Royal Asiatic Society is followed for transliteration, except *r*, *l* and *t* where *r* is used for O.K. \approx T. \approx Te. \approx ; *l* for O.K. ω and T. and M. φ ; and *-t-* for alveolar *-t-*.

INTRODUCTION.

The present thesis is an attempt to deal, in some detail, with the grammar of the Old Kanarese inscriptions of the 6th and the 7th centuries A.D.

There are four grammatical treatises¹ on Old Kanarese, based on the ancient literary works. Occasional references to grammatical points are found in a work on rhetoric, "Kavirājamārga" by Nṛpatuṅga (877 A.D.). Western scholars have written grammars in English on Kanarese. John Mc Kerrell of the Madras Civil Service dedicated his grammar of Kanarese language to King George IV, in 1820. Caldwell wrote in 1856 "A Comparative Grammar of the Dravidian or the South Indian Family of Languages" and a second revised edition of it was published in 1875. In this comparative study, Caldwell refers to the general tendencies of the Kanarese language, old and new, as compared with Tamil, Malayāḷam, Telugu and Tulu. It is Dr. F. Kittel who wrote the most systematic and complete

1. (a) *Karṇāṭaka kāvyaśāloka* by Nāgavarmma—C. 1045 in 96 Kanda verses with illustrations in verse—given as the first chapter of his work on rhetoric.

(b) *Karṇāṭaka Bhāṣā Bhūṣaṇa* by Nāgavarmma, C. 1045 in 269 Sūtras in Sanskrit with a Sanskrit vṛtti or gloss and illustrations.

(c) *S'abdamanidarpaṇa* by Kēś'irāja, 1260 A. D. in 320 kanda verses in old Kanarese with his own gloss on each verse and is "the fullest exposition of the language of his period".

(d) *Karṇāṭaka S'abdānuśāsaṇa* by Bhaṭṭākaḷaṇka (1604) in 592 Sanskrit Sūtras with illustrations from ancient literary works.

grammar on the Kanarese language in English in 1903.

McKerrell deals with New Kanarese, but Caldwell deals with the old as well as the new. Kittel has given a thorough exposition in English of all the Kan. grammars and also of O.K., M.K. and N.K. with occasional references¹ to the grammatical forms in the old Kanarese inscriptions.

Such references to the old Kanarese inscriptions are very few compared with those to old kāvyas. In the introduction to his "Kannada-English Dictionary", Kittel says that he has not been able to include all the words occurring in the inscriptions, published so far.

The four grammars on O.K. referred to above, as we now have it, are the originals, as modified by "the endless blunders of drivelling and hireling transcribers, the paucity of (good) duplicates of MSS. for collation and the comparatively very small number of men to be found among the natives possessing appropriate philological information, soundness of judgment or zeal for literary research and general improvement."² Further, the texts of these grammars are altered by the pandits who hoped to add to the dignity of Kanarese by the free use of the terminology and principles of Skt. grammar. The Kanarese kāvyas have not suffered less in this manner.

But the Old Kan. inscriptions are, fortunately, not liable to alterations of this kind. Hence a study of the O.K. inscriptions will give reliable information about the grammar of O.K. from the earliest times up to the present.

1. K.G. pp. 42, 43, 48, 51, 67, 139, etc.

2. Reeve in the preface to his Dictionary P. II (1832).

The oldest specimen of O.K. is found in the inscription of 578 A.D. (No. 1 in Part II). But some scholars¹ think that specimens of Old Kan. are found in the Oxyrhyncus papyri No. 413 of the 2nd century A.D. The language of the passages under reference has not been accepted as Kanarese, in spite of Dr. R. Shamasastri's attempts. Dr. Shamasastri has not convinced us that the words are old Kanarese.

The inscriptions, given in the *Epigraphia Carnatica*; the *Epigraphia Indica*; "The Pāli, Sanskrit and Old Canarese Inscriptions (Fleet)"; the *Inscriptions of Mysore and Coorg* (B. L. Rice); The *Archæological Reports*, issued by the Government of India and other Provincial and States Governments; the "Historical Inscriptions of Southern India" (Madras University 1932), and the inscriptions, published in the following Journals, have been consulted :—

1. The Journal of the Royal Asiatic Society of Great Britain and Ireland;
2. The Indian Antiquary;
3. The Journal of the Bombay Branch of the R.A.S.;
4. The Journal of the Mythic Society;
5. The Mysore University Magazine (Kan.);
6. The Karnāṭaka Sābitya Pariṣat Patrike.

1. S. Levi. I. Ant. XXXIII, p. 12; Hulitzsch, J. R. A. S. 1904; p. 601. Grierson and Sten Konow. L. S. I. Vol. IV, p. 365; Dr. L. D. Barnett: Journal of Egyptian Archaeology, April 1926; Dr. R. Shamasastri: M. A. R. 1926, pp. 10-14; S. Srikantaiya: Mythic Society Journal, July 1928; M. Gōvinda Pai: Prabuddhakarnāṭaka, Vināyakana sañcike, 1929.

The following inscriptions claim to be more ancient than that of Bādami, on account of the S'aka dates given in them:—

- EC. III. (1) NJ. 110 - 103 A.D. (S'aka - 25);
 (2) NJ. 199 - 189 A.D. (S'aka - 111);
 (3) NJ. 122 - 266 A.D. (S'aka - 188);
 EC VII. (4) SK. 52 - 357 A.D. (S'aka - 279);
 EC I. (5) CG 1 - 466 A.D. (S'aka - 388);

But these are all spurious:—

(1) NJ. 110. (Kūḍlāpura). Rice suspects it to be later in origin.

See EC. III. Introd. p.1.

Fleet thinks it spurious:—DKD. p. 301.

Kielhorn thinks it to be one of about 1148 (K.L.I.S.I.P.)

(2) NJ. 199 (Gaṭṭavāḍi). Rice says the date is incorrect, probably 8th century. See E.C. III. Introd. P.2. probably S'711 and not S'111. Fleet thinks it spurious. (D.K.D. p. 301.) He says the Characters are of 9th or 10th century.

(3) NJ. 122 (Tagadūr). Rice thinks that the date is incorrect: EC. III. Introd. p.2. Fleet says it is spurious. cf. Tanjore grant of 248 A.D. (spurious.) belongs to 10th century. (EI. III. 174, 1 Ant. VII, 212.) Kielhorn says the date is irregular, and it is spurious. No. 109.

N.B. Dr. A. V. Subbiah says the date is irregular, (p.142. S.S.D.I.)

(4) SK. 52 (Tagarti agraḥāra). Rice says in E.C. VII. Introd. p. 12 that it is an extraordinary mixture of As'oka, haḷakannaḍa and nāgari characters, and later in origin, cf. Sh. 4. No. 110. Kielhorn says that the date is irregular (I. Ant. VII. 173), and it is spurious.

(5). Cg. 1. Rice thinks this to be genuine. (1) EC. I. Introd. p.4. (2) EC. IV. Introd. p.6 in reply to Fleet; (3) EC. VI. Introd. p. 30, 466 A.D. replying to Fleet. N.B. (1) Dr. R. Shamasastri in MAR. 1926 states Avinita may have been a boy king n 475 A.D. (2) Sewell and Dr. S. K. Iyengar state that the date is irregular and cannot be safely trusted (Historical Inscriptions of Southern India—Madras University publication 1932). Description of boundaries is the same as or similar to, that of N.J. 122 (3) above. Fleet thinks it spurious:¹ (1) EI. III. 162; (2) EI. VI. p.79 (it belongs to the 6th century. (3) D.K.D. pp. 297-300. Kielhorn in K.L.I.S.I. states that the date is irregular and it is spurious. cf. (1) I. Ant. XXIV. p. 11, No. 169, (2) I. Ant. XXX, p. 219, No. 40.

N.B. Dr. A. V. Subbiah, p. 143 of "Some Saka Dates in Inscriptions" says "The date is irregular, either the Nakṣatra or the fortnight is wrongly quoted."

The following undated inscriptions, though stated to be genuine by Rice, are spurious:—

- (1) Db. 67 and 68 — 459 A.D.
- (2) Cd. 43 — fifth century
- (3) Cm. 50 — C. 480.

(1) D. B. 67 : A.D. 459 and D.B. 68. A.D. 517 Bangalore); Rice thinks these genuine. cp E.C. IX. Introd. pp. 1 to 3. Kielhorn in K.L.I.S.I. Nos. 113 and 114 thinks that these are spurious, cf. Cg. 1. with Db. 67. (S'388).

1. { Mercara plates : I Ant. I. p. 360.
 { Nāgamangala plates, Vol II. p. 155.
 { Mallohalli grants, Vol V. 133.
 { I Ant. Vol VII. p. 101. No. 38.

(2) Cd. 43 (Chitaldroog) : Rice thinks it genuine E.C. XI. Intr. 5. "There is nothing to throw light on the question as to who he was". It is a stray verse. Characters are not clear on the plates - it is doubtful whether it can be earlier.

(3) Cm. 50 (S'iragunda): Rice says it is genuine and "is the oldest Ganga inscription, must be assigned to the end of the 5th or the beginning of the 6th century, Kd. 158 refers to this. [EC. VI. Intr. pp. 5 and 6.] N.B. This plate is not clear.

These are undated. Rice considers these as genuine. The characters are not very clear; in some, they are of later date.

There is one inscription dated 601 A.D. (S'522)¹. Fleet has pointed out that this is a spurious record, as the characters and the polished language show and that it belongs to the middle of the 10th century, though the matter may be ancient.

11 Plates

These inscriptions are selected almost entirely on the authority of the epigraphists, as these do not mention dates or years in which they were installed. Only a few give the names of historical persons. Of these, the plates of 11 inscriptions as given in the E.C. and I. Ant. have been carefully examined. Judged from the plates given in S.I.P. and I.P.¹,

1. South Indian Paleography by A. C. Burnell and Indian Paleography by G. Buhler (translation by J. F. Fleet).

these are of about the 7th century A.D. as B.L. Rice has dated them.

The same inscription edited by two people from different estampages shows the following differences:—

Fleet (1890). line	Rice (transliteration 1902)	Rice (Kan. version)
3. -tārar	-tāra	tāra
4. Jedugūr	Jelugūr	Jelugūr

18. āppār	āppōr	āppōr
19. velege pārvvarum	veleg ā pārvva- rūṁ	veleg ā pārvva- rūṁ
19. taṇige	taṇige	taṇige (ge)

Rice (1902) knew Fleet's version of it. But Rice is wrong in writing alivōn for alivōn and ālgeyan for ālgeyān. About the other 55 inscriptions, our dependence on Rice's version is inevitable.

Of the 66 inscriptions selected, all *except the following*, relate to Jain religious practices: Nos. 1, 2, 3, 4, 5, 6, 7, 8, 61, 62, 63, 64 and 65.

Of the Jain inscriptions, the following record the death by "Sanyāsana" of Jain monks and devotees:

Nos. 9 to 26, 29 to 37, 40 to 45, 49 to 54, 56 to 60 (inclusive) of which Nos. 11, 17, 19, 33 and 44 are those of Jain women.

Of the tombs (or epitaphs) Nos. 18, 27, 39, 46, 47 and 48 are those of men, while 42 and 55 are those of women.

In the non-Jain inscriptions, No. 61 relates the heroism of Kappe-Arabhaṭṭan; Nos. 5 and 6 relate the remission of taxes by a royal proclamation; and Nos. 1, 3, 4, 7, 8, 62-65 inclusive, record the gift of lands to temples and priests.

In the following inscriptions, there is reference to historical persons:—

1. Maṅgaḷisa (I.Ant. X. 60, P. - SOCI. No. 40)
2. Polikēsiasar¹ (I.Ant. VII. p.211).
3. Citravāhana.¹
5. 6, 7. Vinayāditya (P.S.O.C.I. Nos. 14 and 17; I.Ant. VI. p.86)
29. Bhadrabāhu and Candragupta.
62. Guṇasāgara (Father of Citravāhana).
- 63 and 64. S'āntarasa.
65. Vijayāditya (I.Ant. IX.; P.S.O.C.I. 76, 126, I30; I.A.X. 60)

1. E. I. VII. Appendix No. 29; I. Ant. XIX. p. 149. P.S.O.C.I. No 16.

6. Pogilli of Sendraka family (P.S.O.C.I. No. 152; I.Ant. Vol. XIX. p. 144).

In many of the inscriptions a large number of words are effaced or illegible. An attempt is made to use the words that can be made out in these.

PART I.

A. CONSONANTS AND CONSONANT GROUPS.

An attempt is made in this section to give the history of O.K. p, r, v and l with a descriptive account of O.K. consonant groups and long consonants.

History of O. K. p. (ಪ).

THE change of p, initial and intervocal, to h was noticed by Western scholars early. Caldwell¹ says that "the initial p of nearly all the words, whether they are pure Dravidian or Skt. derivatives—changes to h." But a careful study of this change of p to h was made by Kittel in his Grammar.² He points out that initial p was changed to h- in Kēs'irāja's time (1260) optionally. But he has not given evidence from the inscriptions to show when p changed to h.

An attempt is made in this section to show from the forms in the inscriptions when this change began and how it developed :—

The following words with initial P. are found in the inscriptions of the 6th and 7th centuries :—³

pālī (hālī), pārvvarumān (hāruvarannu), pālam (hālā), pāvu (hāvu), pin (hīmde), pirigum (hiri), pulla (hullannu), puḷu (huḷu), pūṇi (hūṇu, obsolete), peran (hēra, hora), perjeḍiya (hejjeḍe), pelcuge (heccu), periyā (hīriya), pēḷda (hēḷida), pokka (hokka), pogevoḡi (hogahōgi), pomgoḷ- (homgoḷ-), podeda (hodeda), poragu (horagu)

The forms taken from the inscriptions are given in the appendix to this section. The following inferences are based on them :—

Up till the end of the 9th century, p- is preserved.

1. C.D.G. pp. 156 and 157.

2. K.G. Sections 64, 184, 223, 224, 370.

3. N.K. equivalent in brackets.

In the 10th century, forms with h- in place of p- begin to appear in all parts of the Kanarese area. The h- forms are more in evidence in prose, particularly where the boundaries of lands granted are described. In verse, it is always p- that is predominant and very few h- forms are found. This is not uniform in all areas.

In the 11th century, there is very great confusion in the use of p- and h- in verse, sometimes p- and more often h-. But in prose, it is always h, though occasional use of p- is not rare. The 11th century, therefore, seems to be the period of transition.

In the 12th century, even in verse, the use of h- forms increases in number; the intervocalic -p- is also changed to -h- in such words as Tailaha (proper name) (1152), hōheyam (1162), uḷihim (1172), Biluhunāḍu (1175), aḷihidaḍe (1175), hōharu (1175), Tōraha (1179) (proper name).

In the 13th century, h- goes on replacing p- and -p- more and more. This is clear from the list of words given. The peculiarity of the century is -pp- > -h-. *e.g.* appa > apa > aha (1295), bappa > baha. ippa > iha, (1300), though in the previous century hōha (1182) shows the tendency was there.

It is in the 14th century that h- and -h- are fully established in place of p, initial or intervocalic. Even skt. lws. such as Nṛpam > Nṛham (1382). In verse, the archaic forms with p. are found. That the people were using h- instead of p- long before their use in literary composition becomes clear by the early appearance of h- in prose, specially in the description of boundaries of the lands given to temples, maṭhas and scholars, in all the areas.

In the 15th century, fewest forms with p. are found, clearly indicating the complete displacement of p by h initially and intervocalically.

This displacement was carried to extremes in the 16th century when *paṭṭana* is found as *haṭṭana* (1557). In the 17th century *p-* appears only in some verse portions and *h-* is the rule in prose and verse.

The 18th century does not differ very much from the 17th and from 1800 onwards there is not much change in the history of *p* and *h*.

That the displacement of *p-* by *h-* is not restricted to the initial position of *p-* or before particular vowels is made clear by such forms: *hiṁdu*, *hiṁgu*, *huḷu*, *hūḍu*, *heccu*, *hēḷu*, *hōgi*, *hōḍa*, *hōhanu*, *baha*, *taha*, *iha*.

Which is earlier, Pr. Drn.* *-p-* > *-v-* or Pr. Drn.* *-p-* > *-h-*? The change of *-p-* to *-v-* is found in the earliest inscriptions. There is no single *-p-* in Kanarese. Pr. Drav.* *-p-* > *-v-* in Kanarese, when it became intervocalic.

The following are found in the inscriptions of the 7th century. Here also the *p-* of the 2nd member of this word > intervocalic, and therefore *-v-*.

eḍevidiyal (40-3); *Eḍevolalnāḍu* (9-28), *pogevōgi* (3-7), *mūvetmūrā* (3-6), *maṁjuvōl* (37-1), *biṭṭavol* (61-9), *salvavol* (21-1).

Lws.kavileyumam (5-13; 673), *maḥātavan* (35-2) *maḥātavadi* (5-4).

This change is very common in the later inscriptions:

800-900:—800. *Kīrtivura*, EC. VII. SK. 283, (888) *kavile*, EC. I. 2. (890), *pervoḷala* (71) EC. IV. Yd. 60, *Paganṭevallaṁme* (25) EC. IV. Yd. 60. *Permaṇaḍivattamgaṭṭi* EC. I. 3.

900-1000:—900. *Turumḍavolāla* EC. IV. HG. 110, (900). *paravendiraṇṇan* EC. II. 448, (990). *marevokkara* (12) EC. III. My. 36.

1000-1100:—1057. devalōkakke vōdaḷ (27) EC. IV. HG. 18, (1070). Posavalli (5 and 6) EC. I. 50, (1085). Mokkavērggaḍe EC. VII. Sh. 10.

1100-1200:—1104. pēmpuvetta (34) EC. VII. SK. 131, 1113. Kāravurada EC. III. NJ. 44. 1199. marevokka (21) EC. IV. Ng. 49.

This is very common in all the inscriptions.

But the change of Utsava to Utsaba, rāvuta to rahuta and the survival of hōvaru (1544) for hōharu shows that, at the time of the displacement of -p- by -h-, -pp- which had become -p- was converted to -h- as in hōharu, and that the form with -v- < -p- like 'hōvaru' was an analogical formation (cf. īvaru, kāvaru, mīvaru) and they were replaced by hōguvaru later.

Even when p. was being replaced by h-, h disappeared, i.e., p > h. > o. (zero).

A. D. 1219. ōgu for hōgu } 1'15.
ōdar for hōdar } EI. V. p. 261.

1634. ada-u for adahu < adapu-pledge or pawn (EC. II. 250).

In N. K. colloquial speech of the uneducated classes, h- has practically disappeared. This disappearance is not before particular vowels - e.g.

a. hakkalu, hagga, haḍapa, haṭṭi, baradāri, harige, havaniṣu, haḷadi.

ā. hāku, hāḍu, hārayke, hāre, hāvu, hāsige, hāsu.

i and ī. hiṭṭu, hiḍisu, hittiāle, hīre, hīju.

u. huggi, huḍuga, huṇṇu, huḷu.

ū. hūje, hūḍu, hūṇu, hūvu,

e. heḍḍa, heṇike, heḍe, hemmike.

ē. hēḍi, hēsike, hēju.

o. hogu, homge, hottu, hondu, horisu, hosalu, holle.

ō. hōgu, hōlu, hōlisu, hōlu.

All these and a very large number of words with initial h- have lost the h- and the vowels alone survive in the colloquial pronunciation of the lower classes.

When these people want to speak grand, they make use of h- where they are not at all required, e.g., oḍe (- to break), > hoḍe, whereas hoḍe is restricted to mean 'to strike with something' (transitive).

-pp- of verbs and participles had already become -p- by 1004 A.D., as Naḍihidar shows. Naḍahidar is < Naḍapidar < Naḍappidar, Vbl causative past. 3. pl. m. of naḍappu. cf. muḍippidar in these inscriptions. But the causative suffix is found as -p- in kalupe in the 7th century. The shortening of -pp- to -p- in 1004 is only a continuation of the practice. In 1282 appa, fut. p. of *āy (M.K. āgu) is found, but in 910, hōhan is also found; this suggests that the -pp- of pōppan, becomes hōhan, indicating that -pp- after a long vowel is converted into -h- sooner than -pp- after short vowels. But from naḍahidar (A.D. 1004) ¹ it is to be suspected that even -pp- after short vowels had > -h- through -p- in the 11th century. But -appa- too may have changed to aha long before it is found in the inscriptions. It is not possible to say even approximately when the -pp- was shortened to -p-. as, in the inscriptions of the 7th century, apār (apar) from āppār, appār is found. The tendency developed and this single -p- > -h- in the inscriptions in 910; particularly after long

1. From pp. SMD. 232-233.

vowels. In 1300 baharu < bapparu < barppar¹ is found. (See 'Declinable Participles' future, about -pp- as the tense-suffix for the future)². In the following examples from inscriptions -pp- > -h- through * -p- :—

Further, O.K. antappa, intappa, entappa have > antaha, intaha, entaha, in M.K. in N.K. anthā, inthā, enthā, and sometimes antha, intha and entha. This change can be explained thus:—

antaha > anthaa by Metathesis, later anthā, and often antha. Similarly for intaha and entaha in the pronunciation of the urban people.

But in rural areas, anthā, inthā, enthā > antā (anta), intā (inta), entā (enta), as the people are not used to the pronunciation of aspirates.

In some of the kāvyas and inscriptions anta-
 ham < antappam > annam. » Siḍilannam Singa-

dannam 'a man like the thunderbolt, one like a lion. (SMD. 160.) Cf. annam - ಪರಗಿ SMD. p 293.

But this annam < antaham through anta-am, antam and by assimilation, annam. The meaning is antappam 'he who is like.' Similarly inthā, anthā, > inna, anna. In N.K., when anthā, inthā, enthā, are used as participial adjectives and when used as adj. substantives, the forms are :—

anthā-vanu, inthā-vanu, enthā-vanu, (avanu 'he' is suffixed to these).

It is wrong to say that all initial p. in Kanarese changed to h. Many words are still used both in literary composition and colloquial speech with an initial p-. A few of them are :—lws. pakka (a side), pagadi (tribute, tax); paccadi (a kind of pickle); paṭṭi (a squared rafter); paṭṭu (hold, seizure); paṭṭe (the rind or bark of trees); paḍuvalu (the west); paḍḍe (maturity); paḷaka (practice, habit); pāḍu (experiencing difficulty); pāpa (a small child); pālu (a share); peḍasu (hardness), pōṭṭare (a hole in the trunk of a tree); pōkari (a profligate); pōṭi (joining); pōṇisu (to string together); pōlu (wasting).

In some cases, p. and h forms are both found in use, but the use of p. and h are differentiated by meaning and usage :—

A. From the same root :

1. pālu s. n. 'ruined place' used in proverbs which retain archaic forms; hālu vb. (to be spoiled, to ruin).

2. peṭṭu s. n. 'a blow'; vb. 'to beat as with a hammer'; heṭṭu vb. 'to thrust' (with the penis) to avoid the use of the expression which had acquired a vulgar meaning, peṭṭu was confined to the meaning of 'a blow' and 'to beat.'

B. *From different roots:—*

1. hāl 'milk' and pāl 'a share.'
2. hāḍu 'to sing' and 'a song'; pāḍu 'difficulty experienced.'
3. huruḍu 'rivalry'; puruḍu 'the pollution observed after the birth of a child.'
4. hōlu 'to resemble'; pōlu 'to waste,' to squander.'

In all these cases, because the h- form had acquired some conventional meaning, the p- forms were retained to signify the other meaning and to avoid confusion in the use of the two forms.

The group, p + consonant, initially or otherwise, does not change to h at all, *e.g.*, prākāra, prās'astya, prīti, etc., as such combinations are foreign to Kanarese.

These inferences are borne out by forms in the published literary works and grammars of old Kanarese:

*Grammars:—*There are four grammars of the ancient Kanarese language. But in a book on rhetoric, A.D. 877 *Kavirājamārga*, the portion relating to grammar is comparatively small. In the part on rhetoric we find no h- initial or otherwise, in the pure Kanarese word.

I. 1045 *Karnāṭakakavyāvalōkana*. As it is poetry, there is no h- at all.

II. 1045 *Karṇāṭakabhāṣabhāṣana* by Nagavarmma includes h in the alphabet (K.B.B. 6). In Sutra 115 he says "pē hōvā" - that p > h often initially and intervocalically, as the examples he gives prove: palage > halage; kāpu > kāhu. This author of the 11th century actually corroborates our inference that h had begun to appear in literary

Kanarese (*vide* remarks on h- in the 11th century, *Supra*).

III. 1260 *Śabdamanidarpaṇa* by Kes'iraja. He includes h in his account of the alphabet (S.M.D. s. 33). In S. 159, he states that single p of pure Kanarese words often changes to h and that such a change is beautiful (*sundaram*), but he definitely points out that long p. (-pp-) does not become -h- and says that it is *duṣkara* or forbidden. Examples given are *upparam*, *kappuram*, *tappu*, *bippanḍam*, *muppu soppu*, *heppu*. But in S. 160 -pp- of *antappa*, *intappa*, *entappa* are changed into a single -h-, *i.e.* *antaha*, *intaha* and *entaha*, clearly implying that the shortening of the long consonants was the general rule and that such shortened p > h, and unshortened p remained unchanged.

Further, in sutras 254, 258 he points out how Skt. lws. with p-change to h- in Kanarese *pisuṇam* > *hisuṇam*, *pāṣa* > *hāsa*.

The disappearance of h- initially is not unknown to him. In S. 271, he gives *hiṅgu* > *iṅgu*, *haṁsapiṇḍa* > *ancevimḍu*; *haṁsa* > *aṁce*, *hiṅgulikaṁ* > *iṅgulikaṁ*.

All these confirm our inferences about the change of p to h and h to zero in the 13th century.

Use of unnecessary h- was known to Kesirāja (SMD 269): *agni* > *haggi*. It is -pp- > -p- and -h-; but all cases of -p- > -h- are analogical.

IV. 1604 *Karṇāṭakaśabdānuśāsana* by Bhaṭṭa-kaṣaṁka.

In Sutra 6, he includes h in the Kanarese alphabet; in Sutra 145 p > h often, *e.g.*, *paṭṭike* > *haṭṭige*; *pīvara* > *hīvara*, *gōpura* > *gōhura*. (In the commentary on the same Sutra, -p- > -v- often, *e.g.*, *dīpika* > *dīvige*; *kapi* > *kavi*) In Sutra 296, *Tihu-*

rāntakan, Gohuram are referred to as being correct, showing that there was doubt whether these forms were correct and so accepted by some and rejected by others. In S. 497, appam > aham; appudu > ahudu. In S. 576, he states that hu (< pu) is to be affixed to bā (-to come) to form verbal nouns.

This grammar which is practically an amplification of SMD substantiates our inference that by the 17th century, p appears only in some verse portions and h is the rule in prose and verse.

These grammars are based on the works of "prāktanācāryas" (Sutra 3 S.M.D.) 'old venerable scholars of the past and Lakṣhaṇacaryas'. A study of the *Karṇāṭakakavīcarite* (vols. I—III) by *Rao Bahadur* R. Narasimhachar and 'Kanarese Literature' by E. P. Rice substantiates our inferences on this point.

This change is probably due to the influence of Marāṭhi, the neighbour of Kan. and Tulu according to K. V. Subbaiya¹. In Marāṭhi, the aspirated const. > h. bhavati > hōtī. This change of p to h presupposes that the p- in O.K. though written as p, was aspirated as f, which led to the change of p to h. This change may have been independent of Marāṭhi⁽²⁾.

N.K. has h for O.K.p. not in contact with a const. This development was apparently connected with the Kanarese change of v to b^(ω)-. In early Kanarese, v > b, the difference between b & p became distinctive in certain word forms. In order to make the difference clearer, many persons strengthened p. to ph. which later developed through f to h. (E. H. Tuttle in A. J. P. 1929 p. 154.)

1. I. Ant. 1909, p. 145.

2. A. J. P. 1929, p. 155.

p is a bilabial stop. Where the contact between the lips is slack and the same p. is articulated by the lower lip against the upper teeth, $p > f$, a bilabial fricative. When even this contact of the lower lip is slackened and f is articulated in the glottis, we get the glottal fricative h. (*h*.)

APPENDIX.

In the 8th century, p is preserved without any change:—

“r (२).”

¹The existence of *r* in Kanarese was noticed by Caldwell and later by Fleet and Kittel. ²But Kittel pointed out that *r* was displaced in Kan. by *r*. The gradual replacement of this *r* by *r*, is pointed out here from the evidence of inscriptions.

The following words contain *r*:--

6th and 7th centuries A. D. (N. K. equivalents are given in brackets)

aridu (33-, 45-1, 53-1) (aridu), aridam 58-341 (aridanu), idarul (54-4) (idarolage), eriveppaduvorum (62-11), ere (29-4), (ere), eḍepare (40-1), ēri (36-4 13-4), kamara (8-3) (kammāra), kare (33-2) (kare), karu-um (7-10), Kittere (18-2), kere (65-13) (kere), koredu (40-2) (koredu), ghanammāriṭṭamān (34-1) Tarekada (31-2) (Talekaḍina), teravol (37-1) (tereyante), toradu (33-4, 46-3, 49-2) (toredu), toradē (34-2), (toradē), tōri (37-1) (tōri), nūreṇṭu (21-2) (nūreṇṭu), neradu (59-4) (neredu), neredōn (21-4) (neredanu), peran (61-3, 3-11) (horaginavanu), perjeḍiya (31-2), poragu (horagu), mūru (7-12, 19-2, 63-24) (mūru), Sinderā (5-11, 6-11), (Sinderā.)

There was difference in meaning in the words with -*r*- and those with -*r*-in O.K. :--

- | | |
|---------------------------------|----------------------------------|
| (1) aridu (33-3) 'having known' | (1) aridu (20-2) 'impossible' |
| (2) kare (33-3) N: 'a stain' | (2) kare - N: (a bank' 'a shore' |
| VB: 'to milk' | VB: 'to call' 'to invite'. |
| 'to rain' | |

1. C. D. G. p. 145 and p. 162.

2. K. G. pp. 23, 24, 114, 116, 117, 177, 253.

There are a large number of words of this kind :—

- | | |
|--|---|
| 1. are - N. a stone, a rock
Vb : to be disfigured
or defaced | 1. are - N. the rear,
the back, a half.
Vb. to grind. |
| 2. iri - vb. to beat, to kill | 2. iri - vb. to give
forth, to rain. |
| 3. uri - a coarse network
made of rope or
rattan, in which pots
and other vessels are
suspended from the
beams of the
house. | 3. uri - to burn, to
glow. |
| 4. ūru - vb. to be, to exist,
to settle, to lean on | 4. ūru - a village,
a small town |
| 5. ere - N. a lord, a master
vb. to pour out liquid | 5. ere - a dark-red
colour; a worm
in general. |
| 6. ore - vb. to ooze, to trickle
down; N. a sheath. | 6. ore - vb. to
speak, to touch,
N. similarity. |
| 7. ōre - the red painting
upon the lower part
of a wall used as a
description | 7. ōre - declivity,
crookedness;
bending. |
| 8. kere - a tank | 8. kere - to scratch. |
| 9. tere - to be uncovered | 9. tere - a wave. |
| 10. pare - a drum | 10. pare - a scale or
a coat of the
onion. a fibre. |
| 11. bare - to grow dry. to
disappear | 11. bare - to write. |
| 12. mare - to disappear,
to forget
to screen. | 12. mare - a kind of
deer |

The context decides the meaning of the word in N. K. From a study of the words with *r* in the inscriptions of the 6th and 7th centuries and the corresponding N. K. equivalents, it is seen that the *r* has disappeared in N. K. (See appendix to this section for examples from later inscriptions).

History of O. K. *r*

A study of the form with *r* from the 8th century onwards shows that *r* is maintained throughout the 8th, the 9th, the 10th and the 11th centuries. In the 12th century, we find *r* used for *r* in an inscription dated 1179. About the end of the 13th century, we find *r* replacing *r* in a few instances, e.g., *neradu* (1296), and *neradirda* (1296). The same tendency to replace *r* by *r* is found in certain areas in the 14th century, particularly in Shikaripur Taluk. This becomes more noticeable in the 15th century in the same taluk as well as in Seringapatam and Maddur taluks, (see 1415, 1420, 1431, 1458, 1474, 1477 *infra*). Towards the end of the 16th century, the same tendency is found in the region round about Seringapatam. The replacement of *r* by *r* is more noticeable in the 17th century. In this century, both kinds of *r* are found in the same inscription where O. K. had *r*. Towards the close of the century, *r* is found less and less. In the 18th century, in spite of the occasional discovery of *r* forms, *r* had replaced *r* and from 1800 onwards *r* does not appear in these inscriptions.

From this, it cannot be concluded that *r* actually lived in the colloquial speech of the people till the end of the 18th century. The occasional appearance of *r* in place of *r* in 1296, is sufficient proof that the people had already adopted *r* in place of *r*, whatever the pronunciation of the latter may have been, and

that the writing of only *r* was in vogue in poetry and literary compositions till the 16th century. The appearance of *r* and *r* in prose occasionally for O. K. *r* shows that *r* was not so common as *r*.

Anyway, *r* finally disappears towards the close of the 18th century.

The earliest published Kanarese work is Kavirāja-mārga by Nṛpatunga (about 877 A. D.) Though a work on Rhetoric, it deals with grammar occasionally. The use of *r* there is in no way different from that in the inscriptions of the 9th century: adara (I. 13), perara (I. 14), bēre (I. 46), omdaroḷ (I. 81), eraḷtērakke (I. 114), mūraroḷa (I. 120), mīradā (II. 142), arivina (III. 81), kīridu (III. 175).

As already stated under *p*-, there are four O. K. grammars:

I. 1045. *Kavyāvalōkana by Nāgavarmma*:

The author includes *r* in the alphabet (Sutra 6) and states that *r* becomes *r* before a consonant. The examples he quotes from ancient Kanarese works corroborate our inference about *r* in the inscriptions of the 11th century.

II. 1045. *Karṇāṭaka Bhāṣa Bhaṣṇa by Nāgavarmma*:

He included *r* in the Kan. alphabet (Sutra 10). -ar is shown by him to be the suffix for neuter stems ending in -u. adu + ar + a > adara (gen. sg. of adu) (Sutra 55). In Sutras 185 and 187, he states that -kāra and gāra are used as suffixes in taddhitas or secondary derivatives, to mean 'the maker of.' Once again he refers to *r* and states that roots ending in -ru have their past tense in -tta- (Sutra 229).

If we take his examples into consideration, the position of *r* is the same as the one in the inscriptions of the 12th century; examples are mare, more (S. 10), adarol (S. 10. Com.) teru, poru and peru (S. 229).

III. 1260. *Karṇāṭaka Śabdamanidarpaṇa* by *Kēśirāja*.

The author includes *r* in the Kan. alphabet (S. 18). The position of *r* in this work is in no way different from that in the inscriptions of the 13th century. His examples under the following sutras bear out the statement made above : 173, 181, 184, 188, 209, 210, 238, 240,

IV. 1604. *Karṇāṭakaśabdānuśāsana*, by *Bhaṭṭa-kālamka*.

He includes *r* in the Kan. alphabet (Sutra 1). The author of this grammar simply paraphrases in the following sutras, 352, 353, 354, 355, 369, 379, 483, 484, what Kēśirāja has said in his *S'abdamanidarpaṇa*. He is more a commentator on Kesiraja's grammar. Here we do not get any corroboration of the actual position of *r*, as he is discussing the forms in the ancient kāvyas and does not take into account the contemporary speech.

There is no grammar which deals with the language of the 17th century onwards till about the close of the 19th century.

The inferences are corroborated till the 14th century by grammarians. But the last grammarian has not considered the language of his times. But the MSS. of literary works are liable to change at the hands of scribes, commentators and editors of later years. The examples from *Karṇāṭakakavicarite*

Vols. II and III have been taken to show that the evidence of inscriptions are more reliable: The figures within brackets refer to the pages of the volume.

From KKC. Vol II.

1413 nūrukhaṇḍuga (46),
1424 kareva (48),
1430 nereyadu (67), mereva (67),
1485 baride, tōre (136),
1500 mereduvu (143); ērisiye (149), bari- kaige (149),
1526 alkarina (209),
1535 mūranaridu (283),
1550 mōhigalarike (236),
1590 adarol (313),
1599 poravārage (316),
1600 merede (317), murivalli (324)
1606 Marigaḷa (352), turubi (352), tori (353),
1611 karedenō, jīvisalārade (355),
1620 nireavarē (362),
1640 koradu (370),
1646 arasuva (372)
1648 nere bēre (375), meredan (383) cirittu (383), jārittu (383), bīrittū (383), guriyāytu (390), oḍaruta (403), nere (403), bedaruta (403),
1672 kaiseregōṇḍu (456), ariyade (458), idara (459), teradim (460).
1675 mūraneya (465) ariyada (492),
1677 yēruva (497).

The *r* is less noticeable in prose works than in very high-class poetry, where archaic forms were specially selected and used. All the examples given below are from *kāvyas* :—

1680. mīrida, muridu (508), 1700. *r* very infrequent. bāydereya, buddhidorasittu (525), beragāgi (526), nūraivattondu (526).

We rarely see *r* in Sarvajñavacana, e.g., about 1700 A.D; very infrequently e.g. arivu, maravu, bērilla (p. 560), etc., are found.

1712 teradali KKC. Vol. III. (2),
1715 eragida (5),
1731 tereda (14),
1732 tōrittū (18), hāriduvu, tārīduvu, jāriduvu, ūri, nīreyara (19), tīrrane, bīrrane, sarrane, (19), pārumbaleya (21),
1740 ēri, maremāḍi (50),
1745 orate, kareva, ariye (55),
1750 kārisidaḷ, garigāḷiyali (79), nēriḷa, porumaṭṭu (85), kere, tore, ara (88)
1770 ērutuṁ (131),
1775 mareyaro, toreyaro (138),
1780 mareyalu, ēri, eragadiha (143),
1800 aruhimda, arivumarave (161).

r is found in poetry very rarely after 1740, but none in prose.

After 1800, *r* is rarer still. 1830 ivaroḷagilla KKC. III. (p. 187), 1840. bedare (191), ariyadiral, muridu: No *r* either in prose or poetry after 1850 in KKC. But the inscriptions are not capable of being changed by these editors or scribes. Hence the evidence of the inscriptions of the later centuries are to be relied on as authoritative till it is disproved by stronger and more authentic sources of information.

This *r* is found in Tamil, Malayālam, Telugu and Kanarese. In the words with -*r*-, found in the inscriptions of the 6th and 7th centuries, *r* is found

intervocalically and not initially. In his Dictionary, Kittel gives a few words (about 25) with initial *r* which are really corruptions or mistaken spellings of words with *r*-. In the following inscriptions *r* is found initially :—

- 1124 *roḍisi* EC. V. Cn. 149 ;
 1224 *Raṭṭapaḷli*. EC. XI. DN
 1300 *Rattā, Raṭṭigā*.

In *kāvyas* also. *r* is found initially, e.g. KKC. I. p. 402.

- 1300 ... *Raṭṭavedaṅgam* KKC. I, p. 401.

This *r* is not found initially either in Tamil or Malayalam. But Sītārāmācārlu in his “*Śabdaratnākaramu*” (1929) gives on pp. 673-675 a number of Telugu words with initial *r*. C. P. Brown does not mention any Telugu words with initial *r* in his Telugu-English Dictionary in the first or second edition. In modern Telugu, as in N. K., initial or intervocalic *r* is not used. Tulu has not got this *r* at all now. In N. T., the distinction between *r* and *r* is disappearing in all parts of the Madras Presidency except in the extreme South : —

kirudu and *kirudu* (vanity); *kōrudal* and *kōrudal* (praying); *tarai* and *tarai* (ground); *taruvāy* and *taruvāy* (proper time).

In the following T. -*r*- > T. -*ṭ*- and T. *rr* > T. -*ṭṭ*-. *kari* and *kaṭi* (to bite); *tari* and *taṭi* (a Stick); *korram* and *koṭṭam* (triumph); *korrudal* and *koṭṭudal* (digging).

But *-rr-* is found in a large number of Telugu words, but these are pronounced, not as *-tṭr-* or *-tṭr-*, but as *-rr-*. A few of them are mentioned here :

Tel. *arra* (a division of a chamber); K. *are*; *irra* (the male of the antelope); *karru* (a ploughshare); *kirrūpurugu* (a cicada, a noisy insect); *kurra* (small, young); *kurri* (a milking cow); *garre* (an instrument for catching fish); *gorre* (a sheep); *cirra* (a peg); *cirru* (anger); K. *siṭṭu* (anger); *turru* (in haste); Skt. *tvarita*; *torra* (a hole in the trunk of a tree); *narra* (a troublesome milch cow); *parra* (a bog); *purru* (soft mire); *purre* (the skull); K. *buruḍe* (the skull); *barre* (a female buffalo); *burri* (a heifer); *borra* (a pot-belly); K. *bojju*; *mirru* (a rising ground); T. *mēḍu*; K. *mēḍu*; M. *mēḍu*; *morra* (a scream); K. *more*; *varru* (a heap); *sorra* (a shark).

The few corresponding words indicate that at one time Te *-rr-* was pronounced as *-tṭ-* or *-tt-*.

The Telugu scholars or peasants do not pronounce these words as Tamil *-rr-*, but only as *-rr-* (a long r). Further in N. Te. the long *-rr-* is shortened and *-r-* is used in place of *r*. In Kan, *-rr-* is found in some inscriptions, but the pronunciation is *-rr-*. In N. K. it is written and pronounced as *-rr-*. Surrembinam, (E.C. V. Bl. 77). Kittel's equating *tirrane* to *tittane* in his dictionary is wrong as can be seen from his own edition of S M D. p. 393 (SMD. S. 307). These are onomatopoeic words.

In Tamil, *r* is used in place of *-n-*, *-t-*, *-l-* before *-k*, *-c*, and *-p*.

I. -N-. (1) where *-nr-* > *-rr-*

NWs. *anru* - *arru* (then); *inru* - *irru* (now);
enru - *erru* (when); *onru* - *orru* (one).

(2) *where -n- > -r-*

tankaval - tarkaval (self-protection);
 tankolai - tarkolai (suicide); tancuṭṭu -
 tarcuṭṭu (self-reference); tancelvam -
 tarcelvam (one's own property); tanpāḍi
 tarpāḍi (a lark)

II. *-t- > -r-*

Lws. utkaṭam - urkaṭam (an elephant in rut);
 utkrṣṭam - urkrṣṭam (excellence); udgāra
 - urkāram (vomiting); utsarga - urcar-
 kam (abandonment); utpatti - urpatti
 (birth); kutsita - kurcitam (abhorrence);
 tatkālam - tarkālam (the fixed time);
 tadbhavam - tarpavam (born of that);
 balātkāram - palārkāram (force - com-
 pulsion); bhāskaran - pārskaran (the
 sun); vatsanābhi - varcanapi (a kind of
 poison).

III. *-l- > -r-*

alpam - arpam (trifling); ulka - urkai (a
 meteor); kalka - karkam (drugs pounded
 for the preparation of decoctions, oils,
 etc.); kalki - karki (a horse); svalpam -
 sorpam (a little); nalgati - narkati
 (bliss); nalkanavu - narkanavu (a good
 dream); nalpeṇḍu - narpeṇḍu (a good
 woman); nalcīr - narcīr (a good state).

This change of -l- to -r- is also found in the O.K.
 of the inscriptions studied. Nirisidom "Set-up" or
 "caused to stand" is from nil - to stand. T.M. Nil - to
 stand. Te Nilu - to stand. This root 'nil', when
 converted into a causative -l- > -r- in O.K. as it

does in O.T. *niruttu* - to cause to stand. Cf P. 41 *nirugaḷ*; P. 42. *nirisida*. What is the nature of this *niḷisidom*.

In Kanarese, roots *teru*, *peru* and *poru* form their past tense with *-tt-*, i.e. *tettam*, *pettam*, *pottam* (SMD. 240). But this long *-t* in the past clearly shows the following :—

ter, *per*, *por*, are the roots. When *-da-* the past tense suffix, is added *ter-da* = *tetta*; *per-da* = *petta*; *por-da* = *potta*. Unless *-da-* is derived from *<* -nta-* (K. *-r-*) or *-ta-* (K. *-r-*), this change is impossible. *Ter - *nta* = *ter n ta*; the pre-consonantal nasal disappears; *terra* = *tetta*. Similarly for *petta* and *potta*. This shows that in O.K. also *rr > -tt-*.

In O.K. *Kiridu > Kuru* before consonants, e.g., *kurudaḍi*. But before vowels *kiru > kit*, e.g. *kiru-aḍi > kittadi*; *kiru-esal > kittesal*. (SMD. 181). This shows that in O.K. *-rr-* used to become *-tt-*.

In Kanarese, *peragu* is replaced by *peḍa* in compounds (SMD. 173, KSS. 369) e.g. *peḍaṅgay*, *peḍagay*, *peḍadale*. Kanarese grammarians state that *r* gives rise to *ṛ* when pronounced with greater pressure and force. (KVV. 6; KBB. 10; SMD. 18 and 19, KSS. 1). According to these, *ṛ* is a cerebral. Cf P. 43. 1021, *nāḍaoreya*.

I suspect *pera < peḍa < *petā*. This gives us *peḍagay*. In Tel. also we find *peḍa* in the same sense. e.g. *peḍabuddhi* (Uttararāmāyana. 7. ch). This *peḍa* gives us a hint as to the probable reason of the grammarians to call *ṛ* a cerebral. When single *-r-* = *-ṛ-*, (*-t-*) Kan., & Tel. voiced the intervocal single surds and used the sonant symbols for the voiced stops. But when *-rr-* became *-ṛṛ-* or *-tt-*, the sound

value was retained. Why it is -ṭṭ- or -tt- sometimes is at present unknown.

Further, surds coming after -r- of roots in Kanarese do not become sonants, but those sounds that come after r > sonants. (sutra KBB. 29, SMD. 65, 66; KSS. 89 and 90). This clearly shows that it is a stop and a surd. Further, this r when followed by a surd becomes r and, later, is assimilated to the surd. In idarke, -ar- is the suffix; in place of -ad- -ar- is used here, perhaps for dissimilation; idu - ar - ke > idarke. This idarke > idakke in N. K. cp. T. idarku.

Also, in the inscriptions r is used for representing the upadhmāṇīya breathing before -p:-

1. nirpiṇḍaṁ (Ec. II. 63. 1163 AD)
2. payaḥpura is written payarpura (EI. XIII. p. 36)
3. bhavinaḥ parthivēndrān is bhavinarpār -(52)
E. I. XV. p. 26 1110 A.D.)
4. vigatabhayayas'arpataṭaka (67) EC. IV. Yd. 60, 890, A.D.

This mistake is due to the similarity in the shape of the symbol for upadhmāṇīya breathing and -r-. O.K. r is used wrongly for Skt. r. e.g. arula (5-15), kamara (8-31); rūḍhi, arūḍha - kāra and gāra in the inscriptions and grammars; probably the pronunciation was like that. r is used in later inscriptions in place of -ṣ:-

purpa (6) E. I. XII. p. 271, 1189. E. I. XV. p. 33, 1189. purpāyudham (22) E.C. VII Sk. 185, 1158, A.D.

In Tamil, -ṣ- is represented by -ṭ-.

Skt. puṣpa = T. puṭpam - a flower. Skt. viśeṣakam - T. viśeṭakam = anything special.

This suggests that Kan. *r* may correspond to T. -ṭ- though this use of *r* may be due to a confusion with the upadhmāṇiya.

All these show that *r* in Kanarese is a cerebral according to the grammarians. Since it is now lost in N.K., it is not possible to find out what its phonetic value may have been. That it represents a stop, perhaps an alveolar, which can become a dental or a cerebral and not the continuant *r*, is definite.

O. K. *r*

Kan.	T.	M.	Tel.	Tu
I. pr. Drn. * -t- after short vowels.

II. pr. Drn. * -t-
after long vowels.

	<i>Kan.</i>	<i>T.</i>	<i>M.</i>	<i>Tel.</i>	<i>Tu.</i>
	-r-	-r-	-r-	-r-	
1. Nīru :		nīru	nīru	nīru	
vb. "to reduce, to powder,"					
n. "powder, ashes"					
2. Nāru		nāru	nāru	nāru	nādu
"to stink"					
3. pāru		pāru	pāru	pāru	
"to jump"					
4. bēre		vēre	vēru	vēru	bēte
"separate"					
5. māru		māru	māru	māru	māru
"to barter, to exchange"					
6. mīru		mīru	mīru	mīru	mīru
"to surpass"					
7. mōre		mōrai	mōra	mōre	mōre
"the face"		"the chin"			
8. sāru		cāru	cāru	cāru	sāru
"broth"					
9. sūre		cūrai	cūrai	oūre	sūre
"plundering"				(sūre)	

II. But pr. Drn. *-nd- (after long vowels) >
Kan.-d- and *T.* and *M.* *nr.* e. g. *K.* *ida* - *T.*
inra.

III. But Pr. Dr. *, -nt- (after short vowels) has
K. -nd- and *T.* -nr- after a short vowel in
the following :—

<i>T.</i>	<i>K.</i>
onru (one)	ondu
anru (then)	andu

T.	K.
inru (now)	indu
enru (when)	endu
konru (having killed)	kondru
senru (having gone)	sandu
ninru (having stood)	nindu (nintu)
kunru (to diminish)	kundu
kanru (a calf)	kandu (karu) also
venru (scorched)	vendu

Sometimes in colloquial speech of villagers T. *nr* > -nn-. inru > innu; enru > ennu; onru > onnu. kanru > kannu; as in Mal. onru > onnu; panri > panni; venru > vennu.

K.	T.	M.	Te.	Tu.
pr. Drn. * -nt-				
(after long vowels)				
-r-	-nr-	-r-	-c-	-j-
		(and later assimilation)	-d-	-r-
			-n-	
ūru "to fix, to support"	ūnru	ūnnu	ūnu	ūru
tōru "to appear"	tōnru	tōnnu	toču	tōj
mūru "three"	mūnru	mūnnu	mūdu	mūj

In Tu, Kan *r* is found as -j- before short vowels also:

K. āru "to be dried"	Tu. āj
K. bari "empty"	Tu. baji
K. kārū "a calf"	Tu. kaṁji (Cp. T. Kanru)

Kan. *r* corresponds to Tu. -r:—

K.	Tu.
oragu "to lean, to lie down"	orag
kāru "to vomit"	kāru

K.	Tu.
kīru "to scratch"	kīru
kuri "a sheep"	kuri
kesaru "mud"	kesar
jāru "to slip"	jār
bēsar "disgust"	bēsar
mīru "to transgress"	mīr
sāru "to proclaim"	sār (Cp. T. carru)
sere "confinement"	sere

In two words Kan. -r- corresponds to Tu. -t- :—

K. adara "of that"	Tu. ayta
K. bēre "different"	Tu. bēte

Kan. -r- corresponds to Tu. -d-:

<i>after short vowels</i>		<i>after long vowels</i>	
K.	Tu.	K.	Tu.
ore "a sheath"	ude	nāru "to stink"	nādu
kiru "small"	kidu	nūru "100"	nūdu
kere "a tank"	kedu	māru "to change"	mādu
pore "burden"	pude		
mare "a screen"	made		
muri "to break"	mudi		

Some of the forms in T. with -nr- > -rr in Tamil. Both these have correspondences in Kan:

T.	Kan.
anru	"then" = andu
inru	"now" = indu.
enru	"when" = endu

But

T. anru	arru	K. atta
inru	irru	K. itta
enru	erru	K. etta

But the meaning in Kanarese is one of *place* whereas it is one of *time* in Tamil :

K. *atta* = there; *itta* = here; *etta* = where

This leads us to a consideration of the *-rr-*. Pr. Dr. **-tt-* is retained as *rr* in T. and M. In T. though written as *-rr-*, it is pronounced as *-t̥t̥r-* in some areas and *-t̥t̥-* in other areas. Many people pronounce it as *-tt-*. Thus in Tamil dictionaries, there are forms with *-rr-* and also with *-tt-* having the same meaning and used in the same sense :

IV Pr. Drn. **-tt-* after short vowels

>		T. & M.	K.	Te.
			<i>-rr-</i>	<i>-tt-</i> (<i>-t̥t̥-</i>) (<i>-tt-</i>)
T. & M.		K.		Te.
<i>Orri</i> (pledge, lease) (<i>ot̥ti</i>)		<i>otte</i>		<i>otta</i>
<i>orru</i> (to gain)	1.	<i>ottu</i> - compressed		<i>ottu</i>
(<i>ot̥tu</i>) (to unite)	2.	<i>ot̥tu</i> - together		<i>ot̥tu</i>
	3.	<i>on̥tu</i> - to agree with		<i>on̥tu</i>
<i>karrai</i> (a collection of hair)		<i>kat̥te</i> (a broom)		<i>kat̥ta</i>
(<i>kat̥tai</i>)				
<i>kurram</i> (a defect) (<i>kuttam</i>)		<i>kutta</i>		<i>kudi</i>
<i>kurru</i> (to pound)		and <i>kut̥tu</i> (to pierce) <i>kuṭ̥tu</i> (to stitch) <i>kuṭ̥tu</i> (to pound)		
<i>curru</i> (to go round) (<i>cuttu</i>)		<i>suttu</i>		<i>cuṭ̥tu</i>
<i>parru</i> (to seize, to hold)		<i>pattu</i> (to go over) <i>paṭ̥tu</i> (the hold in wrestling)		<i>paṭ̥tu</i>

T. & M.	K.	Te.
purru (ant-hill)	putta	puṭṭa
Puttu		
perra (that has been obtained)	petta	
marru (again, besides)	mattu	mari, maḍi
murru (a siege)	muttu	muṭṭu
(muttu)		
varral (dryness)	battu (to dry)	vatta
(vattal)		

V. pr. Drn. * -tt- after a long vowel >

K.	Tam.	Te.
-t- (-ṭ-)	-rr-	-ṭ- (-ṭ-)
1. ūta (firmness)	ūrram	ūtamu
2. ūṭe (a spring)	ūrru (ūttu)	ūṭa
3. ēta (a mechanism for lifting water)	ērram	ētamu
4. tēṭe (clearness)	tērram (certainty)	tēṭi
5. tōṭa (a garden)	tōrram	tōṭamu
6. nāta (stench)	nārram (nāttam)	nātam
7. mātu (a reply)	mārram	māṭa

In a few cases, the -rr- of T. corresponds to -r- of Kanarese and -ṭ- of Tel:—

cārru (to proclaim) K. sāru Te. cāṭu

But T. & M. kāppārru (to protect); K. kāpāḍu;
Te. kāpāḍu; where T. -rr- corresponds to K. -ḍ-

	K.	T.	Tel
VI. pr. Drn. * -dd- >	ḍḍ	rr	-ḍ-
after long vowels (dd)			
(kāppādd)	kāpāḍu		
	(to protect) kappārru		kāpāḍu

	K.	T. & M.
VII. pr. Drn. * <i>dā</i>	-r-	-rr
after long vowel		
	sāru (to proclaim), (Te cāṭu)cārru tūru (to winnow), tūrru

V (३).

The following words contain v-. (Their N. K. equivalents are given in brackets):—vaḷikke (baḷika); Vaḷliggāine (Baḷagāve); vandu (bandu); vāl-vu (bālu); viṭṭār (biṭṭaru); viṭṭu (biṭṭu); vittidalli (bittidakade); vetṭede- (beṭṭede-); Beḍevalli (Beḍahalli); veḷege (beḷeyali); veḷevāde (beḷeyade); Velgola (Beḷgola); Velmāḍadā (Beḷmāḍada); Vēgūrā (Bēgūra):

Some of these words have b- in these inscriptions:-
N.Ws. bandu, biṭṭa, biṭṭavol, biṭṭe;

L.Ws. besagey, bēgam

The corresponding words in T., M. and Te. have v- and in Tu. have b-.

K.	T.	M.	Te.	Tu.
vāl-v-u	vālvu	vālvu	...	bālu
viṭṭār	viṭṭār	viṭṭu	viḍicināru	biṭṭa
vittu	vittu	vittu	vittu	bittu
vetṭadu!
vele	vilai	vila	beḷe
vel	vilangu vel	vilāññu	vele	hiḷi

All words with initial v- in Kan. have corresponding words in v-, in the other Dravidian languages.

Even in the case of Lws., Kan. b- corresponds to T., M., Te. v- and Tu. b-.

K.	T.	M.	Te.	Tu.
bēgam	vēgam	vēgam	vēgaram	bēga

That this b- is a later development from v- will be clear from the following:—

9th Century.

810 basaḍi, EC. II. 415.

810 viṭṭa (10), EC. III. ML 68; ML. 5
Bāraṇāsiyūm.

- 870 Vāraṇāsiyu. EC. III. NJ. 68.
 884 bidiyāyatam (G) EC. II. 394.
 888 Sāsirvbarppārvbaruṁcam (12); Sāsirvbar. Bāraṇasiyumaṁ (12), Sarvbaṇandi (7). EC. I. 2.
 895 ... Saṁbatsaramgaḷ (2) EC. III. Md. 13.

10th Century:

- 900 bandisidar (for vandisidar) EC. II. 55; EC. II. 4.
 930 vaṇṇisutte (58), vayasi (28) (for bayasi. N. K.) EI. XIII. 326.
 950 bandisida. EC. II. 154.
 978 Beḷgola (9), Bīrasēna- (10), Sāsirvbaruṁ (13), aynūrbbaruṁ (15) orbban (16), Bāraṇāsiyuṁ (for Vāraṇāsi) 16, ārorbba (18) EC. I. 4.

11th Century:

- 1000 bīrara. EC. II. 45. bandisida, bandu. EC. II. 49.
 1038 vārāḷasiyalu. E. I. XVI, p. 277.
 1050 bandisida. EC. II. 52. bandisidaṁ. EC. II. 465 (for vandisidaṁ).
 1071 v > b after r, before y and r. garbba (3,16), agurbbiṁ (3), dībya (10), dēby (11), sārbbabhaumaṁ (15), pūrbba (16, 22, 40), ōrbbarā (19), Saṁsēbyan (29), bhābya (40), byōma (51), sarbbo- (56), byacāraṇada (63) byākhyāna (66, 67), E. I. XV. p. 337.
 1080 basadige. EC. II. 485.

- 1097 v > b in braja (13), dibyaṁ (23, 32)
byatīpātamuṁ (25), drabya (37).
EI. XVII, p. 182.

12th Century :

- 1100 bandisida (for vandisida) EC. II. 48.
1104 ā|valaṁ (4), tō|valaṁ, bā|valaṁ. EC.
VII. Sk. 131.
1113 v > b initially in Skt. words and
also in Saṁsebyaṁ (4) and nabya
(15). EI. XV. p. 105. nirvādhe.
E. I. VI, p. 36.
1172 byāpaka (34), byāpanaṁ (34), pati-
brate (36), brāta (36) byāpāra (40)
brāta (45), braja (48), byavahāri
(61), dibya (79 and 87), bratiṁdram
(80). E. I. XV. Maḍagihāl.

13th Century :

- 1200 b for v. in braja (9) sēbyaṁ (15)
v for b. dōrvvala (5). EI. V, p. 28.
1255. bīragallu. EC. I. 6.
1285. vīragallu. EC. I. 7.

The writing of Sāsirvbar (888) is noteworthy, as it suggests the mode of writing and the hesitation of the writer.

Both v- and b- are in use during these centuries, and in the earlier centuries the forms with v- are more in number. About 1192, the sign for v denotes both v and b in the inscriptions (EI. Vol. VI, p. 98).

In the later inscriptions b- is more common than v-. In KRM. (877 A. D.) we find b-:

baḷikkam (I. 93), bāḷvude (II. 36), bāradānam (II. 56)
baṁdoḍe (II. 41), beḷadu (III. 166), bērevērappudarim
(I. 46).

In the later Kanarese grammars, all the forms are in b-, but in word groups and compounds, b- is replaced by v-.

KBB.	SMD.	KSS.
31. eḷa-vidri	67. kaḍu-veḷpu	91. mū-vaṇṇam
kal-vāḷe	āḷ-vale	92. bē-r-vverasi
nīr-veḷasu	tōḷ-vale	mēḷ-vaṇṇam
127 teḷ-vasir	bē-r-verasi	327. kuḍu-villaṁ
	gēṇ-vayi	372.
131. karbu-villaṁ	115. beṭṭa-vēsage	
kuḍu-villaṁ	daṭṭa-valli	
135. kūr-vāḷ	184. ūr-vvēli	
136. per-vāḷ	186. pallili-vāy	
143. kaḍu-vāḷ	188. mū-veḷasu	

In all these examples, the second word begins with b- when independently used in M. K. and N. K., v- being preserved in such groups.

It is noted that b- of Kanarese is not from p- as g- and ḍ- are from k- and t- respectively.

-v-

Intervocalic -v- may be from (1) -v-; (2) -p-; and (3) -m-.

1. -v- before y and r and after r becomes b sometimes as shown from the evidence of the later inscriptions. But in pure Kanarese words it remained v in O. K. with very few exceptions and later -v- > -b- and r before -v- is assimilated to -b- in N. K.: anduvaḷikke (N. K. ābaḷika), orvvan and ōrvvan (N. K. obbanu), ēḷnūrvvar (replaced by ēḷnūrujana).

2. -v- < -p-.

The forms are:—Nws. eḍevidiyal, Eḍevolaḷ, pogevoḷgi, biṭṭavōḷ, maṁjuvōḷ, mūvetmūrā, salvavōḷ.
lws: kavileyum, mahātavadi, mahātavan.

(About *aramaṇṭaina* for *aramṇṭava*, see -v- from -m- infra.)

This change of -p- to -v- is found in the later inscriptions.—

 1148 nandādivige EC. III. NJ. 110.

Here -p- in the body of words and in word groups > -v-,

This change of -p- to -v- is common even in N. K.

In. T. -p- > -v-:

The examples are all lws:—

apattam and avattam 'a falsehood', āpaṇīyam and āvaṇīyam 'a market street', upamai and uvamai 'a simile', upāttiyāyan and uvāttiyāyan 'a priest, a teacher', kapi and kavi 'a monkey', kapantam and kavantam 'a headless body', kāppiyam and kāviyam 'an epic poem', tāpasi and tāvasi 'a brahmacāri entering upon the stage of a recluse', vāpi and vāvi 'a walled tank', vipattu and vivattu 'a calamity'. In Tel. -p- > -v- in word groups:—paṃpuvāḍu, pāyavāḍu, pāyavāru, bayalavōvu.

Later Kanarese grammarians have noted this change as a regular one in Nws. and Lws. alike and all of them have given examples.

SMD Sūtras, 67, 99, 178, 179, 181, 182, 186, 189, 258 and 292 and KSS. 60, 68, 241, 327, 328, 329, 330, 333, 334, 338, 339, 340-2, 351-354, give a large number of examples for this change of -p- to -v-.

But sometimes -v- < -p-¹ after nasals continue to be -v- in these inscriptions: *e.g.* uṇvōrūṃ, enva; in N. K. uṃbōrū and eṃba.

KRM. (877 A.D.) has the following bhōgiviṣaṃbol (I. 70), eṃbudakkum (I. 84), eṃbudu (I. 63), eṃbudidu (II. 7), eṃbudemṇḍum (III. 37).

In T. the intervocalic -p- is pronounced as -b-; after nasals, the -p- is pronounced as -b-. *e.g.* anpu, inpu, kampu, nōmpu.

But in Tel. -p- after nasals, is -p- in many cases. *e.g.* iṃpu, taṃpu, maṃpu. In some -mp- > -mb-, toṃbadi (tom+padi), toṃmīdi. In New Kanarese also -mp- and -mb- are both found. But this -m +

1. See-ppa under "Verbs".

pōl > -mbōl in O. K. and M. K. always. Suracāpam + pole > suracāpāmbōle (37-1).

But in later grammars, *v-* suffixes after nasals > -mb-.

SMD.

KSS.

99-100. palavar, but palāmbar.	170. palāmbar,
kelavar but kelāmbar	palavar, palabar.
214. Indrambōl	171. ambar.
232. embam, timbam	333. candrambol,
	aṇṇambol.
	517. enbam, tinbam.
	518. māṇbam,
	kāṇbam.

But in N. K. literary compositions this *en-to* say, has been replaced by *ennu-due* to the addition of -u to the root.

cf. *K-* after nasals is not voiced in some of these inscriptions: *kālam keydār*, *taṅkade*, *prthivirājyam-keye*, *prasādam keydar*, but some are voiced; *enaṅgoṭṭu*, *prithivirājyamegeye*, *op vinnapam keye*. (6) EC. III. TN. 1. (726 A.D.)

3. -v- from -m-.

The following words have -m-:

(1) *ara maṇṭama*, *alimen*, *gāmiga*, *gāmuṇḍa*, *dēhama*, *Namilūr*, *Nimilūr*, *mukhamāge*, *Valliggāmeyarum*.

(2) In the following -m- > -v-:— *Navilūr*, *mukhavāge*, *rājyava*, *valavadu*.

-m- > -v- in the preterminational element in *rājyava*; and also when one word ending in -m is followed by another with an initial vowel, in *mukhamāge*, *mukhavāge*, *valavadu*.

The change -m- to -v- in (2) and the retention of -m- in (1) suggest that -m- was probably used with

the phonetic value of -v-, though conservative writing still used -m- as the Skt. word is maṇḍapa. It is also possible that the presence of another nasal in some words may have been the cause of the retention of -m- in some of these.

The following examples are from the later inscriptions:—

- 890 gāvunḍana (5) EC. I. 3;
 941-945 ... final -m occasionally changes to -v
 before vowels. *e.g.*, pāḍvāv(u) nēṣa-
 ṇav (19) EI. XIV. 364.
 980 Cāvunḍayya EC. II. 39.
 983 Cāmunḍarājaṃ EC. II. 175.
 983 Cāvunḍarāja EC. II. 179.
 1057 ... Hēmaḷambi prasiddham (12) EC.
 IV. Hg. 18.
 1097 ... final -m occasionally > -v- before
 vowels. EI. XVII. p. 182.
 1098 ... puṇyamantar apparu. EC. VII. Sk.
 106.
 1129 Baḷligāve EC. VII. Sk. 100.
 1182 ... -m > occasionally -v. EI. XIV.
 (Kurugod).
 1189 ... paṇav-(28) EI. XV. 77.
 1115 ... Cāvarājaṃ (167) EC. II. 127;
 1177 ... Hēmaḷambi saṃvatsarada (3) EC.
 III. Md. 44;
 1120 ... Dēmaṇḍaṃganā (34), Dēmiyakka
 (27 and 64). EC. II. 129;
 1417 ... Hēmaḷambi EC. III. Md. 10.
 1474 ... vṛttimaṇḍarolage (194) EC. III. Ml.
 121.
 1538 ... Hēmaḷambi EC. III. Md. 112.

In KRM. (877 A. D.) -m- > -v- in some words and remains unchanged in others:—

kiruvakkaḷ (I. 39), vidūragatamāge (I. 83), viś' ēṣamillade (I. 84), prayōgamīteran (I. 90), lakṣyamīteranendum (III. 92).

Later grammars substantiate the view that -m- > -v-.

I. KVV. and II. KBB.¹ (1050) stated that the sounds of the labial class > v not only after vowels, but also after y, r and l: *e.g.*, mara + maṇe > maravaṇe; tāy + mane > tāyvvanē; pul + maṇe > pulvane; nīr + māṇisam > nīrvāṇisam.

III. SMD. (1260) supports our inference. -m- > -v- in all lws. from skt.² and also in pure Kanarese word³ *e.g.*, hemaṛ > bevaṛ, temaṛ > tevaṛ, emaḡe > evaḡe, taṃaḡe > taṃaḡe.

IV. KSS. lws. grāma > gāva, tāmara > tāvare (1604).

As already stated this grammar paraphrases and amplifies what No. III gives. According to KSS.⁴ -m- > -v-.

In N. K., words with initial ū or ō take a prothetic v- in rural pronunciation: *e.g.*, vūru for ūru; vōdu for ōdu; vuntāgu for untāgu.

The same tendency is found in these inscriptions: vandinisū (29-2) for ondinisū 'a little.'

-v- is replaced by -u- in unṇūrum in these inscriptions. The same tendency is found in later inscriptions: Gā-u-mḡa; Ga-u-ḡa; EC. III. My. 17; bahe-u EC. II. 344 (1368); sarvasvāmyaū salūdu (15) EC. IV. Ch. 135 (1612); appa-u (3) kuḡu-u-deṃdu (10), EC. IV. Yl. 1. (1654).

1. KBB. 31.

2. SMD. 292.

3. SMD. 67 and 104.

4. KSS. 144.

L. ∞

The following words have -l- :—

(The N.K. and M.K. equivalents are given in brackets).
 aḍa/dē (21-3) (M.K. aḍari, in N.K. replaced by hatti), iḷāḷ, (44-4) (N.K. iḷidu). ireḷpattu (5-15); 6-15); (M.K. irerpattu. N.K. replaced by nūranalvattu, 140); ūḷigaṁ (8-38) ḷ for l (N.K. ūḷiga); elturi (3-3) (M.K. ertu, N.K. ettu); Eḍevolaiṇāḍu (8-28); ēḷaneya (1-4) (M.K. and N.K. ēḷaneya); ēḷnūr (59-1); (M.K. and N.K. ēḷnūru); oḷtu (43-3) (M.K. oḷlittu, oḷlitu, N.K. oḷḷeyadu); Kaḷvappu (57-4) (M.K. Kāḷbappu) (N.K. Kabbappu); Kiḷgāna (62-6) N.K. Kigga-); Kiḷga (3-2) (N.K. Kiggēs' vara); kiḷtu (14-1) (M.K. kittu, N.K. kittu); gaḷde (63-20) (M.K. garde, N.K. gadde); gēḷi (27-4) (M.K. kēri, N.K. kēri); tīḷṭhadol (17-1); (Lw. N.K. tīrṭhadalli). -ḷ for -r. Paḷi (56-14); (N.K. baḷi); paḷcidor (62-8); N.K. (paccu. Vb.); puḷu (1-4) (N.K. huḷu); peḷuge (3-8); (M.K. percu, N.K. heccu); pēḷda (25-1; 34-2; 38-1); M.K. pēḷda, N.K. hēḷida); pōḷdu (14-1) (N.K. replaced by hoḷumāḍi); vāḷvu (40-2) (N.K. bāḷu);

This -l- does not appear initially in Kanarese. It appears intervocalically, finally and before consonants. This l has been replaced by -ḷ- between vowels and assimilated to the following consonant in consonant groups in N.K.

History of l in Kanarese.

l remained unchanged during the 8th and the 9th centuries. But in the 10th century—about 930 A.D.—l becomes r before consonants: e.g., negartte

from *negalte*; *bērpparan* from *bēlparan*; *nōrpoḍe* from *nōlpoḍe*. All the words with *l* before consonants did not change *l* to *r*. Both *l* and *r* forms are found in the same inscriptions (See A.D. 930, 940, 945, 949 and 978 in the appendix). About the year 930, words with *ḷ* in place of *l* appear side by side with forms with *l* and consonant, and *r* + consonant forms < *l* + consonant forms. This indicates that *l* > *r* and *l* > *ḷ* about the same time. See 930 A.D. It is often¹ stated that *l* > *r* before a consonant if the vowel preceding *l* was long by nature or position; and that *l* before a consonant preceded by a short vowel not lengthened by position remained *l* and the double consonant was considered a "fleeting double consonant" or "s'ithiladvitva" (SMD 36). But *l* before a consonant naturally makes the vowel long by position as *l* + consonant becomes a double consonant, e.g., *negartte* < *negalte*, *garde* < *galde* (SMD 37). *negarddam* from *negaldam* (SMD 36). This convention of a fleeting double consonant (*l* + consonant in this case) shows that, already, a vowel was being pronounced, though not fully, in between *l* and the consonant, though the vowel was not written² or they were being assimilated. This points to two kinds of pronunciation—one with a vowel and the other without a vowel—of these consonantal groups (*l* + const.) (SMD. 60.) Also the assimilated consonant group or long consonant was shortened in pronunciation. This theory of s'ithiladvitva is illustrated in SMD. *sutras* 36,—45, 59 and 60. The appearance of *ḷ* in place of *l* is predominant when *l* is between vowels, such as in *ālīpi*.

1. E. I. XIII. p. 327.

2. Cf. *Kilagāna* (1036).

The use of *l* for *r* in such words as *tiḷaka*. *tīḷthadoḷ*, is also found, though not often (See 950).

In the 11th century, the same changes (*i.e.* *l* to *r* and *ḷ*) are on the increase. The use of *l* in place of *r* in 1007, and others is due to the confusion of *l*, *r* and *ḷ*—*l* had ceased to have its original definite value. The use of *l* for Skt. *ḷ* in *tiḷakam* (1010) and *kamala* (1085) is due to the confusion between *l* and *ḷ* which had taken the place of *l*. In this century, *ḷ* is taking the place of *l* more and more, though not uniformly in all the areas. (See 1028, 1037, 1042, 1045, 1047, 1049, 1055, 1057, 1058, 1060, 1063, 1064, 1067, 1071, 1075, 1077, 1081, 1082, 1085, 1087, 1098 and 1100).

There is one interesting form *irḷda* (1067) showing the transitional stage in the change from *l* to *r*, when both *r* and *l* are written.

In the 12th century, *ḷ* and *r* become more frequent than *l* and *ḷ* is more predominant than *r*. This does not mean that *l* disappeared completely. In some inscriptions all the three changes are seen; *e.g.*, 1172. In 1179, we have the next stage: the *r* + consonant > long consonant, the *r* being assimilated to the consonant following. Thus:—

1. *l* + const. > *r* + const. > a long const.
2. vowel + *l* + vowel > vowel + *ḷ* + vowel.

In the next century (13th century) *ḷ* establishes itself firmly and very few forms with *l* are found. From the 14th century onwards, *ḷ* replaces *l* between vowels and the assimilation of *l* to the consonant following is established.

So far as the inscriptions are concerned, *l* is still found much less frequently in verse and very rarely in prose, though *ḷ* had completely replaced *l* in the description of boundaries.

Let us see what the grammars tell us :

Kavirājamārga (877 A.D.) has *l*, as in the inscriptions of the 9th century.

I. 1045. *Karṇāṭaka kavyāvalōkana* by Nāga-varmma.—The forms with *l* are quite in keeping with ancient traditions regarding the use of *l*. Sutras 6 and 65.

II. 1045. *Karṇāṭaka Bhaṣā Bhaṣaṇā* by Naga-varmma.—He also includes *l* in the Kanarese alphabet (Sutras 10 and 11). He states that consonants in front of -ḍ often change to *l* (KBB. 119, 121): nolpaṁ < nōḍu + paṁ; bēlpaṁ < bēḍu + paṁ.

The examples, where *l* is used, keep up the old tradition about the use of *l*.

III. 1260. *Karṇāṭaka Śabdamaṇidarpaṇa* by Kēśirāja.—The author, Kes' irāja, states that *l* is ḍ pronounced with greater pressure:—

atipīdanadiṁ rēphā

S'ritamāda rakāramuṁ samantu ḍakārā

S'ritamāda raḷanuṁ aṁgi

kṛtapadalatvakke Saṇēma sallāḍa kuḷanuṁ (18)

ivu varṇāvṛttige sa-

lvuvu; Saṁduṁ prāsadeḍege sallavu; yamaka

vyavahṛtig āgavu; dēs'i-

yavenipuv ā hrasvam enisida e o sahitam (19)

(18): *r* is produced by pronouncing *r* with greater pressure; *l* is produced by pronouncing ḍ with greater pressure; ḷ is produced by pronouncing *l* with greater pressure; pronouncing with greater pressure is explained in the vṛtti as "atipindeḷ uccarisuva ēkasthāni."

(19) *r* and ¹ *r*, ḍ and ² *l* and *l* and ³ ḷ may be used for repetition of cognate letters (as "surar ividoragida");

they cannot be used for alliteration (prāsa) — (it is wrong to use *r* and *ṛ* in prasa, as in 'dhuradoḷ and teradiṁḍa'); *ṛ* and *r* cannot be used in yamaka (as in kareyam and kareyam pottappudu) — (19) (Similarly for *ḍ* and *ḷ* and *i* and *ḷ*.)

The author then discusses where *ḷ* and *ḷ* are to be used and gives a list of words where words ought to have *ḷ* (SMD 23). This clearly shows that there was much confusion in his age about the use of *ḷ* and *ḷ*. He was bound by the traditional spelling and so he wanted to give a list of words where *ḷ* and *ḷ* ought to be used. This is in full agreement with our inference regarding the use of *ḷ* in the 12th and the first half of the 13th century. He also discusses the use of *r* in consonant groups such as *garde*, etc. (SMD 37). This indicates that the assimilation of *r* < *ḷ* to the following consonant was on the increase and the author wanted to point out which word ought to have *r* and which not. In his list, *garde* < *gaḷde* is given. This is also in corroboration of our inferences about *ḷ* in the 13th century. By the end of the 13th or the middle of the 14th century, replacement of *ḷ* by *ḷ* and the assimilation of *r* < *ḷ* to the following consonant was established.

N.K. baduku < M.K. barduṁku < O.K. baḷduṁku seems to have lost *ḷ* apparently. But baduku is < * badduku < barduku < barduṁku < baḷduṁku. The poets and scholars always tried to use the archaic *ḷ* in spite of the popular use of *ḷ* and assimilated forms.

IV. 1604. *Karṇāṭaka S'abdānus'āsana* by *Bhaṭṭakalāṁka*—The author of this grammar does not describe the actual state of the language in the early 17th century. He discusses mainly the principles laid down by Kēs'irāja, author of No. III

above, and often amplifies them, though the conditions had changed. *l* is from *ḍ* (KSS. pp. 163-168). He gives a list of words¹ where *l* ought to be used, though *l* had been replaced by *ḷ* long ago.

If we turn to *Kaṇṇāṭakakavīcarite*, Vols. I-III, we find that *ḷ* is occasionally used for *l*, but *l* is used in all the examples quoted even up to A. D. 1850 of. P XVII. Vol. I. KKC. —In the popular song of *Dēvalāpurada Nānjumḍa*, an ordinary *Viṣṇudāsa*, (1841) (p. 196 of KKC. Vol. III) we have *pēḷi*. This indicates the ways of scribes, commentators and editors of MSS. Hence quotations from this 'History of Literature' by R. Narasimhāchar, compiled from MSS. manipulated by scribes, commentators and editors, cannot be depended upon for our purposes.

Dr. Fleet in I. Ant. (KG. p. 15) has come to the following conclusion about the use of *l* in Kan. :-

A. 600-900 A.D. *l* in common use.

B. 900-1200 A.D. a transition of *l* to *r* and *ḷ*.

According to Kan. grammarians Kan. *-l-* is produced when *ḍ-* is pronounced with great force.¹ When Surds *k* and *p* come after *-ḍ-*, *-ḍ > -l* in O.K.² *nōḍu + pam > nōḷpam*, *māḍu + ke > māḷke*, *eraḍu + kudure > eraḷkudure*. Probably the *-ḍ-* of these and similar words was pronounced like *l* or very much like *l*, and the words like *nōḷpam*, etc., were archaic forms, still surviving then. After *l*, fut. tense suffix *-va-* > *pa-*³ as before *-ṛ*.

In between vowels, *l > ḷ* in M.K. and N.K: *aḷipi > aḷihi* (See History of *l* above.)

1. KVV. 6; KBB. 10, 11; SMD. 16, 19 and 114; KSS. pp. 167 and 168.

2. KBB. 119 and 121; KVV. 65; SMD. 183; KSS. 65.

3. SMD. 232; KSS. 503, 504, 511 and 518.

In SMD 20, *dāḍima*, *kūṣmāṇḍa*. *Gauḍa*, *Guḍa*, *jhaḡaḍe*, *Viḍaṅgam*, though born of -ḡa- and > -l-, have become *kuḷa*s i.e., *dāḷimba*, *kūmbaḷa*, *Gauḷa*, *Guḷam*, *Jhaḡaḷe*, *viḷaṅgam*. These are *kuḷa* in "rūḍhi" or usage; *ēḷaga* < *ēḡaga* is *kuḷa*.

The Skt. ṭ, ṭh, t, r and l become -l- in old Kan.¹

<i>Skt.</i>	<i>Skt.</i>	<i>O.K.</i>
-ṭ-	<i>ghaṭike</i>	<i>galige</i>
	<i>ghōṭike</i>	<i>golige</i>
	<i>dhāṭi</i>	<i>dhāli</i>
	<i>lāṭam</i>	<i>lālam</i>
ṭh	<i>maṭhike</i>	<i>malige</i>
	<i>pēṭhike</i>	<i>pēlige</i>
ṭ	<i>pratiḥastam</i>	<i>paḷihastam</i>
r	<i>krūraṁ</i>	<i>kūl</i>
	<i>Jhallari</i>	<i>Jhallali</i>
l	<i>tālam</i>	<i>tāl</i>
	<i>pulinam</i>	<i>puḷil</i>
	<i>argalam</i>	<i>aguḷi</i>

According to *Kes'irāja*, O.K. -l- is from -ḡ- and is the result of different pronunciation. This can be inferred from *Kēs'irāja* (1260) stating in SMD 22 that *paḷikam*, *pēlige*, *viḷige*, *guḷige*, *varālam*, *raḡaḷe*, though born of Skt. *Sphaṭikam*, *pēṭike*, *vīṭike*, *ghaṭike*, *varātam*, *raḡaṭe* by "apabhraṁṣ' ate" are still l (*kuḷa* as he calls them) in old Kanarese. But "hōḷige < sphōṭaka; *lambaḷa* < *lampaṭa* are treated as doubtful cases for l, most probably they have ḷ."

SMD 25. *jhaḷakam*, *jhaḷipisidam*, *joṁguḷi*, *boṁbuḷi*, *ālamālam*, *ṭhamālam*, *vaḷige*, *Onduḷi*, *jaṁguḷi*, *puttali*, *gōḷi*, *pēḷi*-these are doubtful whether they are l; they are most probably *kuḷa* -ḷ.

1. SMD. 21, KSS. 140.

These Sūtras show that ḍ, ḷ and ḹ were pronounced though differently, but nearly in the same manner, and that ḷ is, in the Skt. words, given by him and by KSS. on pp. 164-166 are from -ḍ- or -ṭ- or ṛ ; though ḷ has replaced -ṭ- in Skt. words like *pratihastam*, it is to be assumed that -ṭ- had become -ḍ- in Śāurasenī *prākṛt* and that this ḷ replaced -ḍ- of *prākṛt*

About its pronunciation in old Kanarese, nothing is definitely stated by the grammarians except that ḷ is from -ḍ-.

There is no ḷ in Te. and Tu. now. But in T. and M. it is still found. But in Madura and suburbs ḷ is pronounced as ḷ¹, but in Madras and the north, it is pronounced as -y-.

In O.K. the grammarians and the poets considered ḷ + consonant and ṛ + consonant could be used in alliteration (*prāsa*)². This suggests that the pronunciation of ṛ was very near that of ḷ and that is probably why ḷ + consonant > ṛ + consonant.

O.K. ḷ.

This ḷ is found in T. and M. now. It was in use in O.K. and O.Te.³. When Te. and Tu. lost ḷ is not known at present. This ḷ is not found initially in any language.

The following correspondences are found :—

I. (a) After long vowel :

K.	T.	M.	Te.	Tu.
-ḷ	-ḷ	-ḷ	-ḷ	-ḷ
tēḷu 'a scorpion'	tēḷ,	tēḷ,	tēḷu,	tēḷ

bīl 'inferior'	vīl	vīl	bīḍu	būru
	fall'	fall'		
bōla 'shaven'	bōḍa	bōla
agal 'a moat'	agal	agal	agaḍu	agaḷte
kolave 'a pipe'	kuḷāy	kuḷāy	koḍama	koḷave
				kolave
negaḷ 'to be famous'	nigaḷ	nigaḷ	negaḍu
pogaḷ 'to praise'	pugaḷ	pugaḷ	pogaḍu	pugar
suḷi 'an eddy'	cuḷi	cuḷi	suḍi	suḷi
				tuḷi

In two words, Kan. -l corresponds to Te -y.

kuḷi 'a pit'	kuḷi	kuḷi	koyyi	guri
nole 'to enter'	nuḷai	nuḷe	nūy	nūri

cf. Madras pronunciation of -l- as -y-. paḷan
payam and sometimes paḷam.

APPENDIX.

The history of *l* in K. can be seen in the following:

8th Century:

Consonant Groups.

The consonant groups are the result of (1) the final const. of one word coming in contact with the initial consonant of a suffix; (2) long consonants in suffixes; and (3) consonant groups in lws. These consonant groups are all in the terminational element. The consonant groups after short vowels are more numerous than those after long vowels.

In N. K. most of the consonant groups after short vowels are retained; preconsonantal nasal disappears in the termination; -r and -l with a stop after a short vowel are assimilated to the stop except in the case of those after long vowels.

The Treatment of Consonant. groups in N. K.

I *Nasal + stop.*

A. *Nasal + const. in the body of a word.*
These are in proper names. Their origin is not known. They are retained in N. K. Aṇḍugi, Kaṇantūr, Sinderā.

B. *The stop is the initial of a suffix.*

This group is retained in N. K. only (1) if the nasal is preceded by a short vowel and (2) if the nasal is

(a) *a part of the root*: aṁte, imbu, eṇṭu, endu, tirṅaḷ; mañju cf. maṁku. or

(b) *the remnant of the assimilation of the final consonant of the root and the initial of the suffix*:

konda, (prob. < * kol-nta) ¹ koṇḍa, tandu, Vandu, bandu, sandu, Sandān

1. See Tense-Suffix in the Past Tense *infra*.

I. *Nasal + Stop.*

1. The nasal, if it is only a part of the termination, disappears after a short vowel:—¹

O.K.

N.K.

koḍamge

koḍage from koḍu 'to give.'

2. The nasal, if it is only a part of the suffix after a short vowel, disappears:

O.K.

N. K.

taṅku (cf taṅkade)¹

tāku.

3. The nasal + consonant after a long vowel disappears in any position:

O.K.

N.K.

nōmpi

nōhi.

In nōmpi, the root is given as nōn. T. nōmpu; nōmbu; M. nōmpu; Te. nōmu.

The following with nasal + stop (suffix) are replaced in N.K. by new formations or words:—

O.K.

N.K.

un-vorun

unṇuvarū, colloq. umbōrū.

antu, intu, entu

hāge, hīge, hēge

neva

ennuval(emba)

suracāpambole

suracāpadahāge

The following are obsolete in N.K. nōnta, nontu.

II *l + stop.*

(A) *l + k, g, v.* Where *k, g* and *v* are initials of suffixes: all the groups have been replaced by new formations in N.K. (by the addition of *-u* to the root),

O.K.

N.K.

aḷ-kalo

aḷu-ku 'to fear'

āḷ-ge

āḷ-ike — cf. āṭida.

koḷvōnum

koḷḷu-vavanu

cf. koḷuvōrun

colloq. koḷḷō vanu.

¹ Probably taṅku is a mistake for tāṅku, probably ta-nku, since -nku- is the suffix of the verbal noun as in musuṅku beside musuru and muceu.

(B) $l + g, m$. Where g, m . are the initials of the second word in a word group. There is no change in N.K.

O.K.	N.K.
veḷgoḷa	Beḷgoḷa ¹
veḷmāḍa	beḷmāḍa

III $1 + stop$

A. $1 + g, v, t$, where g, v, t . are the initials of suffixes.

These are replaced in N.K.

O.K.	N.K.
sal-ge	sallali
sal-va-vol	salluva hāge
salvōn	hōguvavanu
	colloq. hōgōvanu.
nal-ta	nal-me

B. $1 + t, m$. Where t, m . are initials of the second word in a word group.

There is no change.

O.K.	N.K.
nal-tapa	naltapa (oftenoltapa)
kal-mane	kalmane.

IV $y + d, v$. where d, v . are the initials of suffixes :

A. O.K. $y + d$ appears as -d- in N.K. in the only instance :

O.K.	N.K.
āydān	ādanu.

B. The remaining words with O.K. $y + d$ or $y + v$ are replaced in N.K. :—

(b) The following with $y + d$ and $y + v$ groups, have been replaced by new words :

eydappaḍuvār	replaced by honduttāre (active)
--------------	------------------------------------

1. In some inscriptions Beluḡoḷa is found, but now also the form in use in Mysore is Beḷgoḷa.

koḍalpaḍuttade
(passive)

eydi	{	hogu 'to go'
eydidān		
eydidār		
eydidor		
eyde		
keyḍu	{	māḍu.
geyḍu		But geyyuvanu (colloq.
keyvōn		geyyōvanu) restricted to 'he who
keyvōr		works' on a farm, and keyyu
geyvalli		restricted to 'to join sexually.'

V r + stop

r + consonant, where the consonant is the initial of a suffix or of a separate word:—

" If the -r is preceded by a short vowel, the -r is assimilated to the consonant following:

(1) *r + consonantal suffix*:

O.K.

erddapam

M.K. eddapam (replaced in
N.K. by ēluttāne)

adarppu

N.K. adapu

orvvān

M.K. orbban, obban.

N.K. obbanu, colloq. obba, oba.

1. Even when -r is preceded by a short vowel, -r is not assimilated to the const. following, but is replaced by new words.

O.K.

negartte

N.K.

lws: yas' assu, kīrtti.

Nw: hesaru.

varppu

baluhu.

sāsirvvar

sāviraiana

sāviraṁandi

But if -r before the consonant is a suffix and the following consonant is the initial of another suffix, there is no assimilation of -r to the following const. but there is replacement by a new form.

O.K.

ahit-ar-kkaḷ

mālākār-ar-gge

N.K.

ahit-ar-kaḷu.

mālākār-ar-ige.

(2) -r of a word + the initial consonant of a word.

O.K.	N.K.
perggoravam	heggorava.
perjeḍi	hejjeḍe
irpattu	ippattu
Namilūrvvarasaṅgha	Navilūravaraṅgha

(3) When -r is preceded by a long vowel, -r is not assimilated

O.K.	N.K.
pārvvar	hāruvaru
VI l + const.	

l preceded by short vowel > r, which is later assimilated to the const. following:

O.K.	M.K.	N.K.
eltu	ertu	ettu
elpattu	erpattu	eppattu
kiḷga	kirrga	kigga
kiltu	kirttu	kittu
gaḷde	garde	gadde
paḷcu	parccu	paccu
peḷcu ¹	perccu	heccu
aḍaḷde	aḍardde

But after long vowels, a short vowel is developed between the l and the consonant.¹

1. iḷḍu M.K. iḷiḍu. N.K. iḷi 'to descend' and eḷe 'to drag'

But there is an O.K. form iḷ with a long i-.

Probably there is no assimilation because of this long vowel.

oltu -tu replaced by M.K. -ittu. (cf. oḷḷittu, ballittu) and by N.K. -eyadu, oḷḷeyādu.

nālke -l after a long vowel replaced by nāḍu in M.K. & N.K. N.K. nāḍige.

APPENDIX I.

A few examples from the later inscriptions to show the assimilation of *r* and *l* to the following consonant are given here :—

(10), EC. I. 45.

By the end of the 13th century, the assimilation of r and l to the following consonant was an accomplished fact though in poetry the unassimilated forms

were found. In the descriptions of boundaries which are in prose, no $r + \text{consonant}$ or $l + \text{consonant}$ are found after the 13th century.

In K.R.M.—the earliest Kanarese work published the $r + \text{consonant}$ and $l + \text{consonant}$ are found., irddem (I. 60), barddumiku (I. 72), korbbutta (I. 66), karcidode (II. 69), neredirddu (II. 125), embudarkke (III. 67), perccal (III. 150), bałdal (II. 36).

In K.V.V. and K.B.B. (1045), unassimilated forms are very common, e.g., ivarke, orvane, barppam (212), irppam (212)

But S.M.D. (1260) reflects the real state of the language. There seems to have been some doubt whether certain words should have $r + \text{consonant}$ or a long consonant.

Kēs'irāja, the author, of this points out that the list of words in Sutras 36-40 are to be pronounced with r and with l ; clearly indicating that the r and the l had been assimilated to the following consonant in colloquial speech and that, in writing, confusion had set in regarding the use of words with r or $l + \text{consonant}$. As he did in the case of l , he gives the list of words where r or $l + \text{consonant}$ are to be used. This corroborates our inference.

Further, the change in the pronunciation of these words is noted by him in his description of the fleeting double consonants (Sutras 36-40 and sutras 59 & 60). In these sutras, the *s'ithilatva* or the slack pronunciation of double consonants (*i.e.* the 1st syllable was to be a closed one with a final consonant) is described. The words given in his list have in N.K. a new vowel, in between the consonants suggesting that there was some half vowel or a short vowel in between the first and the second of the double consonants in the pronunciation of his age. On p. 49

(Sutra 36) he gives two or three words which can have both *dvitva* and *s'ithiladvitva* showing the dialectical variation, or probably the learned and the colloquial pronunciation. In Sutra 60, he condemns *s'ithiladvitva* in consonant groups (*r + const.*)

It is probable that, in *r + consonant*, *r* had become assimilated to the consonant following and there was shortening of the long consonant in pronunciation by *Ķes'irāja's* time. But some poets had recognised this shortening, though conservative writing had retained the *r + consonant* and called it *s'ithiladvitva* or fleeting double consonant.

The latest grammar, *K.S.S.*, paraphrases *S.M.D.* and is not of much help to us.

The inscriptions show that by the end of the 13th century, the assimilation of these consonants was an accomplished fact, but that, in verse, the archaic forms were retained.

VI Disappearance of the preconsonantal nasal:

A: Long vowel + nasal + suffix:

925 *tōṇṭadiṁ* (7) *EC. IV. yl. 25*;

935 *tōṭaman* (12) *EC. VII. Sk. 194*;

950 *kōṭe* *EC. III. Md. 41*

982 *nūṁki* (51) *EC. II. 134*;

1057 *tōṇṭakhaṇḍada*; (24), *tōṇṭa* (33) *EC. IV. Hg. 18*;

1063 *tōṇṭamum* (23) *EC. VII. Ci. 18*.

B. Short vowel + nasal + consonant.

In *N.K.* these words have no nasals at all. Even in the 11th century there was confusion about the use of the nasal as can be seen from these few examples.

In *K.V.V. & K.B.B.* (1045), these nasals are generally preserved. But by 1260, the age of

Kes'irāja, confusion regarding the use of these nasals had set in and he, therefore, gives in Sutra 36, a list of words where the nasals are nitya or permanent (or compulsory); and where the bindu (nasal) is vikalpa or optional. This optional use of the nasal in some and the compulsory use of the nasal in the rest indicate that the nasal was gradually falling out and he wanted to retain the ancient usages by giving a list. Most of the words in his compulsory list have lost their nasals in N.K. (See the list given under 'The Dative Case' infra.)

But Bhaṭṭākalanika's grammar, K.S.S., is not useful to our enquiry as he is more a commentator on S.M.D. than a grammarian giving a true account of the language of the period.

LONG CONSONANTS.

Long consonants are found between vowels and after -r in O.K. The intervocalic long const. appear, only after short vowels; similarly the r followed by a long consonant is preceded by a short vowel except in one word *pārvvarumān* (in which, moreover, the group develops differently from the group preceded by a short vowel).

These long consonants are due to

- (a) the suffixes with long consonants;
- (b) the assimilation of: 1. the final consonant of the root and the initial consonant of the suffix: 2. r with the consonant following: and 3. of l with the consonant following;
- (c) the retention of Pr. Drn. * -ṇṇ-, * mmm, * -ll, and * -ll after short vowels in words of two syllables and before vowels;
- (d) the consonants coming after -r;
- (e) the long consonants in lws.

These long consonants of O.K. are shortened in Nws. and Lws. alike in N.K. after a short vowel in all positions. They are retained in emphatic and deliberate speech and in conservative writing.

The shortening of long consonants took place earlier in the terminational element (See p. 93)

1. The following suffixes have long consonants:

Nws. -kke. anduvalikke, akkuṃ
 -ittu. oḷḷittu, ballittu. (cp. SMD. 226).
 -pp-. bādhippa, muḍippidār.

Lws. -itti- Dēvedittiyar, s'iṣittiyar.

2. In the following, the final consonant of the root and the initial consonant of the suffix are assimilated.

Vbs: keṭṭar; ¹ vittār; keṭṭ * nt-ar; viṭ-* nt + ār. sattar ².

Participles: Keṭṭa, koṭṭu, pokka, mikkudān, muṭṭidōn, meṭṭi, viṭṭu.

In the passive form, eydappaḍuvār < eydal + paḍu + v + ār, -pp- is due to the assimilation of -l + p-.

3. In the following, i.e. in r + consonant group, r- is assimilated to the following consonant k- of ku. ikki < irku + i.

4. In l + consonant, -l is assimilated to the following consonant: vittidalli < * virttidalli < vilttidalli. N.K. bittidalli (bittida kaḍe). cf. bil'tiyabhattadoḷ (8). E. C. I. 3. (890).

5. The long consonants ³ in the following are probably due to the retention of the Pr. Kanarese * -ṇ, * m, * l, and * -l of words of two syllables, having a short vowel before these consonants: Exs. unṇūrum, gō manṇa, taṇmaḍigaḷor, nama; alli, nilladan, nillavu, ballittu, ulle, oḷlittu. In these, probably, Pr. Drn. haḍ * -ṇṇ, * -mm, * -ll, and * -ll. In K, T, M. and Te. these final long consonants are shortened when they are absolutely final or before consonants; but before vowels, they are retained only when the vowel preceding these consonants is short and the words wherein they appear are of not more than two syllables.

Pr. Dr. * -ṇṇ

K.	T.	M.	Te.
kaṇ,	kaṇ	kaṇ	
kannu (the eye)	kannu	kannu	kannu

1. See Past Tense in Grammar for the explanation of these forms.

2. See Do do

3. See Grammar. Do do

4. See Siddeswara Varma. "Critical Studies in the Phonetic Observations of Indian Grammarians." p. 108.

Pr. Dr. * -ṇṇ

K.	T.	M.	Te.
peṇ	peṇ	peṇ	
peṇṇu (a girl)	peṇṇu	peṇṇu	
maṇ	maṇ	maṇ	
maṇṇu (clay).	maṇṇu	maṇṇu	
-mm-			
namṇāḷ (our servant)	namṇāḷ	namṇāḷ	mana
-ll-			
kaḷ	kaḷ	kaḷ	kallu
kaḷḷu (a stone)	kaḷḷu	kaḷḷu	kaḷu
paḷ	paḷ	paḷ	paḷu
paḷḷu (a tooth)	paḷḷu	paḷḷu	paḷḷu

muḷḷu (a thorn)	muḷḷu	muḷḷu	mulu

But, in absolutely final position, the Pr. Drn.* -ṇṇ-, * -mm, * -ll, * -ḷḷ are simplified or shortened as given in the forms without- u above. Before consonants, they are found as single consonants:—

kaṇ. -ṇ. kaṇkappu, 'a black collyrium applied to the eye.'

kaṇkupi 'the socket of the eye'. kaṇgone 'the outer corner of the eye'. kaṇdere 'to open the eyes'. maṇḡōḍe 'a mud wall'

-l. kaḷgāṇa 'a mill with stones for grinding'. kalmale 'a shower of hailstones'. kalkuṭiga 'a stone-cutter'. kaḷnāru 'the American aloe'. paḷgaḍi 'to

gnash the teeth.' paldudi 'the point of a tooth.'
paldere 'to uncover the teeth.'

-l. mulkire 'the plant *Amaranthus spinosus*.'
mulgattige 'a knife for cutting thorns.'

Tamil and Malayalam :

-ṇ kaṅkaṭai 'the corner of the eye', kaṅkaṭṭa
'to blind the eyes by magic', kaṅkūṭu 'the socket of
the eye.'

kaṇṭiṭṭam 'opinion from sight.' kaṇpaṭṭai 'an
eyelid'. maṅkaṭṭiri 'to form earth, as white ants.'
maṅkiṇaru 'an unwallled well'. maṅmaḷai 'shower of
sand or dust.'

maṇmagal 'the earth goddess.' maṇpār 'a strata
of hard earth.'

-l. kalneṇju 'a stony heart.' kalmaḷai, 'a shower
of hailstones' kalvetṭi 'a stone cutter', kalviṭu 'a
stonehouse.'

pulviṭu 'a thatched house.'

-l. muḷvāyan 'an insect that consumes wood.'

In 'l'el. these consonants are used before conso-
nant with -u.

6. In the following the use of long consonants
after -r are found in these inscriptions.

adarppi, erddapam, orvvan, pārvaruman,
Sāsirvvar.

A consonant following -r is written as a long
consonant; probably the long consonant was divided
between the two syllables in pronunciation in that
period. -r preceding a long consonant is assimilated
to the long consonant if -r comes after a short vowel;
then the long consonant is shortened. O.K. orvvan M.K.
orbban and obban, N.K. obbanu, colloq. obba, when
used independently and for emphasis, otherwise 'oba'.
alloba bandidāne 'a certain man has come there.'

In the case of pārvarumān, a vowel is developed between the r preceded by a long vowel and the double consonant and it > N.K. hāruvaru.

7. The following gives the long consts. in Lws. :

(1) *Plw. with long consts*: ayyaṇṇaḷ, kammarar, Janna, bhaṭṭa, bhaṭṭārakar, māriṭṭamān, Valliggā-meyar.

(2) *Slw. without a long consonant, adapted into Kanarese with a long consonant* :—

nittadharmmamān < nitya dharmmamān.
māṇākka < māṇavaka. In N.K. these are also shortened, as baṭarimṇge in these inscriptions shows that they were already shortened by the 7th century.

The following are examples of long consts. found shortened in these inscriptions :

A. NWS. 1. Verbs & Participles :—

in the fut. of 'to be' ¹, 'to become' and the past of 'to give' 'to be' ida for idda, ppl of ir 'to be.'

āy 'to become' akkum > akum, > akun; fut. of ā-gu 'to become' āppār > appār > apār > apar.

'to give' koṭṭam > koṭam; koṭṭār > koṭār in the past tense.

(2) Dem. pron, idarke > idakke > idake¹

Lws: appa > apa in S'āntapana; kammāra > kamara; bhaṭṭa > baṭa; bhaṭṭār > bhaṭār; Valliggāme > Baḷagāmve.

1. Professor R.L. Turner: 'The Future Stem in Asoka' B.S.O.S. VI. p. 529.

i Sya > isati in Asoka. nikhamisati. (Dhan)

i Sya > iṣati in Asoka. Vādhiṣati (Shabaz)

These are in the termination element—JRAS 1927 p 232
Kurumaḥ (skt) > skt Kurmaḥ.

The following examples from later inscriptions show long consonants as well as shortened long consonants :

Inscriptions :—

9th Century :

III. MI. 63 ;

The following roots and proper names with long consonants are found :—

1. *Roots :*

kaṭṭisu 'to cause to be built'; kaṭṭu 'to build';
meccu (maccu) 'to approve'; probably from mar-cu,
where -cu is a suffix. cf. pelcu, percu.

2. *Proper Names :*(a) *Of Persons.*

1. Arabhaṭṭa (Pkt. bhaṭṭa); 2. Uḷikkalguru-
vadigaḷ; 3. Dallaga; 4. Dhaṇṇekuttārēviguravi;
5. Nāgeṇṇan; 6. Paṭṭiniguruvaḍigaḷ; 7. Mellaga-
vāsaguruvar; 8. Veṭṭedeguruvaḍigaḷ; 9. Sokka-
gāmuṇḍar.

(b) *Of Places.*

1. Alamavalli (probably from ālam a banyan
tree, palli-a settlement, or a village); 2. Uḷikal
(probably a rolling stone); 3. Kittūr (kiru, small and
ūr a village); 4. Kittere (kiru, small and ere, a lord);
5. Kiḷḷa; 6. Koṭṭara (probably from koṭṭa (given) and
ara (for ara, charity); 7. Koḷattūr (probably from T.
koḷatta. K. Koḷadā, of the tank and ūr, a village); 8.
Thiṭṭagapāna; 9. Nāvalli (probably from nā, four
and palli, a village. four villages,); 10. Nirilli (probably

1. Professor R.L. Turner J.R.A.S. 1927 p. 228.

from Nir, water and illi here); 11. Paṭṭini; 12. Vallig-gāme, skt. Valligrāma; 13. Veḍevaḷli.

APPENDIX.

The long consonants after short vowels are shortened in the following examples taken from kāvyas, dictionaries and grammars :¹

aḍapavaḷla, aḍapavaḷa 'one carrying his master's, betel-pouch'; aṇṇa, aṇṇa 'an elder brother-'; anittu, anitu 'so much'. annisu, anisu 'to cause to say'; appa, apa, father; 'a term of respect.' appa, apa, aha 'that becomes'; alli, ali 'in that place'; illi, ili 'here, in this place'; eṇṇike, eṇṇike 'counting'; kaṇṇadaka, kaṇṇadaka 'a pair of spectacles'; kaḷḷatana, kaḷatana 'theft'; kuyyisu, kuyisu 'to cause to be cut'; kūrittu, kūritu 'that is sharp'; kollu, kolu 'to kill'; gedḍalu, gedalu 'the white ant'; gellu, gelu 'to win'; caṭṭige, caṭṭige 'a small earthen pot with a broad mouth'; cikkaṭa, cikṭa, ciṭa 'a flea'; cokkaṭa, cokṭa 'purity'; jaḷḷaḍi, jaḷaḍe 'a sieve'; muḷḷu, muḷu 'a thorn'; saṭṭuga, saṭuga,; saṭga 'a ladle of wood'; sallu, salu 'to enter a place, to go'; sallisu, salisu 'to cause to enter, to deliver'; sollage, solage, solige 'a measure of capacity'; hallu, halu 'a tooth'; hoddike, hodike 'a cover, a wrapper.'

¹J. R. A. S. 1927. P. 238.

Consts. and vowels of terminations are liable to a development, diff. from that in the body of a word. Changes are due to pronunciation being lax and muscular effort is not intense, i.e., termination behaves as though it were unaccented or not prominent:—

1. Loss of syllable.
2. Shortening,
Voicing,
Assimilation,
or complete disappearance of a const.

RV * Madhai > mahe and-dhi > hi. adhve > Pali. avhe. eni and ānāin > anusvara and later nasalisation of the vowel asmin > -s. through -asi. 'asya > assa > ;asa > s e.g. coras. -iṣya > iṣya, — issi-issi, isi, iha, ihi. -asi. chavasi > hossi.

*Result:—*A. The inflectional system is destroyed, whatever the number of syllables of the terminations, due to the Phonetic weakness of the termination element.

B. Use of the other means of grammatical expression led to the termination being more lightly stressed and hence to the most violent phonetic changes in the terminational element.

PART I
B. GRAMMAR

PART I.

B. GRAMMAR.

Nouns.

The nominal stems found in these inscriptions consist of:—

1. *Substantives not analysable into root and suffix:*

āneya, gen. sg.-elephant.

eḍeyān, acc. sg.-place.

pulla, gen. sg.-grass.

2. *Stems formed from verbal roots by the addition of one suffix:*

ālge-rule, reign, from āl-to rule.

3. *Substantives formed from:*

(a) existing substantival stems:—

okkaltanaṁ from okkal-thrashing from
okku-to thrash.

(b) adjectives or attributive words:—

nalta (goodness) from nal-good.

oltu (good, noun) from ol-good.

4. *Substantives formed from the past and future declinable participles of verbs:*

with gender suffixes, if any.

alidon-he who destroys-from alida-Dpp. of alī-
to ruin.

ittodu-that which is given, from itta-Dpp. of ī
-to give.

kādōn-he who protects, from kāda-Dpp. of
kāy-to protect.

5. *Substantives formed from pronominal adjectives by adding gender-suffixes :*

per-an }
pel-an } another person from pera = the other.

6. *Substantives formed from Numerals :*

elapadinbarga-to the seventy people.

sāsirvvar-one thousand people.

But in the case of Iws. from Skt. the stems are formed as follows :—

1. *words borrowed from Skt. without any change :*
kulaṁ, janam, dēham, dharaṇiyuḥ, bhaktiyim,
Maraṇam, mōham, rājyam, lakṣyam.

2. *words borrowed from Skt. with modifications :*
ācāri, nisidhige, riṣyar, śiṣittiyar.

3. *Skt. words in fem. gender, ending in -ā, are adopted into Kanarese, substituting -e for ā.*

bāle from bālā,

mariyādeyan from maryyādā

vidyullatēgal from vidyullatā.

4. *Skt. stems ending in -s drop -s.*

manade from mana (Skt. Manas)

tapam from tapa (Skt. tapas).

5. *Skt. -vat (-vant) stems are borrowed with the strong form of the stem -vant.*

lakṣaṇavantar.

6. *Substantives derived from the Dpp. of the causative forms of Skt. roots :*

pālisidom

7. *Past participles of Skt. verbs are used as substantives :*

rājas' rāvitam-āge.

Gender.

There are three genders, masculine, feminine and neuter.

1. Substantives denoting male persons are masculine ;

2. Substantives denoting females are feminine ;

3. All other substantives (denoting animals, their actions, qualities, etc.,) are neuter.

<i>Masculine.</i>	<i>Feminine.</i>	<i>Neuter.</i>
arasan, king	{ no examples.	okkaltana-farming
alidan, the destroyer		paḷi-blame
kādon, the protector		pāvu-a snake
salvon, the goer		pulu-a worm.

The masculine in the nom. sg. is either the simple stem without any suffix or termination, or the stem with any of the following suffixes to distinguish gender :—

-an, -aṁ, -am, on, om. in -a stems only. (K.B.B. 50.)

(a) *stems without any suffix or termination :*
masculine.—Allagunda, aḷiya, ere, Kāmba, Naṣ-
 tappa, maga.

feminine.—tapaccale.

neuter.—ittodu, oltu, kere, dhone. paḷi.

(b) *stems with suffix :*
 (These suffixes distinguish the gender of the stem as masculine) :—

masculine.—arasan, arasaṁ, alidoṁ, alivon.

feminine.—no examples.

neuter.—ūḷigaṁ, okkaltanaṁ.

It will be shown under " Declension " that the suffix -an runs through all the cases of the sg. except in some cases, the dative and sometimes in the pl.

-on is found as the gender suffix in the nom. sg. (-on < -avan, see -on under "Adjectives")

The use of -am for -an is due to the use of the anusvāra symbol (see "the nominative case" under "Declension").

The use of -am is found only in the case of Skt. words:

Kucēlam, Guṇabbhūṣitam.

Loan words, when adopted into Kanarese are regarded as Native Kanarese words in the matter of gender. The following lws. are used as neuter. mahājanakke, mūvettunūrā, dēvejanani, prajeyum (The same usage is found in later kāvyas).

The forms, S'rī Jambunāygir, Dēveḍittiyar', s'iṣittiyar show that feminines were formed from the masculine by suffixing -i and -itti respectively:

Śrījambunāygir from Śrī Jambunāyaka (masc.), gurayi from gurava.

Śi ṣittiyar from śiṣya (masc.)

There is no example of the fem. sg. of a NW. in these inscriptions.

The neuter nom. sg. is the stem¹; some stems ending in -a take -am or am as the nom. sg. suffix, (see neuter nom. sg. under "Declension").

Nws.—neuter.

(a) *stem as nom. sg. neuter.*
okkaltana.

(b) *stem with -am.*
ūligam, okkaltanam.

Lws. (a) *stem without suffix:*

1. Here in these inscriptions eltu (a bull), Kavile (a cow) pulu (a worm) and pāvu (a snake).

masculine: ācāryya, Guṇakirtti, -prabhu, bhaṭāra,
Mēghanandīmuni, Sarppaculāmaṇi.

feminine: tapaccale.

neuter: nisidhige, pāda.

(b) *stem with suffix*:

masculine, -an.

andhan, niravadyan, pūjyamānan, munivaran,
Saukhyasthan.

-am.

Kucēlam, Guṇabhūṣitam.

-om.

pālisidom.

feminine. no examples.

neuter -aṁ.

āyusyam, kulam, tilakam, svarggam.

-avu, ātmavaśakramavu, mukhavu.

In the neuter sg., all Skt. lws. have -aṁ or -am added to the stem as a general rule.

aḍigaḷ-“Feet” is neuter when used as an independent word. When suffixed to guru- (a teacher), Guruvāḍigaḷ (the feet of the guru) neuter in form, was used as masc. like the Skt. mitram, kaḷatram and śrībhagavatpādaiah; Guruvāḍigaḷ muḍippidār- the teacher ended (his life); the -ār of the verb indicates that this Neuter nom. pl. is used in the sense of masculine nom. pl.

In the case of dēvake, and devarke, the word dēva (god) is used in the neuter and the meaning given to it by Dr. Fleet is “the establishment of the temple.”

The -a stems in the masculine sg. and in the neuter sg. take -an- and -ad- [K.B.B. (51) ನವಂನಕ ೦೦ಗೇನಕ (51)] respectively, as suffixes between the stem and the case-ending. But the -i-, -u and -e stems

have no such suffixes. Pronouns *adu*, *idu* (neuter) take *-ar-as* suffix, but only the glides *-y-* in *-i* and *-e* stems and *-v-* in *-u* stems. Why this differentiation is made is not known at present.

Number.

There are two Numbers—*sg.* and *pl.*

The *sg.* is either the simple stem in the *nom.* or the stem with the gender suffix or glide and case-termination.

(a) *simple stem in the sg :*

masc. Nws. Allagunda, aliya, ere, kamba,

-a stems : Dallaga, maga.

lws. kamara, Naṣṭappa, Basantakumara, Rāma-singabhaṭāra, Vasantakumāra Śāntivarmma, Śrī-maccitravāhana, Śrīvikramāditya bhaṭāraka, śrīvinayādityarājaśraya prithivīvallabha-mahārājādhirāja parameśvarabhaṭāra.

-i stems : Akṣayakīrtti, Guṇakīrtti, Pallavācāri, Puṣpasēnācāri, bhāgi, muni, sāksi, Sarppacūlāmaṇi, Vinayadēvasēnanāmahāmuni.

-u stems : Caritaśrīnāmadhēyaprabhu.

Feminine. no examples.

Neuter.

-a stems : okkaltana.

-i stems : gēli, paḷi.

-u stems : ittoḍu, oltu, puḷu.

lws.

-i stem : pūti.

-e stem : nisidhige.

(b) *stems with gender suffix :*

<u>Masc.</u>	Nws.	Lws.
-an	arasan	-pātakan
-am	Kucēlam, Guṇabhūsi tam.
-on	aḷivon
-om	aḷidom	pālisidom

Feminine no examples.

<u>Neuter.</u>	Nws.	Lws.
-am	okkaltanam	kulam
....	ūḷigam	doṣam
-am	dēham
-avu	atmavaśa- kramavu mukhavu.

The pl. is formed by the addition of -ār, -ar, and -gaḷ.

Masculine and feminine stems form their pls. by suffixing -ār or -ar.

<u>Masc.</u>	Nws.	Lws.
-ār	aninditār
<u>Feminine</u>	Rājñimatīgantiyār
-ar		
<u>Masc.</u>	arasar	āmikkōttamar
<u>Feminine</u>	Dēvakhantiyār
		Śiṣittiyār

-ār is more ancient than -ar.

Masc. stems ending in -i, -u and -e form plural by suffixing -gaḷ. (K.B.B. 40).

Masc.	Nws.	Lws.
-i	bhāgi-gaḷ

Fem. -e	-avvegaḷ -abbegaḷ
---------	------	----------------------

All Neuter stems form their plural by suffixing -gaḷ.

Nws.	Lws.
....	śrīsaṅgaṅgaḷa. vidyullategaḷ vratagaḷ.

There is no differentiation between Nws. and Lws. in the formation of the plural.

The use of the honorific plural for kings, monks and nuns is very common and most of the plurals in masc. and fem. are honorific ones:—K.B.B. (42.) SMD. 102.

		Lws.	Nws.
Masc.	kings	mahārājar	arasar.
	monks	ācāriyar guruvar māsēnar	
	nuns	Devakantiyar Śiṣittiyar.	

The formation of the sg. and the pl. is seen in the declension of Nouns.

A subject in the sg. has often the verb in the pl. and *vice versa*, e.g., 3-71, 3-17, 6-18, 24-2 and 50-1,

Declension.

There is only one declension for all stems in all genders.

- There are seven cases:—(1) Nominative,
(2) Accusative,
(3) Instrumental,

- (4) Dative,
- (5) Genitive,
- (6) Locative,
- (7) Vocative.

The stems end in -a, -i, -u, -e and consonants.

The study of these stems is taken up case by case.

The Nominative Case.

There is no case termination for the nom. sg. in all the three genders [K.B.B. 74 ಲಿಂಗಾರ್ಥವಚನಮಾತ್ಮೀಪ್ರಥಮಾ]. Either the stem or the stem with the gender suffix is used in the nom. sg. The pl. is formed by suffixing -ār, -ar or gal in the Masc. and fem. but -gal in the neuter. In a few cases, -u is found as the nom. sg. suffix.

(a) The stem as nom. sg.

-a stems : Masc. *Native words*: Allagunda, aliya, kām̄ba, Dallaga.

Loan words: kamara, Naṣṭappa, Basantakumara, Rāmasingabhaṭāra, Vasanta-kumāra.

S'āntivarmma, S'rimatcitravāhana, S'rivikra-māditya-

bhaṭāraka, S'rīvinayādityarājās' rayapriṭhivī-vallabha-

mahārājādhirāja paramēśvarabhaṭāra.

Feminine. No examples.

Neuter. Nws. No examples,

Lws. dēgula.

-i stems: *masc.* Nws. no examples.

Lws. Akṣayakīrtti, Pallavācāri, Guṇakīrtti

Puṣpāsēnācāri, bhāgi, muni, sakṣi, Śarppacūlāmaṇi.

Feminine. No examples.

Neuter. Nws. *ittodu*, *oḷtu*, *pāvu*, *puṭi*.

Lws. no examples.

-e stems :

<i>Masc.</i>	Nws.	} no examples.
and		
<i>Fem.</i>	Lws.	

Neuter. Nws. no examples.

Lws. *nisidhige*.

But the masc. stems ending in -a are used as nom. sg. with any one of the following suffixes of the masculine gender.

-an, -am, -am, -ōn and om. K.B.B. 39, 45, 50. -an seems to have been the original masculine and neuter suffix for all stems in -a. The reason for this supposition is the magan "son" (masc.) and maran "a tree" (neuter) have the same -an, not only in the singular, but also in the plural *Nārayaṇayyaṅgaḷu*, masc. (nom), *ivelviṣayaṅgaḷan*, neuter (acc.) and in all the cases. Examples for all the cases are not found in the inscriptions studied. Later, -an was restricted to the masculine gender and -am to the neuter. -am and -am are essentially the same. The form with -m is used before words beginning with a consonant; the forms with -m or -n before words beginning with a vowel. The only pre-vocalic form in the case of Skt. lws. is -m; -ōn and ōm are used as suffixes of the

declinable (relative) past participles of verbs which are used as adjs. (see "Adjectives")

-an.

Nws. arasan¹, Allagundan, Nāgeṇṇan.

Lws. Guṇasāgarādvitīyanāmadhēyan, Candra-
dēvacāryyanāman,
Nandisēnapravaramunivaran, mahādēvan,
Vidrumādhara Śāntisēnamunīsan.

-am.

Lws. Kucēlam, Guṇabhūṣitam.

-am.

Nws. no example.

Lws. Kundavarimmarasaṁ, guravaṁ, perggora-
vam.

The masc. -i, -u and -e stems have no suffix or termination in the nom. sg.

The use of -m as the termination of the nom. sg. for all the stems in all the genders² by later grammarians is due to the influence of Skt. lws. in the neuter and the interpretation as -m or -n of the anusvāra at the end of a word; this is seen from the examples given by them for illustrating the sūtras; maram (SMD 93).

Nom. sg.	Fem.	No examples.
	Neuter.	

As stated already, in principle there is no suffix or termination in the nom. sg. But the following suffixes -am, -am and -avu are found in -a stems. Essentially, all these are different forms of -am, avu < am -u.

1. Caldwell and Kittel consider that arasan is lw. from Skt. and derive it from Skt. rāja.

2. K.B.B. 39,45,50; K.V.V. 15; SMD. 93 & 105; K.S.S. 227.

Neuter.

Nom. sg.

-am.

Nws.

no examples.

Lws.

āyusyam, Kaṭavapraś
ailam, dharmmam, parijanam,
maraṇam, lakṣyam.

-am.

Nws.

ūligam, okkaltanam.

Lws.

dōṣam, paramārttham,
svarggam.

Caldwell¹ and Gundert state that -am is an obsolete demonstrative pronoun meaning 'it' and hence -am is not a borrowing from Skt. But L.V.R. Iyer² comes to the conclusion that -am is a borrowing from Skt. since the use of -am as a demonstrative is nowhere seen in T., Kan. or in any of the Drn. languages. But he has not noted the use of -am in T. and K. in the nom. sg. and the incorporation of -am in the plural of neuter -a stems e. g. maraṅgaḷ in T. and K. There is one neuter pl. acc. where -an-gaḷ < am-gaḷ is found ivelviṣayamgaḷam. cf. ālāmpū, the flower of the banyan tree, where -am is the nom. suffix, used in the gen. sense. It is not likely that -am, a simple suffix of the neuter used in the sg. and the pl. of neuter -a stems will be borrowed by a highly cultivated language like T. or Kan. from Skt.

Nom. sg. Neuter-avu.

These two lws. have -avu as the termination of the Nom. sg:—

ātmavaśākramavu, mukhavu.

As pointed out already, the Nom. sg. of Neuter Lws. ending in -a have -m or -am as the suffix.

1. C.D.G. p. 257.

2. Ed. Rev. Madras Oct. 1928, p. 6.

The use of *avu* (<*am-u*) as the termination resolves itself ultimately into *-am -u*. This *-u*, used only twice in nominal stems, is generalised as the nom.sg. case-termination in N. K. and does not appear in any other case-forms.

ittodān, *iravān*, *mrtyuvaravān*, *varppin*—in these forms *-u* disappears when the acc. or other case-termination is affixed. If it were a part of the stem, this *-u* would have survived in all the cases. The fact that the nom. sg. has no case termination, coupled with the appearance of this *-u* only in the nom. sg. leads us to suspect that this *-u* may have been a nom. sg. suffix.

This *-u* is found in the pronouns, personal termination of verbs and all nouns ending in consonants in M. K. along with forms without this *-u*; in N.K. it is fully established as the nom. sg. case-termination of all stems of both Nws. and Lws. in all genders and numbers. The addition of this *-u* has not modified the meaning or grammatical function of any of the words to which it is suffixed. Verbal roots ending in consonants in O. K. and M. K. have this *-u* in N.K. This *-u* does not appear even in N. K. before a suffix beginning with a vowel.

This *-u* is found in T. Mal. Tel. and Tu. also. Its non-existence in the other dialects and their late appearance in these dialects show that this *-u* has a definite purpose to serve. In many inscriptions it is written, though not pronounced, on account of the needs of metre.¹ Even in N.K. colloquial speech, it is not always pronounced, though it is always written.

1. Dr. L.D. Barnett, E. I. XV. p. 109; *Memoirs of A.S.I* No. 13. pp. 11, 12, 14, 16 and 19.

The "euphonic" theory put forward by Caldwell¹ and Kittel does not explain the use of -u as nom. sg. case-termination in N.K. Caldwell himself doubted whether this -u had not a specialising signification at first which had now been lost.²

I think the origin of this -u *may be* this:—

In Kanarese, there are a large number of verbal roots which end in consonants. These roots were used both as verbal roots and nouns.—

alar	-	to open to flower; a flower
alal	-	to sorrow; grief
kaval	-	to branch off; a branch
kukil	-	to sing as a cuckoo and a cuckoo
talir	-	to sprout; the tender sprouts of a plant.
nul	-	to make thread; thread
paṇ	-	to get ripe; a ripe fruit
pōl	-	to cleave asunder; a piece
bāl	-	to live; living, life
bīl	-	to fall; uncultivated land, a creeper.
mugul	-	to shut the eye-lids; an open- ing bud.
mūl	-	to be thorny; a thorn
siḍil	-	to be split; thunderbolt
sīn	-	to sneeze; sneezing
sīl	-	to cut asunder; a portion

Naturally, the use of the verbal root as the 2nd sg. imperative and as a noun caused some confusion and difficulty to the Kanarese child. It saw verbal nouns formed from roots by suffixing -pu and -vu :

1. C.D.G. p. 134. Kg. p. 23 and 25, 27-29.

2. C.D.G. p. 208.

- pu : ōpu < ō - to love.
 kāpu < kā (y) - to protect
 tōpu < tōr - to appear
 paḍepu < paḍe - to get
 mārpu < mār - to change
 mēpu < mēy - to graze
- vu : ari-vu < ari - to know
 aḷi-vu < aḷi - to ruin
 uḷ-vu < uḷi - to remain over
 era-vu < ere - to pour
 kara-vu < kare - to milch
 kī-vu < kī - to form pus
 tiḷi-vu < tiḷi - to know
 tera-vu < tere - to open
 nera-vu < nere - to take place
 nō-vu < nō - to pain
 pari-vu < pari - to flow
 pasi-vu < pasi - to be hungry
 paḷi-vu < paḷi - to slander
 mera-vu < mere - to shine
 sā-vu < sā - to die
 suḷi-vu < suḷi - to turn round
 seḷa-vu < seḷe - to drag, to pull

Further, verbal nouns were also formed by suffixing-udu or -adu ;

- kare-v-udu-calling < kare - to call
 kuṇi-v-udu-dancing < kuṇi - to dance

Verbal nouns may be formed from every verbal root by suffixing -vudu.

Besides these, a large number of nouns in nom. sg. in Kan. end in -u :—

- karu - a calf.
 paḷu - a forest.

pulu - a worm.

pāvu - a snake.

Further, the declension of stems ending in a consonant (the verbal roots ending in a consonant when used as a noun) was in no way different from that of the noun ending in -u excepting the dative.

The forms of nouns ending in -u found A. in the inscriptions and B. in the kāvyas are shown in the following list: To show that the words end in -u, the stem forms found in the inscriptions are given in the list marked C.

The declension of -u stems and stems with a final consonant with and without suffix -in- was very similar:—

varavu - ān = varavān.

bāl - ān = bālān.

baḷ - ā = bālā, bāl-in-ā

baṭar - ge, = baṭargge

baṭar - im - ge = baṭarimge.

All these forms are found in these inscriptions.

Further, participles of rts ending in -u and of those ending in a consonant are similar in form very often:—

-u-		pp.	Const.		pp.
turuku	—	turuki	bāl	—	bāḷi
malagu	—	malagi	udir	—	udiri
arucu	—	aruci	aḍar	—	aḍari
iṇṭu	—	iṇṭi	pīr	—	pīri
kaṭṭu	—	kaṭṭi	kār	—	kāri
ōḍu	—	ōḍi			
suttu	—	sutti			
ōḍu	—	ōḍi			
keḍapu	—	keḍapi			
tarbu	—	tarbi			
nemmu	—	nemmi			
taḍavu	—	taḍavi	tāl	—	tāli
tīvu	—	tīvi	sīl	—	sīli
araṣu	—	araṣi	poraḷ	—	poraḷi

-u-		pp.		Const.		pp.
elasu	—	elasi		urul	—	uruli
bīru	—	bīri		āl	—	āli
ēru	—	ēri		pogaḷ	—	pogaḷi

Though there were exceptions, the child found a large number of examples where this similarity existed.

Also, the Sandhi forms of words with -u and rts with a final consonant resembled very much.

Examples of these forms from the inscriptions are :—

- A.D. 980 poṃgaḍaṃgidudu. E.I. XV. 329
 1030 peṃp-askhalitaṃṇaṃ. Mañjarābād 45.
 1032 taṇip-i. Sorab. 184.

 1223 Seraṃṇ-iṃṇ-g-aṃṇ-āneyaṃ. Cennarāya-
 patna.
 1224 rūp-aṃḡaḡaḡdudu. Dg. 25.

In course of time, the noun-forming suffix -vu may have become -u by the loss of the initial v- and -u alone may have been used as the noun-forming

suffix as we have instances of such -u in the inscriptions of the next century.

Even in colloquial speech in N. K., we have mātimda, ētimda, guṇpiṇda < matu, ētu, guṇpu.

The child naturally suffixed -u in all those verbal roots ending in consonants when used as nouns. This -u was generalised as a noun-forming suffix at first. Since the stem was used without any suffix or case-termination in the Nom. Sg later on, this -u was generalised as the nom. case-ending, and therefore was added like all other case-endings to the sg. and the pl. The pronouns in the nominative had this -u suffixed to them. The personal terminations of verbs are fragments of pronouns and they too have -u in M.K. and N. K. In N. K. grammars, -u is the nom. case-ending of all stems in both the numbers and in all the genders.

It is stated that the virāma is represented, by u throughout and pointed instances are of s' rīmatu, pārthivēndranu, and poḡalaluke (E. I. V. p. 26). But in E. I. IV. p. 350, Fleet says that the virāma is represented by its own proper sign which resembles an exaggerated superscript r or e in ll 2, 4, 11, 15, etc. But in mattaru (24), the virāma is represented apparently by u. At any rate the occurrence of mattar in Saṁdhi in l. 23 and by itself in ll. 34, 35 suggests that in mattaru, the final mark is intended to represent the virāma and not to be pronounced. Further, in E. I. IV. Jaṭiṁga Rāmēśvara Hill, he states that the virāma is represented by its own sign in dēvar (7) and koṭṭar (12). In E. I. V. p. 9 both enal and enalu, paḍuval and paḍuvalu, mūḍal and mūḍalu (42, 47, 48) are found. In E. I. XIII. p. 168,

u is often used, but not always, to denote the absence of a vowel after a consonant.

In E. I. XII. p. 355 u is written instead of the virāma. On page 336 of E. I. XII, the notation of the virāma is found in several places in the prose portion as well as in verse--dhātriyolu and more notably in tatu-kaṇiyam (11) and bhavētu (48).

Why the virāma should come after every word in an inscription and whether it does so always is not clear. Tatu is the normal pronunciation of the vaidikas or orthodox people in Mysore and Dharwar areas. In fact, all the statements made in the E. I. clearly indicate that u was gaining a place in literary composition as it had established itself in colloquial speech. The people wrote in prose as they pronounced, but in conservative verse, the orthodox school did not accept it for some time and pronounced as in the past. But later, u came to stay in verse as in prose and is still in common use in N. K.

The original principle of having the simple stem or the stem with the gender suffix in masc. -a stems, was kept up in the conservative literary compositions, though -u was gaining strength in popular speech. That is why in some of the inscriptions in verse of the eighth and later centuries, -u is written but not pronounced, owing to the needs of metrical length. But in prose, they were written and pronounced. Conservative writing rarely adopts the change in popular speech very soon. Poetry was rarely written in popular speech in ancient times. Linguistic modifications get into poetry after a fairly long period of trial in popular speech. Hence this -u is rare in the earliest inscriptions and is more and more in evidence

in later ones; by the 15th century A.D. -u had established itself fully in the Kannada language. The silence of grammarians on this point is due to the fact that their grammars were chiefly based on standard literary works which were mostly in verse. The addition of this -u made the introduction of new grammatical forms necessary in M. K.

In the pl. the pluralising particle is suffixed to the stem directly in all the genders. The masc. and the fem. genders have the same pluralising particles: -ār, ar and -or in the case of -a stems; ār, ar and -gaḷ in the -i stems; and -gaḷ in the -u stems.

We have reasons to suspect that -ār is the more ancient of the two. In fact, -ar is derived from -ār. In 3rd pl. of verbs we have ēṛidār, viṭṭār in the earliest inscriptions. In the 3rd sg. we have āydān, ēṛidān, sandān. In N.K. present. continuous, -āne and āre are used, baruttāne, baruttāre. In Tamil, -ār is the only pluralising particle for the masc. and fem. In Tel. the 3rd pl. of verbs is -āru.

During this period, the ār and -ar are found side by side.

-ār -a stems—

masc. -i stems. adhikārigal, paramakalyāṇa-
bhāgigal.

-u stems. sād hugal.

-or. alidor, alivor. Kandarbor.
[See "Adjectives."]

Neuter: The pluralising particle of all neuter stems
is -gal.

-i stem. Neuter in form, masc. in meaning.

gal. -guruvaḍigal. Bāladēvaguruvaḍigal, Veṭṭe-
deguruvaḍigal.

Singanandiguruvaḍigal.

Thus we get the following in the nom :—

<i>Masc.</i>		<i>Fem.</i>		<i>Neuter.</i>	
Sg.	pl.	sg.	pl.	sg.	pl.
a. stem	-ār (nws. & lws.)	-	-ar (lw. -i stem)	a. stem	-gal.
	-ar (lws.)				
b. stem	-gal	-	-gal	b. stem -	
an				am	
- on	(lws. and	(Nw. -i		„ - am	
om	i stems)	stems)		„ - avu	

The Accusative Case.

The terminations are -ān, -an, -am, -ām, -ā and -a. We have reasons to suspect, as in the case of -ār (nom. pl.) that -ān and -ā are more ancient than -an and -a. During this period, -ān and -an, -ā and -a, were used side by side. -ā and -a are the same as -ān and -an with the final nasals dropped. Why the final nasal was dropped is at present unknown.

The conjunctive suffix -um is added to the case-endings of all nouns except in the accusative. In the latter, -um comes in between the stem and the case-ending.

e.g., masc. pārvar-um-ān.

neuter, initum-ām.

In the nominative sg. -um is suffixed to the stem or the gender suffix. The fact that in the acc. this suffix -um comes after the stem, but before the case-ending, suggests that the acc. ending is later in origin. In N. K. colloquial speech, the acc. suffix is rarely added to the stem in the case of inanimate objects :—

e.g., mane kaṭṭisida - he built a house.

house he built.

tiṇḍi tinda - he ate the eatables.

eatables he ate.

pustaka tā - bring the book.

bring the book

The acc. termination is added to the nom. sg. of -a stems with the suffix -an in the masc. and -am in the neuter. Loan words from Skt. retain the -am of the neuter nom. sg.; the acc. ending is affixed to the -am, which sometimes becomes -av-.

-ān. **masc.** -ā stems.

lw. urumithyāṭvāpramūḍhasthiratara nrpanān.
fem. no examples.

neuter. ajñānas' ailēndramān, ipūjyāsthālamān,
ghanammāriṭṭamān, tapam sayyamamān, duritābhū-
dvṛṣamān,

dēgulamān, dharmmam-ān, prāsādāntaramān, mūru-
dēgulamān,

s' ritapam-ān, svarggāgram-ān.

-i stems. lws. giri-y-ān, siddhi-y-ān. ¹

-e stems. nws. āl-ge-y-ān. eḍe-y-ān.

The acc. termination is added to the gender-
suffix -an in the masc. and -am in the neuter of -a
stems so far. In the following examples,-- ān is added
directly to the Nom. sg. (neuter) without any suffix
coming in between :—

nws : ittod-ān, irav-ān, mṛtyuvarav-ān.

-ā. **masc.** and **fem.** no examples.

neuter -a stem.

lw. vālibhāgam-ā.

-e stems.

pās' upatamariyādey-ā

pūrvvamariyādeyā.

-an. **masc.** and **fem.** no examples.

neuter. -a stem. lw. kadāmbamaṇḍalam-an.
-bhāvyaman.

-e stem.

nw. āne-y-an.

lw. mariyāde-y-an.

stems ending in a consonant - nī r - an.

1. KRM. II. 15. "-an > -ān when followed by a word
with an initial vowel, when the stem ends in a nasal, or at the
end of a line in verse."—This rule is not observed in these.

-am. mas.	-	kaḷantūr-an-am.	(The meaning is nom. sg.)
fem.	-	no examples.	
neuter	-	-i stem - lw. yati-y-am. -e stem - lw. viccheyam.	
-am. masc.	-	-i stem. baḷi-y-am.	
fem.		no examples.	
neuter		-a stems. lws. Kaṭavapray-am, manavam.	

stems ending in a consonant - pul-l-am.

In place of -am, -am and -an, we sometimes have -a,
masc. and fem. no examples.

neuter	Nws.	pul-l-a.
	lws.	dehav-a, rājyav-a, s' āsanam-a s' ailama.

-ava of dēhava, rājyava are < am-a.

In pulla and pullam (acc. sg.) the final consonant of the stem is doubled before the case-ending. Such doubling takes place only.—

(1) if the penultimate vowel is short as in pul, and not long as in nīr-an ;

(2) if there are no more than two syllables in the word ; and

(3) if the consonant n, ṇ, y, l or ḷ is followed by a vowel.

Primitive Drn. perhaps had long consonants ; they were shortened in the absolute final position, but preserved before vowels.¹

The bindu is put between the masc. or fem. -a stems and -gaḷ or -dir ; when such words are neuter, the insertion of this before -gaḷ is optional ; but when

1. Prof R. L. Turner, JRA.S. 1927, p. 227 Vissarati < Vismarati.

they are skt. neuters, it is obligatory. (SMD. 103), *e.g.*

m. amṇaṅgaḷ, amṇaṁdir.

f. akkaṅgaḷ, akkaṁdir.

n. maraṅgaḷ, maragaḷ, polaṅgaḷ, polagaḷ, payaṅgaḷ, payagaḷ.

Skt. guṇaṅgaḷ, dēṣaṅgaḷ, kōṣaṅgaḷ, doṣakke : deṣagaḷ.

The pl. suffix of -a stems may have been *riṅgaḷ in O. K. as it is in T even now, both for masc. and neuter. In 1260, the deletion of the nasal was optional in neuter, but compulsory in the case of masc, fem, and skt. neuters. The omission of the nasal in skt. neuters was dōṣa "SMD. 103"; why it is so only in the case of -a stems is not known ;

*Pr. pull > O. K. pul. but pr. Kan. pulla remained pulla.

In one instance, Sanyāsana vidhi (intu muḍipidār), the nom. sg. (stem) is used as acc. sg. This use of the nom. stem as acc. is common in colloquial speech in N. K.

Skt. divaṁ (acc.) is used as acc. in divaṁpokka (II. 80, 4) and divaṁ eridār.

In the pl. the acc. endings are added to the pluralising particle.

masc. and fem. - no examples.

neuter - ivalviṣayaṅgaḷan.

In one case, the -ān is suffixed to a stem ending in a numeral : gandhēbhamayd-ān.

The Instrumental Case.

The terminations are -in, -im, -in, -inda, and -indu. -im and -in are different forms of -in.

The terminations are added without any suffix between the stem and the case-ending in the -u stem: varppin and kavaḍim. But in neuter stems ending in -a, the suffix -d- comes in between the stem and the ending. But in -i stems the glide -y- is found.

Generally, -im and -in are used before a consonant while -in is used before a vowel. But the use of -in before a consonant is not unusual. There is no principle governing the use of -im and -in as can be seen from the following :—

anurāgaḍin eradu.

anēka s' īla guṇamālegaḍin sagiḍ oppidon.

imbinin prāsādāntaramān.

inbinim (last word in the verse).

kavaḍim Kaṭavaprāmeriyē.

guṇaḍim svādhyāyasampattinim kare-il-nal-
tapadharimmaḍim.

bhaktiyim akṣimaṇakke . . .

mukhaḍin keydonḍutā.

yugmaḍin oppe val, yōgaḍin avarum.

svarlōkaḍim niścitam.

-im. masc. and fem. - no examples.

neuter - -i stem. - bhakti-y-im.

-in. masc. and fem. - no examples.

neuter - -a stems. - (-ad-im).

lws. amalān naltada s' īlaḍim. vratas' īlanōnpi-
guṇaḍim.

svarlōkaḍim.

-in. masc. and fem. no examples.

neuter

(a) *without any suffix*¹

-u stems. - varppin.

(b) *with suffix -d-*

-a stems lw. - ārāḍhanāyōgadin, guṇadin, tapadin, tuṁgōccabhaktivaśadin, Bhadravāhu sa Candragupta munindra yugmadin, vicitra kanaka prajvalyadin, vidhānamukhadin, saninārggadin.

(c) *with double termination* (in-in).

-u stems nw. imb-in-in (inbin-in) (1).

(lw. svādhyāyasampattin-im).

In these two cases, there is no suffix, but the termination -in is repeated twice. Such instances are found in classical Tamil.

T. malei-y-in-in - from a mountain.

Here, the first -in- has lost its original significance and further reduced to a mere suffix. Hence the instrumental case-ending -in is again added to make the meaning clear. Cf. Suralōka mahāvibhavasthanan (40-4).

-inda. masc. and fem. no examples.

neuter. -a stems:

lw. dēvadaṇḍa-d-inda.

-indu. masc. and fem. no examples.

neuter. -a stem.

lw. vidhāna-d-indu.

As in the accusative, the termination is added to the pluralising particle.

-in. masc. -a stem. lw. - kumār -ar-in.

fem. no examples.

neuter -e stem. lw. - anēkaḡuṇas' ilamāle-ḡal-in.

1. From this, it is clear that the addition of -v- glide and of -in- is later in origin. KG. p. 4 (a) and 43 (b); ODG. p. 263.

1. CDG. p. 276.

The origin of the instrumental ending -in, or -in is not at present known. Caldwell's statement¹ that it is identical in origin with -in, the suffix of the Tamil ablative of motion, originally a locative, is not quite clear. His attempt to show that -inda is derived from -irda by citing the Tuda instrumental suffix -edd does not seem to be logical. Gundert's derivation of -inda from eḍe - a place, is not satisfactory²; -im (or-in) is an adverb of time in Kanarese and its meaning is "from that time, afterwards." Perhaps this adverb is used as a post-position to mean "from or by" (instrumental case.)

This -in- is inserted between the nom. sg. and pl. of -a stems and the terminations of the dative, as in kālarige, baṭaringe³. Why this is so inserted is at present unknown.

The Dative Case.

The terminations of the dative are -ke, -k-ke, -ge, -i-ge.

The termination is in principle -ke. This is preserved when preceded by *l* (< *ḍ*); the neuter suffix -a < ar < ad (this ar-ke subsequently > ak-ke). Otherwise, when preceded by a vowel, or by -n (whether radical or suffixal), *l*, *ḷ* and *r* (other than *r* < *r*) it > -ge. masc.

(a) *without any suffix* - Dēvereya-ge.

(b) *with suffix* -an

In the only instance of the dative-termination, added to the suffix -an, -i is inserted between the

1. CDG. p. 276.

2. CDG. p. 276.

3. SMD. 108. 109. This-in-is used in the old case-ending in u, ū, ṛ, ṛ ḍ. ou, and nouns with final consts and some adverbs in e insert this-in-before any termination.

masc. sg. stem *kālan* and the termination *-ke*, the form being *kālan-i-ge*, as in N.K. But in O.K. and M.K. *kāvyas*, the form is *kālage*, *kālaṃge*¹. The *-i-* is considered "euphonic" (whatever that may mean) and recent by Caldwell² and Kittel³. The occurrence of the form *-ige* in the earlier inscriptions shows that it had existed in the language for a long time before it appeared in literary composition. But, beside the termination *-i-ge* of these inscriptions, a form, *kālan-im-ge* appears in the *kāvyas* and *baṭar-inge* in the inscription of the 7th century which is taken up for study. It is, therefore, possible that *-an-i-ge* represents an earlier *-an-in-ge* with an additional suffix, which appears also in the termination of the instrumental (see above) and genitive and locative of *-u* stems. This preconsonantal nasal of O.K. disappears in M.K. and N.K. as the earliest disappearance of the preconsonantal nasal in a termination is quite natural⁴. The reference of grammarians to the optional or irregular use of the *bindu* or *anusvāra*⁵ is to the tendency of the language during the period of transition from O.K. to M.K. The process of change can be seen from the following examples:—

O.K.	M.K.	N.K.
aḍaṃgu	aḍaṃgu or aḍegu	aḍagu (to conceal one's self)
eraṃke	eraṃke or erake	erake rekke (the wing of a bird)

		(either end of a silk cloth used as a garment)

Fem. no examples.

Neuter suffix -ad-.

lw. Lañjigēsaram-dēvarke (578 A.D.)

-ar-ke of dēvarke is < ar - ke. This -ar- appears in place of -ad- in the oblique cases¹ of all the neuter demonstrative pronouns in the sg. and the pl. before a vowel :—

ad-ar-im (from or by this. instr.)

ad-ar-a (of this. gen.)

The later grammarians state¹ “A word with final -ru, which changes to rēpha, on taking -ge, the ending of the fourth (dative case), substitutes k. for the first letter.” In N.K. this -ar- ke > ak-ke by assimilation. In Tam. the dative of adu is ad-ar-ku.

The normal ending is -ak-ke (>ad-ke)

lw : apunarbhavakke, dēvalōkakke, naragakke, ramya-suralōkasukhakke, svarggālayakke. .

-ke.

In one instance, Kilgānadēvake, in place of -ak-ke, we have -ke affixed to an -a stem. This shows the general tendency of Kan. to shorten long consonants, unlike Tam. and Mal., when circumstances favoured it, in the last syllable of a word when preceded by a long vowel and in the terminational element.

The following list shows that the long consonant in the last syllable of a word preceded by a long vowel in T. and M. was simplified in Kanarese :—

<i>Tam.</i>		<i>Kanarese.</i>	
āṭṭam - play	āṭa
ūṭṭi - food	ūṭa
ōṭṭam (running)	ōṭa
kūṭṭam (gathering)	kūṭa

1. SMD. 110. 114.

2. KSS. 269 and 275.

<i>Tam.</i>			<i>Kanarese.</i>
tāḱḱu (to touch)	tāḱu
tīṭṭu (to rub)	tīḱu
tēṭṭu (to search)	tēḱu
nāṭṭu (to fix)	nāṭu
nīḱḱal (to separate)	nīḱu
nōṭṭam (sight)	nōṭa
pāṭṭu (a song)	pāḱu
pūṭṭu (to yoke)	pūḱu
vēṭṭam (hunting)	bēṭa
mīṭṭal (to strike the springs of a lute)	mīṭu
mūḱḱu (the nose)	mūḱu
mūṭṭai (a bundle)	mūṭe
mēḱḱu (height)	mēḱu
vāṭṭam (a slope)	vāṭa
vāṭṭam (a street)	vāḱa
ś ūṭṭu (to crown) (to wear on the head)	sūḱu.

Probably we have here the beginning of this shortening of -ak-ke to -ake in the termination. Later grammarians state that this shortening is optional (*vikalpa*), pointing to the period of transition.¹ In modern speech (as opposed to conservative writing), only -ake is used.

-ge :—

In one instance, a neuter -a stem has the termination of the masc. -ge, *viz.*, *anka* is a *tatsama* and -ge is added to it. The word *anka* has another form, *anke*; -e stems take -ge. This *anka* may, therefore, be a mistake for *anke*; or an *anka* (k) *ke* may have been influenced by *anke*.

1. SMD. 115.

-e stems :—

Masc. and fem. no examples.

Neuter - eḍepare-ge; kalmane-ge.

Consonantal stems :—

stems in -r :- masc. and fem. no examples.

Neuter :—(1) -ge : palarūr-ge.

(2) stems in -ḍ.

As stated above, after stems in -ḍ, -ke remains unvoiced, *i.e.*, -ḍ-ke > -ṭ-ke > -l-ke. The -ke which thus involves a change in the last consonant of the root is subsequently replaced by the later ending -i-ge (discussed above) which involves no such change, *i.e.*, M.K. nāḍ-in-ge, N.K. nāḍ-i-ge. This preservation of the unvoiced quality of the second consonant in the group, stop + stop, is paralleled by the development of ad-ke (see above). On the other hand, in the group, original continuant + unvoiced stop, the stop > voiced. *cf.* palarur-ge.

In the pl., the ending is added to the pluralising particle.

masc. -a stems :—mālākār-ar-gge.

This doubling probably presents an actual pronunciation, the syllable division being -arg-ge. Hence later grammarians treat this -gge as fleeting double consonant.¹

In the two forms (as already discussed) -iṁ- is inserted before this -ge :

baṭar-iṁ-ge, Kilgānabaṭar-iṁ-ge.

In N.K., the -ar-i-ge (< -ar-iṁ-ge) forms have ousted the ar-gge forms entirely.

Fem. No examples.

Neuter No examples.

1. SMD., 115.

The Genitive Case.

The terminations are -ā and -a. We have reason to suspect that -ā is more ancient than -a (cf. -ān and -ār in the nominative and -ān and -an in the acc.) The author of *Kavirājamarga* (9th century A.D. i.e. 877 A.D.), the earliest of the published works in ancient Kanarese, states that the -a of gen. may be lengthened optionally, when many nouns in the gen. are combined, or at the end of a line in verse.¹ But the earliest Kanarese grammar² says that -a or -ā may be used "yathēṣṭam". The Kanarese grammar of the 13th century A.D. states that some accept -ā in the gen. for expressing sorrow and excitement.³ *Bhaṭṭākaṣaṅka* of the 17th century A.D. says that -ā of the gen. may be lengthened optionally.⁴ Kittel and Caldwell think that "-ā is simply a euphonicallly lengthened -a."⁵ The origin of the -ā is at present unknown. The explanations given by these grammarians are attempts to get at the origin of -ā.

But in these inscriptions, no use of -ā for expressing sorrow or excitement is found. We cannot infer that the presence of the initial vowel of the next word leads to the lengthening of this -a, as all the words after the genitive -ā begin with m-, n-, ś- and s-. At the end of a line, or for purposes of metre, the -a is lengthened, some commentators say. But it is not unreasonable to suppose that in such cases -ā is used and not that -a is lengthened. There is no principle

1. KRM. II, 20.

2. KBB. 67.

3. SMD. 117 and 118.

4. KSS. 255.

5. KG. p. 53, Section 119. CDG. p. 297.

governing the distribution of -ā and -a in these inscriptions. . As already stated, the origin of this -ā is unknown.

Forms with -a are more in number in these inscriptions than those with -ā-

-ā	a
Maṅgaḷīśanā (578 A.D.)	kavili-y-a (675 A.D.)
Anḍugiyā, kādōrā (675 A.D.)	Vaḷḷirgāmeyar-a (685 A.D.)
Amaliyar-ā	} 685 A.D. Banavāsiya (692 A.D.)
Alamvaḷḷiyar-ā	
Nīrilliyā	
Vāgūrā	} 690 A.D. S'āntapana (692 A.D.)
Erevaḍigalā	
and the rest are of about 700 A.D.	and all the rest are of about 700 A.D.

In one and the same inscription, *e.g.*, Kp. 37 of 675 and Sk. 154 of 685 A.D. we find both -ā and -a forms. Of the -ā forms, except 15, all the rest are found in verse and a long vowel or guru is necessary in that place for purposes of metre.

(b) -in :— Kalbapp-in-a.

As already stated above, the origin of -in- is at present unknown.

The suffix -in- which is found in the genitive cases of stems ending in a consonant or -u is also found in the dative and the locative in the same position. In the dative, it is used in -a stems also after the gender suffix -an-, as in *kāl-an-i-ge* and *baṭar-im-ge* (see "The Dative Case"). The case-ending of the instrumental is in (*im*). (SMD. 108 & 109.) This -in- is found in Tamil as the genitive case-termination as in *ponnin-kuḍam* (or gold-vessel). According to Caldwell¹. -in was originally the locative case-sign, -il-here, a house, later generalised as a possessive case-sign². But we have no evidence to show that this was in Kan. a locative at first.

As for his statement that -in was originally a gen. ending in Kanarese as in Tamil and Mal. but it ceased to contribute to grammatical expression and then -a was used as the gen. ending,³ so far we have not been able to discover any such gen. form in Kanarese where -in is used as the case-ending. That the instrumental ending in Kan. is -in and that -in- is used as a suffix before the case-ending in the dative, the gen. and the loc. of stems ending in consonants, -u and sometimes in -a (only after the masc. or fem. gender suffix in the -a stems), are all that can be inferred from the facts before us.

Kittel⁴ gives in (*im*) as an adverb of time, meaning "from that time, afterwards" in his

1. C. D. G. P. 294.

2. Do 292.

3. Do 293.

4. K. G. P. 165.

grammar. But his dictionary does not give this expression at all. It is probable that this in (im) is an adverb, but used as a post-position in the instrumental case.

In the pl., the termination is affixed to the pluralising particle, as in the other cases :

Neuter -a. S'rī Saṅgaṅgaḷ-a.

-i. Rṣabhasēnaguruvaḍi-gaḷ-a, Kālāvirgguru-vaḍi-gaḷ-a, tammaḍigaḷ-a, Paṭṭinīguru-vaḍi-gaḷ-a.

Monīguruvaḍi-gaḷ-a.

-e. vidyullate-gaḷ-a.

There is one form, kiḷḷum (also of kiḷḷa) in kiḷḷum Nāgeṇṇan. kiḷḷum < kiḷḷa (of kiḷḷa)-um (also) probably.

The Locative Case.

The terminations are

-uḷ, -uḷa, -uḷḷe, -uḷḷē, -oḷ, -alli, -i, -ī, -e and -ē

The first form, i.e., -uḷ, -uḷa, -uḷḷe, and -uḷḷē are different forms of -uḷ. uḷ-a place, inside.

These -uḷ, -uḷa, -uḷḷe, -uḷḷē, -oḷ are not used independently in these inscriptions or in N° K°

√ul-to be > ol-when it is conjugated. See "olar" under verbs).

-alli is an adverb of place and means "there". It is used independently in O.K., M.K. and N.K. to mean "in that place" when it is used here as a post-position.

-i and -ī, -e and -ē are the same in meaning and the lengthening of -i and -e to -ī and -ē is due to metrical necessity.

There is no principle governing the use of any of these endings. -uḷa is used only in the prose inscriptions. The rest are used in the verses. -ol is more often used before vowels. It is not possible to state which is the earliest of these endings. -uḷ seems to be earlier and -ol is a later development.

-uḷ. (E.I. VI. p. 98; I.Ant.X. p. 39, No. 2, 11'68)

fem. no examples.

neuter: A. with suffix -d-:-

-a stems: lws. mahādantāgr-d-uḷ, mahāparūta-d-uḷ,
s'aila-d-uḷ, Vāraṇās'iva-d-uḷ.

Nw. veṭṭa-d-uḷ.

B. with suffix -in-:-

-u stems. lw. Kaḷvapp-in-uḷ.

As already stated under the genitive, the origin of -in- and why it is used in the -u stems are at present unknown.

C. with glide -y-

-i stems. gati-y-uḷ, dharāṇiy-uḷ (iravān)

D. There is a form Vāraṇāśi-ya-l-uḷ (in Benares)

This is the only form found. The significance of -l-is at present unknown.

-uḷa :- The exact significance of the -a in -uḷa is not known. It is probably the gen. of -uḷ, prithuvī rājya-d-uḷa standing for "of the inside of the kingdom of the earth." If it is the -a of the gen. after -uḷ, it may mean "of the inside of." The only example is prithuvīrājya-d-uḷa. The word after prithuvīrājya-d-uḷa is kige(ge)(Kp.39).

-uḷle.-uḷle uḷ-e. (-ḷ is doubled).

-e is the particle of emphasis.

uḷle-in the inside itself.

All the forms with -uḷle are found in the verses. There is no principle governing the use of -uḷle in these.

masc. & fem. No examples.

neuter. -a stems. Jaina-su-mārgga-d-uḷle. II 106'50.

nadirāṣṭra-d-uḷle (II. 84.) parvata-d-uḷle (II 114'57).

s'rīsaṃgha-d-uḷle (II. 106'05).

-uḷlē. The ē is due to the needs of metre.

masc. & fem. No examples.

Neuter -u stems. with suffix -in-

lw. uḍita S'rīkaḷvapp-in-uḷle (II. 84)

-oḷ.

masc. & Fem. No examples.

Neuter -a stems (with -d-) tīltha-d-oḷ, mārgga-d-oḷ, vana-d-oḷ, sanyāsanamyōga-d-oḷ.

-i. The origin of this termination is unknown. Perhaps it may have originated from the demonstrative base iv-this or this side. We have no evidence to prove this. It may be -in-, with the loss of the final nasal, (E.I.XIII p. 326 and p. 36.) where a final sonne is omitted at the end of the verses. Cf. the sonne at the end of verbs are omitted in later inscriptions.

masc. & fem. No examples.

neuter. -a stems (-d-)

lws. anēkagunaśīla-d-i, Koḷattūrsaṁgha-d-i, tirttha-d-i.

nw. nela-d-i.

-ī. In the only example in the neuter, lw: punyad-ī, the-ī is due to its position at the end of a line in verse.

-alli.

alli 'there' in O.K., M.K., and N.K. It is used independently in colloquial speech and literary compositions. This is a post-position suffixed to the gen. to denote the locative.

masc. & fem. No examples.

neuter. Vittidalli.

-e. -i and -e are interchanged in the early kāvyas, Skt. iḷā -Kan eḷe -earth. ikō and ekō-lo, behold this! It is probable that -e, the particle of emphasis was added to the loc. ending -i. Since the Mādhwas of Mysore and Dharwar reduce all -e to -i in colloquial speech, e.g., mane > mani, āne > āni, āṇe (anna) > āṇi, tale (head) > tali, it is possible that the -i and -e forms may be dialectical variations. e is used in place of i in āge (11 & 30), nilise (21), taṁge (32) aḍegaṁ (47) in E.I.XV. p. 26.

Masc. & fem. No examples.

Neuter- -a stems (-d-)

lws. mana-d-e, śubhāṁga-d-e.

-e. The lengthening of -e is due to the needs of metre. There is only one example.

lw. pañcapada-d-ē (dōṣaṁ nirāṣaṁ)

It may be noted that all the loc. forms in these inscriptions are in the sg. and in the neuter.

The Vocative Case.

There is one example of a lw. in the feminine.

bālē skt. bālā 'a girl' bāle in Kan.

The vocative is formed by the lengthening of the final vowel or by suffixing -e to the last syllable or by the use of the simple stem in N.K. Here it may be the first or the second or both in bāle. In Viparītā, -a is lengthened. The needs of metre in the verse where these are used, require a long vowel in the final syllable-

THE USE OF CASES.

The Nominative.

The nominative, as already stated, has no termination.

I. The simple stem or the stem with the gender suffix in the case of those ending in -a is used as the subject of a verb to express the doer of the action, denoted by the verb or the participle (K. B. B. 74.)

Subject of a verb :

(a) *The simple stem :* Naṣṭappa goṇḍu koṭṭan (8-29); Pegurama Suralōka vibhūti eydidār (24).

(b) *The stem with suffix.*—Candradēvācāryayanāman nōntu tan dēham ikki S'ivanile paḍedān (12-4).

Subject of a participle :

Carita s'rināma dheya prabhu ajnānas' ailēndramān pōḍu, Gandhebbha maydān meṭṭi, saukhyasthan āydān. (14-1 & 4). meṭṭi & pōḍu express the action of -prabhu; the nom. denotes the doer of the action.

But the nom. in the case of *intransitive* verbs, expresses the agent whose circumstances or condition are indicated by the intransitive verb.

Verb : Carita s'rināmadhēya prabhu saukhyasthan āydān. Here -prabhu is the nom. 'prabhu became happy.'

II. The gender suffix of the nom. is affixed only to adjectives ending in -a; such an adj. is in the nom. and qualifies the noun. in the nom. *e.g.* Carita s'rināmadhēyaprabhu.

Saukhyasthan āydān; Supaṇḍitan, nītisampannan; andhan.

III. The nominative is also used as an adverb *e.g.*, mēl, vōl, when preceded by the simple stem or

the noun in the genitive, *e.g.*, śikhimēl, bālāmēl, mañjuvōl, teravōl.

IV. The simple nominative denoting a period of time is used in an adverbial sense or in the sense of the locative: *e.g.*, irppattondudivasam, irelpattarulam, ondutiṅgaḷ, mūrutiṅgaḷ.

The Accusative.

The accusative expresses an object or person on which the action of the verb falls.

e.g., kaṭavapram ēriyē,
svarggāgramān ēridār,
meṭṭi gandhēbhamaydān,
S'āsanama goṇḍu koṭṭan

The stem, as already mentioned, takes the acc. ending after the gender suffix in the case of -a stems or after the glide -y- in -i and -e stems and -v in -u stems. The acc. termination is of a later origin. The copulative particle -um is added to case-endings in all the five cases excepting acc. where it comes between the stem and the suffix. (Here it is to be remembered that this -um is not added to the genitive). The acc. and the nom. seem to have been the same in form at first (SMD. 136). In these inscriptions, the endings -ān, -an and -a are used in almost all forms of the acc. But this is most artificial. Even in N. K. colloquial speech, the acc. has no termination, *e.g.*, *Mane* kaṭṭida 'he built a house. *mane* biddubōyitu, 'the house collapsed.' The nom. is used, in these, but the meaning is accusative. Further, the use of the accusative without the case-ending before a verb has been treated as kriyasamāsa or verbal compound by the later grammarians. There is no necessity for such composition as the N.K. colloquial speech

amply testifies. *e.g.*, mane cennāgi kaṭṭida. 'he built the house well.' tiṇḍi tumbā tirinda. 'he ate too much of eatables.' In these cases, the adv. comes in between the object and the verb. Even here the obj. has no case termination. Further, the noun is used as the acc. without any change in the case of inanimate objects. *e.g.*, hāvu hoḍedubāku, "kill the snake" kallū takkō 'take the stone also,' kāl kaṭṭu. 'tie the feet'. Here we find no -ān, -an or -a of the acc. But in the case of animate beings, the case-endings are added. *e.g.*, Rāmanna kare 'call Rāma.' Here -an and -a are used as gender suffix and case-termination respectively in the N.K. colloq. speech. But in these inscriptions also the following nom. forms are some of those used in the acc. sense:

S'ivanile paḍedan, Suralōka vibhūti eydidār. samādhi neredōn, iḍāl manam. Even in ancient kāvyas, this use of Nom. for the acc. was common *e.g.*, ellarum mātaviyar, where matu 'words, speech' is in the acc. though nom. in form.

The dative is used often in place of the acc.:-

svarggāgvamān ēridār and svaraggālayakke ēridār (Sind. 136). The acc. is used as the nom. in Kaṭantūr-an-am (21-3) probably the -an-am may be a repetition of the -an-a suffix as in the inst. inb-in-in & Vibhavasthanan.

The Instrumental.

The instrumental case is used to denote.:

- (1) *The instrument or the means or the manner*: inbinin, guṇadiṁ, bhaktiyim, yugmadin, S'iladiṁ;

(This use of the instrumental may be treated as a kriyāviśēṣana).

(2) *a special mark or quality* : tapadin adhikan.
and (3) *association* : e.g., anēka s'ilaguṇamāle gaḷin
sagidu oppidon.

The case endings of the inst. are -im, in, -inda
and -inde. But this instrumental case ending has
become a general suffix of the dative, the gen. and
the loc. e.g., baṭariṅge (dat.), Kalvappinā (gen.)
Kalvappinuḷ (loc.)

The stems ending in -u and in consonants take
this suffix. From a study of the medieval inscriptions,
it is seen that the use of the -in- suffix in the dative,
the gen. and the loc. are later and that the addition
of the terminations direct to the stem was earlier.
rupol and rupinol, bāloḷ and bālinol. Further, even in
an example of the instrumental, inb-in-in, -in is used
as the suffix before the instr. ending -in-. This
suggests that the use of -in- as a suffix had already
begun in the 7th century. The dative kālanige
shows that this -in was already in use in -a stems
also. (See Dative case under "Nouns)."

The Dative.

The dative expresses—

(1) The person or place to whom or which
something is given :

eraḍumñālke, kālanige, Kilgabataṭariṅge, Dē-
vereyage, mālakārargge, Laṁjigēsaramdēvarke.

(2) The place or position towards which one
moves :

naragakke salge, Svarggālayakke ēridār.

The dat. is sometimes used in place of the
acc.

e.g., svarggālayakkēridār and svarggāgramāṇēridar,

N.B.—THERE IS NO ABLATIVE FORM.

The Genitive.

The genitive is used to express the relation (saibandha) of objects or persons:

Of Persons:—*guruvaḍigaḷā s'iṣya. mōni guruvara s'iṣya, taminaḍigala s'iṣyam.*

Of Places:—*Tarekāḍa, Namilūra, Malanūrā, Vāgūrā, Veḷmāḍadā, saṁghadā.*

of Objects:—*kalapakada, bālāmēl, modeya.*

In Pr.K., the nom. was probably used in the gen. sense. In *s'ikhimēl* and *kalvappabeṭṭammēl*, the gen. termination is not used, but the nom. expresses the meaning of the genitive. This is quite common in N.K. colloq. speech. With reference to animate and inanimate beings and objects:—*e.g.*, animate: *Raman pustaka, Kamale pustaka.*

inanimate: *Nāyitaleṁēlinbutti.* the bundle of foodstuffs on the head of the dog. *Nāyi* is the nom. form,

Nāyibāla neṭṭagaḡōlla—“the tail of a dog never becomes straight.”

objects: *Maneṁṛēle gūbe kūṭide.* “The owl is sitting on the top of the house.” Here *mane* is the nom. form.

Later grammarians explain this as *śaṣṭhī tatpuruṣa* compound. But this is explaining a Kanarese form in the light of the Skt. idiom.

Further, the oblique bases of the 1st pers. and of the reflexive pronoun are used in these inscriptions as forms in the genitive case:—

(1) *tan dēham ikki*—sacrificing or abandoning his own body.

(2) *āyuṣyam en*—the length of my life.

(3) nam Mauniyācāriyar-our guru, Mauniyācāriyar by name.

This use of pronominal oblique bases is found in Tamil also, *e.g.*, en viṭu 'my house', en kācu 'my money.'

These lead us to conclude the nom. was used as the acc. (already stated above) and also as the gen.

The rules on Vibhakti pallāṭa or thezinter-change of cases in the later grammars state that the gen. stands for the nom. *e.g.*, nṛpanapēle. (S.M.D. 134). J.R.A.S. 1918 P. 105. This shows that the nom. and the gen. were interchangeable.

The Locative.

The loc. is used to denote the relation to a place, such as a mountain, a kingdom, or a holy place.

Kaḷvappinūḷ, nadirāṣṭraduḷḷe, parvataduḷḷe, pṛthivīrāṣṭraduḷḷe, veṭṭaduḷ, Vāraṇāsivadūḷ, Sṛisamghaduḷḷe.

The locative is used in the sense of the instrumental *e.g.*, S'rīsamghadā puṇyadī, where it means puṇyadimda, anēka śīla guṇadī (58-1). There is reason to suspect that the loc. ending -i or -ī in puṇyadī is the instr. ending with the loss of the final nasal as in O.K. ūm > N.K. ū.

The interchange of the locative and the instrumental and the use of the nom. as the locative (see nom. used as an adv.) and the use of so many terminations and post-positions in the locative clearly show that the locative is later in origin than the instrumental. In later grammars, even the dative and the genitive are used in place of the locative, *e.g.*,

cāgigaloḷ (loc) ballaham;

cāgigala ballaham;

mūrudivasakke bandam
to mean mūrudivasadoḷ bandam.

All these show that the loc. is a later development.

The Vocative.

The vocative is used to invite or direct the attention of the person addressed to one's self or to another person or object.

The examples in these inscriptions are bālē keḷ-
‘Oh, girl!’ listen.” and Kaliyuga viparītā.

ADJECTIVES.

Adjectives in these inscriptions are words denoting quality or quantity. They are used to qualify nouns. They do not change in gender, number or case according to the gender, number or case of the nouns they qualify. Loan words from Skt. are used as adjectives; these take the gender suffix -an and -ār in the masculine, if they end in -a. Declinable participles, numerals and pronouns are used as adjs.

Adjs. are used attributively and predicatively. If the adjective is used attributively, the adj. precedes the noun it qualifies. In the predicative use, it comes after the noun it qualifies and agrees in number and gender with its substantive.

In N. K. the adj. used attributively remains unchanged, whatever the number, the gender or the case of the noun it qualifies. But, when used predicatively, it agrees with the substantive it qualifies in gender and number. The same distinction is preserved in colloquial speech also.

A. Native Kanarese Adjectives.

These are only four in number :-nal, per, vel, ini-
nal-Good :- nal giri, nal tapa.

per- big, great :- per goravam; (with the suffix -cu
per (< *pel*) is used as a verb: *pelcu*ge 'may it increase.')

per before consonants is used as it is. *e.g.*, *perg*-
goravam. But before a word or suffix with an initial vowel, *per* > *pēr*.* The only example is *pēriyā* -big (Fleet). But Rice reads it as *periyā*. This lengthening of the e in *per* before vowels is found in

Tamil also. *e.g.*, pēr-āl, pēralagu, pēr-arivu, pēr-ilavu, pēr-inpam. Later Kan. Grammarians have noticed this point: (KBB. 138, KVV. 50; SMD. 180: KSS. 335 and 336). The reason for this change is unknown. Probably, pēr is the original Pr. Kan. form and per. the later development (cf. -ār & ar. nom. -ān and-an acc).

veḷ 'white', *Veḷgoḷa*, *Veḷmāḍada*. N.K. has *beḷ* and also *biḷupu*.

ini-this .- *initu* (this much)

inibar (these, so many)

There is another OK. adj. *oḷ*, but it is not found as an adj. but in a noun *oltu* from *oḷ* 'good.'

nalta 'goodness' is a noun derived from the adj. *nal*, 'good', in *Naltada*.

B. Loan words from Skt.

Lws. are used as adjs. All these nouns except one, used as adjs., end in -a and that all of them except four, have the masc. gender suffix -an in the sg. and -ar or -ār in the pl., like the substantives in the nom. sg. and pl.

(a) *with masc. gender suffix -an*: *adhikan*, *andhan*, *anavadyan*, *urusatvan*, *natasam̐yatātman*, *niravadyan*, *nītisam̐pānan*, *pancamahāpātaka sam̐yuktan*, *mahātavan*, *mahādēvan*, *muniṣungavan*, *vinayācāra-prabhāvan*, *śrījīnamārggan*, *sādhugaḷpūjyamānan*, *siddhisthan*, *supaṇḍitan*, *saukhyasthan*.

In Telugu¹. tatsama adjs. are generally nouns-meaning that they take the gender-suffix. The examples given in the Telugu grammar end in -a.

1. Telugu Grammar by B. Pāpayya Sastry (1927) Page 42.

In N.K. when an adj. is used predicatively, the adj. comes after the noun and takes the pronominal termination of the gender and the number of the noun it qualifies. Here the following adjs. are used predicatively.

pancamahā patākasaṁyuktan, siddhisthan,
suralōkamāhā vibhavasthanan, saukhyasthan.

In the other instances, they are presumably used attributively. The -an and -ār are suffixed to these loan words, perhaps, on the analogy of the usage in Skt. where adjs. take the gender and the number of the noun they qualify.

[There is one form, suralōka mahāvibhavasthanan, where -an is repeated twice, -an-an, as in the instrumental case of inbinin; the original -an may have lost its significance, and then, -an may have been added again. This is a solitary example.]

(b) with pl. suffix -ar.

-a stems : rāgadvēṣatamōmala vyapagatar, śuddhātma-

Samyōddhakar, svabhāvasoundariya karāṅgar.

-i. stem : paramaprabhāvariṣiyar.

(c) with pl. suffix -ār.

-a stems : aninditār, prathitār.

All these -ar and -ār forms are in the honorific plural.

(d) *Feminine*. No examples.

(e) *Neuter*.

-a stem : sg. with suffix -d : anēkaguṇa-d-ā.

C. Declinable participles used as Adjs.

(a) Past Participles :

āda, enva, koṭṭa, konda, pēḍa, podeda, māḍi-
sdiā, sanda.

(b) Future :

iruva, keḍisuva.

There are no relative pronouns in Kanarese. To some of the relative participles, which are adjs. -an, -on and -om are suffixed when they are used as substantives in the masc. sg. and ōr in the pl.

masc. sg. -an :

Nw. nilladan.

masc. sg. -ōn :

Nws. alivon, alidon, ettikolvōn, oppidon, kādōn, keyvon, salvon.

lw.: Pertvāṇavaras' adon.

masc. sg. -om :

lw: pālisidom.

masc. pl. -ōr :

Nws. alivōr, uṇvōr, kādōr, koḍuvōr, kolvor, nenevōr, palcidōr.

According to some, -on and om are essentially the same as -an and -am of the nom. sg.¹ (See under nom.) This -ōn is only a variant of -an according to Kittel.² Caldwell thinks that -ān or -ōn is a contraction of avan.¹

K. V. Subbaiya³ explains that the original -ān (3rd sg. termination masc. of verbs) has developed into -ōn through the labial final -m and he supports his statement from the pronunciation of Toḍa -ām as (ᳵ: M.)

According to later grammarians,⁴ O. K. final -a > -o and the examples given are āvam > āvom;

1. C.D.G. p. 225.

2. K.G. p. 47 "āvam appears also as āvom' āvanam appears also as āvonam."

3. DS. Part II, p. 34.

4. SMD. 157.

nuḍidaṁ > nuḍidoṁ; pāḍidaṁ > pāḍidoṁ. But āvaṁ < āvavaṁ, which naturally > āvoṁ (ava > o).

Since these -on forms are found in the inscriptions of different and distant parts (so far made available), it is not possible to assume that the -an and the -on forms are dialectical variations.

The gradual decrease in the number of -on and the -or forms in the inscriptions and their replacement by -ar and -avar forms can be seen from the following list:—

keyvor	(I. Ant. X 61)	C. 700 A.D.
keṭṭodu	do	C. 700 "
aḷivon	(E.C. VII. Sk. 45)	C. 890 "
meccidor („ Mandya 41)	949 "
koḷvōn	(E.C. Belur 123)	952 "
ereyoṁ	(E.C. III TN. 69)	C. 980 "
puṭṭidoṁ	(do)	„ "
aḷidaṁ	(SK. 126, 1'25)	1019 "
aḷidavaṁ	(SK. 118, 1'77)	1054 "
aḷidan	(SK. 170, 1'26)	1065 "
aḷidavan	(SK. 124, 1'50)	1077 "
aḷidargge	(SC. 178, 1'25)	1092 "
pratipālisidargge	(SK. 178 L. 24)	„ "
aḷipaṁge	(SK. 94, 1'38)	1094 "
aḷidavan	(SK. 114, 1'53)	1096 "
pratipālisidavan	(SK. 114, 1'51)	1096 "
aḷidavaṁ	(SK. 87, 1'13)	1131 "
aḷidan	(SK. 103, 1'46)	1149 "
aḷidavan	(SC. 92, 1'46)	1168 "
paripālisidātaṁ	(SK. 92, 1'44)	1168 "
aḷivaṁge	(SK. 105, 1'65)	1193 "
pratipālisidaṁge	(SK. 105, 1'64)	1193 "

The appearance of these -on and -or forms only up to the 11th century A.D. and that, too, with -on

and -or suffixed to declinable past or present participles only, leads us to assume the following :—

Pr. Kan.	O.K.	M.K.	N.K.
1.* -an	-an	-an-(u)	-an-u
2.* avan	avan	avan (u)	avan-u
3.* -avan	-on	-an -an (-u)	-an-u

- (1) Pr. Kan. *-an was O.K. -an, M.K. -an, N.K. -an.

This -an is used throughout in all the different stages of the language : aḷidan, aḷidan, aḷidanu.

(2) Similarly -avan is used : O.K. aḷipidavan, M.K. aḷihidavanu, N.K. aḷisidavanu.

(3) But O.K. -avan was used as -ōn in the O.K. period. In M.K. it was replaced by -an, -anu (No. 1) in M.K. and in N.K. -anu is still in use (by old people.)

The pronoun avan is again used as gender suffix.

In colloquial N.K. speech, avan, avanu > -onu.

In the case of pertvāṇavamśadon < pertvāṇavamś'ada + avan, it is an analogical formation.

Fem. No examples.

Neuter : -udu is suffixed to relative past participles in the Neuter to make them adjectival substantives.

ittodu, mikkudān.

In ittodu, -u > -o-. This change of u to o is fairly common. The following examples are from the Dictionaries :—

uḷ > oḷ	to be
uy > oy	to carry

kuy>koy	to pluck
kuḍu>koḍu	to give
kulime>kolime,	the furnace of the black-smith.
pudi>pode	to cover.

The following illustrations are from the inscriptions :

- uṇboḍu (19) E.C. III Sr. 134.
- komārasēnabhaṭārar (13) E.C. III Sr. 147.
- Kovaḷāla-pura (3) E.C. IV K1. 51.
- kuvaḷāla E.C. VII Sh. 24.
- Beḷugulaṭirtthada (20) E.C. II, 334.
- Beḷgoḷa (M.K.) E.C. II 336 and 347.
- Kuḍuvantarādar E.C. I, 39.

The conditions under which these Nws. and Lws. change the -u- to -o- are unknown. Probably this is a dialectical variation, depending on the openness of the u pronunciation.

In Capal-illā, Navilūrusaṁghada Mahanantāma-tīgantiyār, capal-illā is an adj. or an adj. phrase. To say that capal-illā is used in place of capalillāda for the needs of metre is not satisfactory. Cf. il-i in bahuṇrihi compds.

- nāṇili, Pallili.
- il=not. SMD. 186.
- kuli-killer<kul.

In Tamil, illā is used as an adj. illākkuḍi 'the poor family' illār, 'the poor,' illāmai 'poverty', where -mai is a suffix for forming abstract nouns.

kāpāmun (before it has not been seen).

maraṁgal paruvattāl anrippaḷā 'trees do not produce fruit except in the season 'where -ā 'not' is at the end of paḷ-ā (T.H. Article 112).

In the same verse wherein *capal-illā* occurs, *upamillā* is used. All these point to the fact that *illā* was used as a negative adj. to mean 'not, not having.' So *capal-illā*-, not having temptations, firm-minded.

In later *kāvyas* we find *-il* used as an adj.

Phalavadēnil 'there is no fruit (effect)'.

Kittel says that 'il is an unusual abbreviation of *illa-no*, is not; *il-a* defective verb of which only some forms of the negative mood are found'

In Kan. the negative suffix is *-ā* cf. *veḷeyāde āgā, āga, āgaḍu tappāde*.¹ This *-ā* is suffixed to the defective vb. *il*. Hence *illā -no*, not, as in T.

In *kare-il*, we have the same adj. phrase implying 'stainless.' Thus we see *il* and *illā* used as adjs. in these inscriptions.

D. Declinable past or future participles of the verb "to be" suffixed to substantives or verbal participles :

(a) Declinable future participle. *appa* -from $\sqrt{\text{agu}}$ - to become.

(1) *anupamādivya*². *-(m)- appaḍu*- Here *appa* is suffixed to the substantive *anupamādivya*. *anupamādivyamappa* is an adj. *adu* is added to make this an adj. with two adjectival suffixes; *adu*, (neuter 3rd pronoun), when suffixed to a substantive, makes it an adj.³

(2) Instead of *āda, āgi* (having become) together with the decl. pp. of *ir* - to be, is used.

bhadramāgi i (d) da — that was strong, well-established.

This usage is still very common in N.K.

1. KSS. 584.

2. Rice has inserted this *-m*.

3. C.D.G. p. 290.

(3) *iruva* - declinable future participle of *iru* - to be.

pūni-past verbal participle + *iruva*-*pūni*-*iruva* - that have promised.

This usage also is still very common in N.K.

(b) Declinable past participle :—

-*āda* < *āgu* - to become

This -*da* is put after a verbal past participle :
neredu (pp. of *nere*-to become perfect or full) -
āda-*neredā*-that had become perfect.

E. Numeral Adjectives.

(a) Numerals are placed before substantives and as adjectives :—

irppatondū divasam, īrelpattarulam, eraḍum nālke, omdu tingal, omdu sanmāraggaḍin, nurenṭu samvatsaram, pattupona, pañcamahāpātakasam yuktaṇ, mūrutiṅgal, mūrudegulaṁ, mūvetmūrādē-vejanam, sāsirakavileyum.

(b) The ordinal, formed from the cardinal by suffixing -*aneya*, is used as an adj. in only one example : *ēlaneya* (seventh) from *ēlu*-seven.

-*aneya* < *ane*-*a* < *an*-to say.?

aneya 'when it says.' Kittel's¹ remark that the -*a* of -*aneya* is the gen. case-termination and also the termination suffixed to verbal participles to convert them to relative participles is not very clear.

F. Skt. loan words in the nom. are used as adjectives e.g.

(1) *amalam naltada s'iladim. amalam* adj. qualifies *Śiladim* after *naltada*, but the -*am* of *amalam* is retained probably for metrical length.

1. K.G. p. 169 Remark 2.

(2) In *sādhugaḥ pūjyamānaḥ*, the pluralising particle *-gaḥ* is retained in the compd. for metrical length, though *Sādhusaṃpūjya* - would have been quite suitable there.

(3) In '*suravidyāvallabhēndrāsuravara munibhistutya kaḥbappināmē*' the nom. pl. termination in '*vallabhēndrās*' and the instrumental termination in '*suravara munibhiḥ*' are retained to qualify '*stutyakaḥbappināmē*.' This is not usual and shows that the grammatical usages were subordinated to the needs of metre by those steeped in Skt. learning.

G. Substantives are used as adjs.

arddha-visadi and *muninvratagaḥ* - in these, *arddha-*, *muni-* are substantives used as adjs. This is effected by placing the substantive before the one which it is to qualify. Caldwell has pointed out that any substantive denoting quality or relation can be used as an adj. by being placed before another substantive - *i.e.*, by mere position alone.¹ Such a usage is even now very common in colloquial Kanares. *e.g.*, *maradimbu* - a wooden pillow.²

In some places, the adjectives are placed not immediately before the substantive they qualify, but before another substantive which comes in between the adj. and the substantive qualified by the adj. The two -adj. and subst.- are real adjectival phrases:

(1) *amita s'rī Saṃghadā puṇyadī*.

(2) *capal-illā-Navilūra saṃghada Mahānantāmatlgantiyār*.

In (1) "*amita*" qualifies "*puṇyadī*" "*-unlimited puṇya*, and not unlimited *s'rīsaṃgha*.

1. C.D.G. p. 309.

In (2) *capal-illā* refers to “*Mahānantāmatīgan-tiyār*, and not to *Navilūrasaṁghada*.

The word that intrudes between the adj. and the substantive is a noun in the genitive case in both the examples. It is clear that these unusual forms are due to the needs of metre.

H. Pronominal Adjectives.

(See p. 178-179.)

Predicative use of adjectives.

As already stated, the adj. comes after the noun when used predicatively and then it agrees with the substantive in gender and number.

pañcamabāpātakasaṁyuktan, *Siddhisthan*, *suralōka mahāvibhavasthanan*, *saukhyasthan*.

This usage is still very common in literary composition and colloquial speech.

Later grammarians say that cases like the following are compounds:—

kare-il naltapa dharmmadā, *nalgiri*.

Here there is no *Samāsabhāva* or *ēkārthībhāva*. There is no necessity to assume these to be compounds, as these adjs. even when placed apart, give the same meaning.

PRONOUNS.

Personal, reflexive, demonstrative and interrogative pronouns are found.

All these are declined in the same way as nouns and have the same case-terminations in the sg. and the pl.

The pronouns of the first and the second person and the reflexive pronouns do not change for gender, their gender being the same as that of the nouns in place of which they are used. The oblique bases of these are not the same as the nom. in form. The oblique bases of the first person and the reflexive pronoun are used as pronouns in the gen. case.

The pronoun of the third person is the same as for the remote demonstrative pronoun.

The demonstrative pronouns have different forms in the masc. and the neuter. There is no example for feminine.

Only the masc. pl. and the neuter nom. sg. of the interrogative pronoun are found.

A. Personal pronouns.

A. The first person—

	sg.	pl.
nom.	ān	-
dat.	enage	namage
gen.		emma, nammā, nam.

In the sg. both the examples have -n: ān, enage; in the pl. all the examples have -m-; namage, emma, nam, nammā. The oblique base in the sg. is en-and in the pl. it is em.¹ The terminations of verbs is -en in the sg. and -em in the pl.

1. KBB. 94.

ಧ್ವನಿಹೋನೃತ್ಯಮ್,

The Nom. sg. is ān, with an initial long back vowel, but the dative has a short palatal vowel.

There is an initial n- in the dative and the gen. of the pronoun of the 1st person in the plural: namage, namnā and nan. The origin of this n- is unknown. K. V. Subbaiya¹ and Caldwell tried to explain the origin of this n-. They are not satisfactory. The explanation of the prothetic n is introduced by L. V. R. Iyer.² But the commentator on KSS.³ says that a few famous poets of the Northern⁴ School of Kanarese accept nan- and nam- as the oblique base of the 1st person, while the southern school is in favour of en, only. cf. Tel. nēnu- I. This shows that nan is a dialectical variation of en, and that en of the Southern School, which has correspondences in other languages is the earlier of the two.

The earliest Kan. Grammarian Nagavarma⁵ States that en, nin, tan, become ān, nīn and tān in the nom. The reason for this differentiation is unknown at present.

I think that ān is the Pr. Kan. base of the first person and that it is the emphatic form, as the nominatives of pronouns are rarely used in colloquial speech except it be for emphasis.

The dative sg. is enage and the pl. is Namage. The reason for the use of n- in the pl. form, namage, is not known at present. In NK., we have nanage in

1. Dravidic studies Part II p. 21; CDG. pp. 364-370.

2. I. Ant. 1929.

3. KSS. p. 263 Commentary on S. 288.

4. KVV. III. 1, KRM. II. 51-55 and 101-108 KC. II. Introdr. p. 16 and p. 27.

5. KBB 92; KVV. 36, SMD. 146, KSS. 287, 288,

the sg. and namage in the pl.; in colloquial speech, it is namge and namage.

B. The second person.

There are only two forms and those too in the nom.

sg.	pl.
nīn	nīm.

We have no examples of the other cases.

C. The third person.

As already stated, demonstrative pronouns implying remoteness are used as pronouns of the third person (see "Demonstrative pronouns").

The examples are :

	sg.	pl.
masc. nom.	-	avar.
gen.	-	avar-ā.
Fem.	no examples	
	sg.	pl.
Neuter nom.	adu	-
acc.	adān, ada.	-
dat.	adarke, adakke	-

The reflexive pronoun.

The examples are :—

	sg.	pl.
nom.	tān.	tām
dat.	tanage	tamage
gen.	tan.	-

As in the pronouns of the first person, the nom. sg. and pl. have the long vowel -ā- and the dative and the gen. have a short -a-. The sg. has -n- and -n- and the pl. has -m and -m-, like the pronouns of the 1st and the 2nd persons.

The dative sg. and pl. of the 1st and the 2nd person and of the reflexive pronoun have -a- before the case-ending. -ge is the dative ending of the nouns. This -a- between the base and the ending may have been -an- originally and later -a- as -in->-i- in Kālanige (see "The Dative Case") <kālan-in-ge. But nanaṅge and tanaṅge are not found either in the inscriptions or kāvyas. In N. K. the dative forms are naṅge and taṅge in colloquial speech < nauage and tanage respectively - the literary forms.

The oblique bases of the pronoun of the 1st person and the reflexive pronoun are used as pronouns in the gen. case.

1st. pr. nam mauniyācāriyar

Ref. pr. tan dēhamikki.

The Demonstrative Pronouns.

Remote and proximate demonstrative pronouns are found. As already stated, these have two genders.

(a) *The remote demonstrative pronoun :*

		sg.	pl.
masc.	nom.	-	avar
	gen.	-	avar-ā
fem.	No. examples.		
Neuter nom.		adu	
	acc.	adān, ada	
	dat.	adarkke. adakke.	

(b) *The proximate demonstrative pronoun :*

Masc.	nom.	ivan	
	honorific sg.	ita	-
SMD. 150 <idu.		(KBB. 97 ದೀರ್ಘಸ್ತುಕಯೋಃ.)	

Fem. no examples.

Neuter. nom.	idu	no examples
acc.	idān, idam	
dat.	idake	
loc.	idaruḷ.	

peran and pelan 'another' is a demonstrative in the nom. sg. where -an is the masc. gen. suffix. The stem is pera < pela (cf poragu, adv.) This is not in use in N.K., but is replaced by horaginava-. (SMD. 152).

ellamān is a pronoun meaning all (together, (SMD. 151.) This is acc. sg. with the conjunctive particle -am-. (See the "Use of Cases" for the appearance of the conjunctive particle between the stem and the case-termination.) This is in use in N.K. as ellā and ella.

initu (inisu) 'a little', 'this much.' This is used as a dem. pronoun denoting quantity.

The Interrogative Pronouns.

There are two forms in the pl.

masc. nom.	ār-urñ
dat.	ārgg-am
neut nom.	ēn. (SMD 112.)

-urñ and -am are conjunctions (see Conjunctions.)

In N.K. we have yāru for O.K. ār.

The neuter nom. sg. is ēn 'what' (61-9).

There is no relative pronoun in old Kanarese.-- The declinable participle is used in a way. alid-on narakakke salge, 'may he who destroys go to hell.' But about the 10th Century the use of the interrogative pronoun with the demonstrative pronoun as Skt. yat, tat is found.

1. "s' rī purusa mahārājana dattiyanāvanor-banaḷidom Bāṇarāsiyūm sāsirbbar Brāhmaṇarūm sāsirakavileyuman alida pañcamahāpātakan akkum.

2. idanārorbba kādar avargge piridu punyam (II-15-17). E.C. I. 74 (910 A.D.)

In the first sentence, āvon 'whoever' and in the second ārorbba 'whoever.' The combination of the inter. and the demon. to express this type of meaning is very common in colloquial N.K.

The personal terminations of verbs found in these inscriptions are :

	sg.	pl.
I person	-en	-
II person	-	-
III masc.	- ān, -an, -am	-ār, -ar
fem.	-āḷ, -aḷ	-ār, -ar
Neuter	-	-avu

en- is the oblique base of the first person. The 3rd neuter pl. is avu. This is the Neuter pl. termination of verbs.

Pronominal Adjectives.

The demonstrative ī and ā are the pronominal adjs. found.

ī and ā precede the nouns they qualify and do not change for number and gender.

ī-this (or these) and ā-that (or those).

ī: īdharāṇiyuḷ, īnittadharṃmamān, īparvata-duḷḷe, īpujyāsthalamān, ībhavavit, īnariyādeyan, īmūvetmūrādēvejanam.

ā: ā Kaḷam̐tūranam.

Later grammarians¹ state that ī and ā are the pronouns that are substituted for idu and adu respectively. The ā and ī are different words having

1. SMD. 78 and 138.

the same meaning and derived from the same pronominal base (from iv- av-). The Pr. Kan. pronominal base of these are at present unknown, though Tol kappiyam says that they are av- and iv-¹

Numerals.

Numerals are declined as Neuter Nouns; appellative nouns of Number in the masc. gender are formed by suffixing -vv- an in the sg. and -vv- ar in the pl. to the short forms of Numerals.

Numerals are also used as adjectives by prefixing the Numeral to the Noun it qualifies. The Numerals, so prefixed, change the nature of their vowels and become short in form.

Compound numbers are formed by multiplication and addition: Multiplication, when ten or a hundred is the second member of the compound; addition when any one of the Numerals from one to nine is the second member. Hence the numeral system is decimal.

There is no native word for one thousand. *sāsira*. is a lw. from Skt.

The following numerals are found:—

nws: om̄du (1) eraḍu (2), mūru (3), aydu (5) ēlu, (7) eṇṭu (8) pattu (10) irppattu (20) eḷpattu (70), nūr (100).

lws. pañca- (5), dvādas'ada (12), Sāsira (1000).

nws. irppatthondu (21), mūvettumūrā (33), nūreṇṭu (108), ireḷpattu (140), ēlnūr (700).

The origin of the Kan. numerals is unknown at present.² They are very nearly the same as those in Tamil, Malayalam, Telugu and Tulu.

1. Dravidic Studies Part I. Page 3. This is a criticism of Caldwells' theory (C.D.G.) p. 422.

2. Kittel, 1. Ant. II, p. 24; CDG. p. 331-343.

The numerals from one to ten excepting *mūru*, *āru* and *ēl* have the suffix -tu, -du or -ḍu in the end. These are but various forms of -tu; this is a very common neuter noun formative.¹ cf. *oltu* (see Adjectives). Even in *māru*, *āru*, *ēl*, -r- is derived from Prn. Dr. * *t-*; and -l- is, in O. Kan. derived from -ḍ-.

In their shortened form, *ondu* is found as *ōr* *eraḍu* as *ir*; *mūru* as *mū*; *āru* as *ar*; *ēl* as *el*.

Compound Numbers.

As already stated, compound numbers are formed by multiplication and addition :

1. *Multiplication*: When ten or hundred is the Second Member of the compound :

ir pattu (2×10) 'twenty'

mū vettu (3×10) 'thirty'

ēl nūr (7×100) 'seven hundred'.

2. *Addition*: When any one of the numerals from one to nine is to be added to multiples of ten :

irppattondu - ($20+1$)

mūvettumūru - ($30+3$)

nūreṇṭu - ($100+8$).

There is no native word for a thousand: *Sāsira*, from Skt. *Sahasra*, is used.

The following show the numerals, referred to above, used as adjectives :

nws. *irppattondu-divasam*, *irēlpatt-arulam*, *oindu-tiṅgal*, *ōrsiddhiyān*, *nūreṇṭu-samvatsaram*, *pattupona*, *mūrutiṅgal*, *mūru-dēgulamān*, *mūvettumūrā dēvejanam*, *mūvetmūra mīselmiḍeyum*.

lws. *pañcamahāpātakan*, *sāsira-kavileyam*.

In *omdutingal* and *omdusanmārgadin*, *ondu*, the Neuter noun, is used as the Numeral adjective, being prefixed to another noun. In *orumuniyindal* and *ōrsiddhiyan*, *oru* and *ōr* have been used as adjective forms of *omdu*. *ōr* has been pointed out above as the root from which *omdu* is derived. In the remaining cases, the neuter nouns, *nūreṇṭu*, *pattu*, *mūru*-, *mūvettumūru*, are used as adjectives by prefixing them to nouns they are to qualify. In *mūvettumūrā-mūvettu-30*. But in *mūvetmūra* we have only *mūvet*-denoting 30. The latter is the colloquial form in N.K.

Caldwell¹ is right in thinking that the numeral adjectives which are employed in compound numbers exhibit the numerals "in their briefest, purest and most ancient shape."

Appellative Nouns of Number.

The following appellative nouns of number are found:

Nws. *ēlnūrvvarain*, *orvvan*, *ōrvvan*,
lw. *sāsirvvar*.

As already stated above, these appellative nouns of number in the masc. gender are formed by the affixing of *-an* in sg. and *-ar* in the plural, to the adj. forms of these numerals, with the suffix *-vv-* in between the numeral adj. and the *-an* or *-ar*.

sg. *or-vv-an* = one man.
 ōr-vv-an = one man.

The lack of differentiation between short and long vowels is sometimes responsible for the appearance of these two forms. Pl: *nw. ēlnūr-vv-ar-am* (acc.)

1. CDG, p. 322.

=ēlnūrvvaram- the 700 people.
lw. sāsir-vv-ar =sāsirvvar (one thousand people.)

Ordinal Numeral (Adj.)

-el-seven, has its ordinal form ēlaneya.

This -aneya does not change for gender. The origin of this -aneya is discussed under "Numeral Adjectives."

Derivative Nouns.

In these inscriptions, a few nouns are formed from verbal roots and nouns, by the addition of Suffixes. These derivative nouns are declined as all the other primary nouns (see 'formation of nominal stems' under 'Nouns').

A. Nouns from Verbal Roots.

A list of such derivatives is given under "Verbal Derivatives" under 'Verbs.'

B. Nouns formed from Other Nouns.

These Nouns are derived from primary nouns to denote residence in a place, the trade or occupation to which a person has devoted himself, the sex of the person, and the possession of something by a person.

The suffixes are added to Nws. and lws. alike:

(a) Nws:

masc. suffix -an: Kaḷantūr-an-am (him of Kaḷan tūr.)

-an, added to -a stems, (See 'Declension of Nouns') -an is suffixed to the name of a place ending

in a consonant to denote a man of the place; cf T. ūr-ān. Tel. ūra-vāḍu.

(b) Lws:

masc.

(a) Kan. suffix: 1 aḍi. used in the sense of an attendant. dāsaḍi 'an attendant of the dāsas, a head of the guild of dāsas.' dēvaḍi 'an attendant on the idol in the temple' A priest. Cf. T. aḍi yēn 'I, your slave.'

(b) Skt. suffixes:

masc. -ara. This is a contraction of aara < -kāra.

kammara < karmakāra. -a blacksmith, T, kam-mārar-sailors.

kammar-ar-a 'of the blacksmiths'. This is a lw-iga, -ka in Skt, used in the sense of 'born of'

Raivatika, the son of Rēvati. This seems to be analogical formation. Gāmiga.

-kāra, Skt, 'maker' mālā kārargge 'to the garland-makers,' cf T, Vēlaikkāran-a worker.

-vanta, Skt. 'the possessor' -Lakṣaṇavantar: those who possessed or had the knowledge of the Symptoms or the Signs

T, pākkiyavantan and pākkiyavān from Skt.

bhāghyavān,

bhāgyavanta,

Fem.

Skt. suffixes:—

-i naygir < nāyaki-y-ar, masc, nāyaka - cf. T. tiruṭi 'a woman thief.'

-itti woman, pkt. itthi < Skt. strī; dēveditti-yar 'priestess'. siṣ-itti-yar 'women disciples,' cf, T, pārpanatti 'a brahmin woman,' and S'akkaḷitti 'a rival wife,'

Composition.

Declinable stems of lws. are compounded with one another. These compounds are treated as simple stems in declension.

Skt. compounds are more numerous in these inscriptions.

Nws. and lws. are compounded often; except in titles, such compounds are forbidden by later grammarians. So called Kan. Compounds are not so long as Skt. ones.

The first member of a compound is either a substantive, an adj, or a numeral. The second is a substantive, or a numeral.

The suffixes and the case-endings of the first member disappear in composition; but these are retained in a few instances.

A compound, like a simple word, becomes a member in another compound. The suffix or case-ending of the compound, as that of the noun, indicates its number and gender.

A compound may be a noun, an adj. or an adv. according to its meaning and the context.

 pattinim.

B. COMPOSITION OF LWS. AND NWS.

These compounds do not differ from those of Skt. lws. except in having Nws. either as the first or the second Member.

Āneseṭi, Ugrasēnaguruvaḍigaḷ, uḍita s' rīkaḷbap-pinuḷḷē, Ṛsabhasēnaguruvaḍigaḷ, Kalāvirgguruvaḍigaḷ, Kilgāndēvake, Kilgānēs' varadā, Kilgabaṭariṅge, gandhebbhamaydān, guruvaḍigaḷ, Dēvereya, Dēva-khantiyar, Dharmma Sēnaguruvaḍigaḷ, Namilūrv-varasaṁghada, Namilūrsaṁghada, Nāgasēnaguruvaḍigaḷ, Nrpamariar, Paṭṭiniguruvaḍigaḷ, perggoravam, Bāladēvaguruvaḍigaḷ, mṛtyuvaravān, Maḷlagavāsa-guruvar, Moniguruvaḍigaḷa, vipulas' rīkaṭavapranaḷ-giriya, Veṭṭēdeguruvaḍigaḷ māṇākkar, Vrata s'īlanōn-piḷḷaḍim, s'ubhānvita S'rīnamilūra, Siṁḷḷanandi-guruvaḍigaḷ.

It is true that, in the list of words given, there are real compound words: Āneseṭi, Dharmasēnaguruvaḍigaḷ and words of this type, nrpamariyar; (even guruvaḍi is not a compound.)

But Kilgānadēvake, Kilgānēs' varadā, Kilgabaṭariṅge, Namilūrvvarasaṁghadā, Namilūr saṁghada, are not compounds at all. As stated under the nom. and the gen. in the section on the use of Cases, the nom. can be used and is used to denote the gen. In the examples cited above, Kilgāna, Kilga, Namilūr are names of places. To place such proper names before another substantive, without treating the two as constituting a compound is quite the normal usage in the ancient kāvya and in N. K. colloquial speech. Of course the meaning, *e.g.*, in Kilgabaṭariṅge is 'to the baṭar of kilga', as Bengalūru huḍuga 'the Bangalore boy' is used in colloquial speech in Kanarese. Here Bengalūru huḍuga is not a compound, but only

a substantive used as an adj. Hence this type of word groups cannot be considered as compounds.

Nor can we treat 'perggoravaṁ' as a compound as later grammarians do. As pointed out under Adjectives, per is an adj. meaning 'big, great' 'The great teacher' in English is not a compound, nor is per-ggoravam. kalmane, 'a stone house' is not a compound. It is only kal (substantive) and mane (a substantive) kalmane—a stone house. cf. kalgāṇa.

The peculiarity of some compounds as the following is that a native Kan. word is incorporated in the compound:—Dev-ereya, guruv-aḍigaḷ. s'rikaṭavapranalgiṛiya, vrata s'īla-nōṇpigunaḍim.

The following word groups are nouns in apposition with nouns or the preceding ones are adjs. It is wrong to call them compounds:—

Adeyarenāḍu 'Adeyare kingdom.'

Āluarasar 'Ālu kings.'

Eḍevolal nāḍu 'Eḍevolal Kingdom'

Polikēsi arasar 'King Polkesi'.

Later grammarians have given the name of compounds to such word groups.

Numerals in Compounds.

Groups with numerals, either as the first or the second member of a word group, are called compounds.

1. *Numeral as first Member*: irppattondu divasam, irelpattu aruḷam, ondutiṁgaḷ, nūreṇṭu saṁvatsaram, pattu pona, mūrutimṁgaḷ.

As already discussed under Numerals, the first member or the numeral is only an adj. which does not change for gender, number or case of the noun it qualifies attributively as in these examples.

2. *Numerals as second Member*: gandhēbhamaydān, aydu may be treated as a Numeral used

predicatively and the acc. ending is suffixed to aydu. This usage is common in N. K. mane mūranna kaṭṭisida, 'he built three houses'. Here mane is the object, but mūru 'three' has the acc. ending, though mane is an inanimate object and as such no case-ending is necessary. As mūru is used predicatively, this -anna is suffixed to the numeral. There is no change in the meaning whether aydu comes before or after gandhēbham. Though later graminiarians call this so, this is not a compound.

3. *Composition of numerals with numerals* :—
To express a Number meaning more than ten, as stated under "Numerals," numbers, one to ten, are added to multiples of ten; to denote multiples of ten, numbers two to nine, are prefixed to ten; the numerals that precede ten in the latter are not the same in form as the ordinary numerals except in 4 and 5 in the following examples.—

	A.	B.	C.	D.
1.	ir pattu	2×10	"20"	two tens
2.	ir pattu ondu	$2 \times 10 + 1$	"21"	two tens one
3.	ir el pattu ...	$2 \times 7 \times 10$	"140"	two seven tens
4.	ēl nūr . . .	7×100	"700"	7 hundreds
5.	nūr entu	$100 + 8$	"108"	One hundred and 8
6.	mūru pattu	3×10	"30"	three tens
7.	mūvetu mūru.	$30 + 3$	"33"	three tens three

Even these are not compounds, in spite of the later graminiarians calling these gamakasamāsas¹ (Impulse compounds according to Kittel). The meanings of these are given in the margin against them. There also, two, three, seven are numerals used as adjectives and in the case of 21, 108 and 33 the

1. S MD. 168, KSS. 294. There is no Gamaka Samasa in KVV and KBB. Compounds in Kannada Grammars increase in number gradually, e.g. SMD 174, 193.

conventional meaning as in 11, 12, 13 are given by usage. These are no compounds.

Nouns 'compounded' with Verbs or Participles.

Examples :—

	sg.	pl.
(a) <i>Verbs</i> :	s.'ivanile paḍedān	kālainkeydar
	nelekondaṇ	prasādainkeydār
	samādhī neredon	odagaunḍar
	samādhikuḍidom	

(b) *Participles* :

Transitive : arcikeyye, as'anādiviṭṭu, ārādhane nōntu, edeviḍiyal, prithivīrājyaṁ keye, pāvu muṭṭidon, puḷedandu, besageyvalli, muninvratagaḷ nōntu, mudimegeye, rājyappravarttanam keye, sanyāsanam geḍu.

Intransitive.—bhadramāgi, mukhamāge, rāja S'rāvitamāge.

*In all these examples, the verb or participle has the substantive, either in the acc. or the nom. before it. If it is in the nom. naturally that is the subject of the verb or the participle following it. If it is in the acc. the substantive is the object of the verb or the participle. As shown under the 'use of cases', the nom. is used as the acc. (without the acc. termination) in a sentence, in O. K. as well as in N. K. (literary and colloquial). To call these kriyāsamasas or verbal compounds is wrong. These are used together so long that they have acquired some fixity in the language. In reply to the objection that k-, c-, t-, p- of the verb is voiced in these word groups and hence these must be compounds, it may be said that, in Kanarese and other Dravidian languages, intervocalic surds become sonants.

In the word groups given above, there is an anu-svāra before the verb or the participle, e.g. in kālain

keydar, prasādam keydar ; this -m is the usual anu-
svāra found in Skt. lws. in the nominative. See "The
Nominative Case" under "Nouns."

In the following examples of Skt. compds. the
terminations of the lw. are retained for the needs of
metre:—

1. suravidya vallabhēndrās suravara munibhi
stutya kalbappināmēl ;

2. sādhuḡaḡ pūjyamānan ;

3. tapam Samyamamān.

But a Skt. compound is split up and the dative
termination is retained for the needs of metre :

aksimaṇakke ramya suralōka sukakke.

Such instances are very rare.

cf. skt. Dhanamjaya, adj. "winning booty." used
as a proper name ;

Vācaspati M. lord of speech ; a proper name.

Yudhiṣṭhira M, firm in battle ; a proper name.

VERBS.

Transitive, intransitive and causative verbs are found. There are three tenses—past, present and future; three persons and two numbers. In the first and the second persons, there is no distinction of gender. In the third person, the three genders are distinguished. There are five moods—the indicative, the imperative, the optative, the infinitive and the negative. There are two voices—active and passive.

Causative Verbs.

There are two types of causative verbs :

I. *Those formed by the addition of the suffix--ppu--to the verbal root:—*

1. muḍi-pp-i-dār—caused to come to an end.
from muḍi—to end, to come to an end
(intransitive). This is the only example.
cf. T. Causative. varu-vi-pp-en—will cause
to come; paḍipp-i-ppēn;
Te. Viḍipiñcu—to cause to be released.

II. *Those formed by suffixing-isu to rts, be they transitive or intransitive :*

This -isu is suffixed to Skt. verbal roots and nouns to convert them into causative verbal roots in Kan.

(a) *-isu added to trans. rts.*

biḍisidar from biḍisu from biḍu 'to release,'
māḍisida 'caused to be made' from māḍisu from māḍu 'to do'.

These roots end in -u and -isu is added to the final consonant of the rt.

(b) *-isu added to intrans. rt.*

nirisidom 'caused to stand' from nirisu from nil 'to stand'.

(c) *-isu* suffixed to *Skt. rts.* :

sādhisidom from sādhisu from sād + isu 'to accomplish'; pālisidom 'be caused to be protected' from pālisu from pāl- 'to protect'.

Later grammarians state that *Skt. rts.* are adopted into *Kan.* by suffixing *-isu* to the *Skt.* verbal *rts.* But these roots with *-isu* were originally causatives and later on acquired the meaning they now have. Otherwise, there was no necessity for the use of *-isu* in these roots, taken from *Skt.*

(d) *-isu* suffixed to *Skt. Noun.*

lekkisu 'to reckon' from lēkhā 'to write'.

Even in this case, *isu* had a causative significance in the beginning¹ and later on became a simple root. If these were not causatives, the reason for forbidding the formation of causatives from these *-isu* roots is inexplicable.

Tenses.

Verbs in these inscriptions, with very few exceptions, can be analysed into three distinct parts :—

1. the verbal root; 2. the tense suffix; and
3. the pronominal termination.

The tense-infix shows the tense of the verb, while the pronominal termination points out whether the verb is in the 1st, 2nd, or 3rd person.

There are three tense-suffixes, *-da-*, for the past, *-utta-* (*-uta-*) for the present. and *-m-*, *-v-*, and *-pp-* for the future. The *rt.* + the tense suffix = the adverbial participle. The pronominal terminations which indicate the number and the gender of the subject of the verb are added to the *rt.* with the tense-suffix or the adv. participle to get a fully conjugated verb.

1. KG. p. 90. Sect. 150.

Participles.

These are formed by the addition of the tense-suffix to the roots. There are two kinds of participles--the adverbial and the declinable. There are past, present and future adv. participles; and declinable participles in the past and the future in these inscriptions.

The past Adverbial Participle.

The past adverbial and declinable participles are formed in the same way, except in the case of rts. ending in -u when the declinable participles of these roots in -u are formed by the addition of -da to the adverbial participle. *e.g.* ērida, eydi-da.

There are two kinds of suffixes added to the roots to convert them into adv. participle: -i and -du (-tu).

I. -i used to form adv. participles.

(a) -i is suffixed to rts. of two syllables ending in -u when the penultimate vowel is long by nature or position:—

āgi, ikki, erti, ēri, eydi, kūḍi, tōri, pōgi, māḍi, meṭṭi.

(b) -i suffixed to causative roots:

muḍippi, salisi, sādhisī.

The origin of -i is at present unknown. But Caldwell's¹ suggestion that -i is derived from ī—to give, (T. ī—to give; Te. iccu, K. īsu from ī+isu), seems to be reasonable in the light of modern colloquial usages in Tel. and Kan. (Te. pōnī—let it go; K. pōgalīsa—he won't let me go). But Kittel's euphonic explanation is not satisfactory.²

1. C.D.G. p. 462.

2. KG. p. 104, Sect. 168.

II. -du (tu) to form adv. participles.

(a) In principle -du is the suffix added to roots ending in -ā, -i and -e and also rts. ending in consonants -n, -y, -l, -ḷ, preceded by a short vowel :

-ā kā-du.

-i ari-du.

-e kore-du, tore-du, naḍe-du, nere-du.

-n en-du.

-y key-du.

-l agal-du,

-ḷ aḍal-du. iḷ-du, poḷ-du.

In these adv. participles, the rts. have not undergone any change.

(b) -du suffixed to roots ending in -l.

Kondu from kol + du. < kol 'to kill'

Sandu from sal + du < sal (to go. to become manifest.)

Later grammarians¹ state that -l of kol and sal > -n in front of a consonantal suffix and the examples given under this sutra are kondam and sandam. If this statement in KBB. were true, salge which appears in these inscriptions should have been san-ge, but it is not san-ge, but sal-ge. But SMD. 237 simply states that kol and sal > kon and san before -da-. KSS. 491 paraphrases SMD. 237. The statement by some scholars that -l of kol and sal were nasalised in O.K. as y, v, ḷ can also be nasals and in front of a consonantal suffix, the nasal of the varga to which the consonantal suffix belongs becomes more audible, i.e. -l- > -n-, does not carry us far. To say that l and n are interchanged in Kan. e.g., linga and ninga, limbe and nimbe, do not help us much.

1. KBB. 232; SMD. 237; KSS. 491; KG. P. 97.

2. KBB. 9.

As we shall see later, $Ko\dot{l} + \dot{d}u > ko\dot{n}du$, $u\dot{l} + \dot{d}u > u\dot{n}tu$; there also the nasal is found:—

The adv. participles in T. may be compared with O.K. adv. participles to see whether the origin of -n- of *kondu* and *sandu* may be discovered.

	Tam.	Kan.
(1)	<i>inri</i>	<i>idu</i>
	<i>enru</i>	<i>endu</i>
	<i>konru</i>	<i>kondu</i>
	<i>koṇḍu</i>	<i>koṇḍu</i>
	<i>canru</i>	<i>sandu</i>
	<i>tirandu</i>	<i>teradu</i>
	<i>pōnru</i>	<i>pōltu</i>
	<i>venru</i>	<i>bendu</i>
	<i>vandu</i>	<i>bandu</i>
(2)	<i>irundu</i>	<i>iddu</i>

From these it is found that

T. -nr K. -nd-

T. -nr- K. -d- (1 and 2).

It is seen that T. -nr and K. -nd are from Pr. Drn. *-nt-. (See the history of *r*. supra).

The Pr. Kan :* -ntu- has become -ntu- in some, -ndu- in some and -du in some adv. participles.

kondu < *kol + ndu* — *kolndu*.

sandu < *sal + ndu* — *salndu*.

-l may have been assimilated to -n and* *kondu*, and **sanndu*, have their long -n- shortened into -n-. But in places where it is found as -du, the preconsonantal nasal -n- has disappeared as is usual in Kanarese. (See "Dative Case" under 'Nouns' and "Consonant groups."). But *nil* has both *nindu* and *nintu*.—

(c) -du suffixed to rt. ending in -l.

$ko\dot{l} + \dot{d}u > ko\dot{l} + \dot{n}du > ko\dot{l}n\dot{d}u > ko\dot{n}n\dot{d}u > ko\dot{n}du$.

-ndu > nḍu before -l, a cerebral in *okḷ*.

The interchange between *l*—and *ṇ* in Kanarese is common :

- (a) *l* > *ṇ* when there is another nasal.

āṇma, āḷma 'a ruler'
gondaḷa, gondana 'a crowd'
maḷal, maṇal 'sand'.

- (b) *l* > *ṇ* in places where there is no other nasal.

aḷil, aṇil 'a squirrel'.
āḷ, āṇ, 'a male'
āḷi, āṇi 'roundness'
iṭṭaḷa, iṭṭaṇa 'a crowd'
kuḷi, kuṇi 'a pit'
keḷadi, geṇati 'a woman friend'
keḷeya, geṇeya 'a man friend'
koḷa, koṇa 'a tank'
koḷagu, koṇagu 'a hoof'
gāḷa, gāṇa 'a hook, a fish hook'
gōḷ, gōṇ 'the nape of the neck'
cātāḷi, cātāṇi 'a sūdra who worships Viṣṇu,
seḷadu, seṇadu 'to envy'.

In N. K. colloquial speech, villagers use koṇṇi, konni for koḷḷi (take. 2nd pl. imperative)

Hence koḷ + ndu > koḷṇdu > koṇḍu.

- (c) -du suffixed to rts. ending in -r.

tar + ndu > tandu
bar + ndu > bandu.

According to Kan. grammarians,¹ the roots are tar and bar. In Kan. as in T. and Te. the rt. remains unchanged in 2nd. sg. imper. But in the case of tar and bar, the 2nd sg. imper. is tā and bā in Kan. and T. and tā and rā in Te. In some Kanarese kāvyas of the 10th century, tārai and bārai are also

1. SMD. 237; KSS. 492.

found. Caldwell and Gundert¹ have concluded that tar and tā, bar and bā are the alternative roots cited in illustration; the principle of alternative roots is not found in the dhātupāṭhas given in any of the Dravidian grammars. tar and bar may have come from tār and bār, (tā and bā) in the 2nd sg. imper Caldwell¹ thinks that vandēn (past I sg.) is from vā and varugiren from var. Even for this there does not seem to be any other satisfactory illustration in Kanarese or Tamil.

In all Kan. grammars, the roots are given as tar and bar.² The adv. pp. is tandu and bandu. They state that -r->-n before -da, the tense suffix.

III. -tu added to rts. ending -l and -n. preceded by a long vowel.

kīl-tu, nōn-tu, (cf. non-du from nō 'to suffer pain')

Here the roots do not undergo any change.

IV. -tu added to roots ending in -ḍu to convert them into adv. p. participles:

koṭṭār and viṭṭār from koḍu 'to give' and viḍu 'to leave', respectively.

koḍu seems to be from kuḍu—to give. In the later inscriptions we get both kuḍuva and koḍuva. viḍu is M.K. biḍu and N.K. biḍu.

Later grammarians³ state that these rts. with the penultimate short vowel change their final soft consonant before -da- and -dapa- into the corresponding hard ones. T. has kuṭuttān in the past. In Tel.

1. CDG. p. 217.

2. KBB. 227. "When personal terminations are added without suffixes (in the negative mood) the rt. vowel is lengthened": SMD. 237 and 238.

3. SMD. p. 311, Nos. 277 and 278; sutra 239. KBB. 228, 237 and 238; KSS. 487 and 489.

this root is not found. The Pr. Kan. rt. may have been* kuṭ; with -u, -ṭ- was voiced. kuṭ or * koṭ + ntu > koṭṇtu > koṭ + ṭu by assimilation. Similarly in viṭtu from viḍu. Cf. SMD 181. *Kaḍidu > Kaṭṭ, Niḍidu > Niṭṭ, Kiru > Kitt, in compounds before vowels.

The penultimate vowels in koḍu and viḍu are short and the syllable is a closed one. All rts. of this type form their past participles similarly. The following examples are taken from Dictionaries and Grammars:—

iḍu + ḍu	iṭṭu (having placed)
uḍu + ḍu	uṭṭu (having put on)
koḍu + ḍu	koṭṭu (having given)
neḍu + ḍu	neṭṭu (having planted)
paḍu + ḍu	paṭṭu (having experienced)
viḍu + ḍu	viṭṭu (having given)
suḍu + ḍu	suṭṭu (having burnt)

The forms in Tamil are exactly the same as those in Kanarese, except in the last where T. has c- in place of K. s-.

But under the same conditions, roots with -ḍu, but with a penultimate *long vowel* form their pps. by suffixing -i :

(Examples from Dictionaries and Grammars)

rt.	K.pp.	T.pp.	Tel.pp.
ōḍu	ōḍi	ōṭi	ōḍi
kūḍu	kūḍi	kuṭi	kūḍi
tīḍu	tīḍi	tīṭi	tīḍu.
nōḍu	nōḍi
māḍu	māḍi

V. -ḍu added to roots ending in -gu with a penultimate short vowel (closed syll.)

Examples: pokku and mikku from pogu and migu, respectively.

Pogu seems to be from the Pr.K.* pugu like kuḍu (for koḍu).

Later grammarians¹ state that, before -da- the rt. changes the last soft consonant into the corresponding hard one and the resulting form is pokka. T. pukundēn (past. I.m. sg; pukkēn). M. Pukku.

The Pr. Kan. rt. *puk- with -ntu- may have become pukku. puk-tu- should become puttu. but if k. is fully exploded and -t- is assimilated to k., we get pukka. The reason or the process of this change is at present unknown.

But if the penultimate vowel is long and open, the adv. pp. is formed by suffixing -i, e.g., āgi, pōgi.

The origin of the past tense suffix -da- was, according to Caldwell² 'probably a neuter singular formative, converting the verbal root into a verbal noun'. Kittel states that -du and -tu are pronominal suffixes added to verbal roots to convert them into verbal participles, which are really verbal nouns.³ He interprets the adv. past participle iḷidu 'a descending-it', from ili 'to descend'. Kittel may be right, but definite evidence from other Dravidian languages has to be collected before accepting this as final, now that Pr. Dr. *-ntu- is most probably the original from which -du- is derived.

The present adv. participle.

The present adv. participle is formed by suffixing -uttu, (-utu) to the rts :

āḷuttu	} from āḷ 'to rule'
āḷutu	...	
ikkuta	from ikku 'to abandon. to kill.'	

1. SMD. 239. 251. S. Nos. 85 and 88; KSS. 485.

2. ODG. p. 512.

3. KG. p. 105. Sect. 169.

In T. this suffix is not found, but Tel. has this in the following present forms :—

avutunnānu, uṇṭunnānu, koṇṭunnānu, cadu-
vutunnānu, taḍustunnānu, paḍutunnānu, pōtunnānu,
paṃputunnānu, viṇṭunnānu. -utu is also found as ṇṭu,
-stu- in these forms.

Kittel¹ considers -uttu- and -utu-, the tense
suffix of the present, comes from -udu-. It is possible
that this -utu- may be from *-untu- as *-ntu- is of
the past tense suffix. as T. has -nra- in the present.

The future adv. participle.

No examples.

The Declinable Participles.

These declinable participles are formed generally
by suffixing to the root -da- to form the past, and
-ppa- and -va- to form the future participles. The
present declinable participle is not found. But in the
case of rts. ending in -u, the declinable past partici-
ple is formed by suffixing -da- to the adv. pp. of the
rt. *e.g.*, ēri-da.

The declinable pps. end in -a while the adv. pps.
end in -i or -du (-tu). The formation of the declin-
able pp. is the same as that of the adv. pp. except in
the case of rts. with -u.

Some European scholars have given the name of
“relative participles” to this class, as, according to
them, these include the relative pronouns within them-
selves, as there are no relative pronouns in Kan.²

Declinable Past Participles.

The following examples are found :—

(1) Roots with -i or -e: ali-da, ida, nere-da,
pēl-da, pode-da.

1. KG. p. 109, Sect. 173.

2. CDG. p. 520.

(2) Roots with -u; ēri-da, eydi-da.

(3) Roots with -l: kon-da < kol-da.

(4) Roots with -n: nōnta.

(5) Roots with -ḍu: koṭṭa.

(6) Roots ī and sā: itta; satta.

Later grammarians¹ explain that ī before -da > i and da > ta. They give no reason for the doubling of -t-.

In T. the past. is indēn (I gave);

fut. is ivēn (I give); K. ivēn

past. s'attēn (I died); s'āvēn (I will die);

In Tel. past. iccināḍu (he gave)

caccināḍu (he died)

Pr. Kan (Dr.) rt. *It. gives itta in Kanarese and iccina in Tel.

(7) Root with -gu: āda.

The past tense of āgu is āydān, found in these inscriptions. This āydān (3rd, m. sg. past.) presupposes āyda, the pp. + ān. But āyda is not found in these or other inscriptions or any of the kāvyas so far published. But Kittel² says that the old rustics use 'aydāne' even now. This is not found in Mysore—rural or urban. It may be a dialectical variation of Mangalore area. But āda is found in later inscriptions, and all the kāvyas, and is very common in N.K. ādaṁ (3. sg. m. past.) is found. In N.K. 3. n. sg. past is āyitu and colloq. āyitu (< āyittu, according to later grammarians. T. āna, K. āda, Tel. ayina, correspond in meaning).

There is another verb pōgu 'to go'. past. pōdam (3rd. sg. m. past.), pp. pōda. T. pōnān (3 sg. m. past) pp. pōna. Te. pōyināḍu (3 sg. m. past.); pp. pōyina.

1. KBB. 236, KSS. 477, KG. p. 97, SMD. 240.

2. KBB. 231, SMD. 242, KSS. 500.

The 2nd sg. imper. of all Kan. (Drn.) rts. is the root itself. K. pō, T. pō, Te. pō. About the 14th cent. we get hōgu (2. imp. 3. sg.) in Kan. In compd. tenses, pōtandam. But in the case of āgu, we have not got any examples of āgu used as 2nd imp. m. sg. Later grammarians¹ of the 11th century state that -da> -ya after ā and pō. In T. ā is used by itself as a verb. Kural 1312. In Nālaḍiyār past tense 3. f. sg. āyināl 376 (she became). āyina (things that became) 23; āyavar (349) are found.

The conditional āyin 'if it be' (115, 229, 357, 362), the negative conditional illāyin (126), yām āyin (for our part) 293, āyinum (5, 38, 98, 115, 139, 147, 176, 186, etc.) are also found.

A Pr. Drn. rt. which can become āy (T) or ay (Te) or ā (Kan) may be assumed to be *āy. The disappearance of -y can be illustrated from rt. kāy—to get heated. kāy+pu=kāypu—heating. N.K. kavu<kāpu. In Tel. also, kāycu>kācu (rt. V.N. kāvu; T. kāy—to be heated, V.N. kāyppu - dislike, displeasure; kāyvu—drying, dryness, heating. T. kāvu—sacrifice, an oblation to the inferior deities; a magic ointment used in making a black spot on the forehead.)

Hence. Pr. Dr. *āy becomes K. āydān, *āyda, and āda. -gu is a suffix added later and the fut. āguvar is later (EC. IV. 41, 1569) than āyppār>āppār>appār>appar; K. akkum<*āy-kkum through *ākkum, where -kkum is the future suffix. Cf. ākkie in these inscriptions. Similarly the root pōgu is more recent and the original Pr. Drn. rt. is *pōy. as we find pōppar for fut. 3. m. pl. in inscriptions.

SMD 232 says that the fut. tense suffix is -pa- before -g and -g must be elided. Examples given are

pōpaṁ from pōgu

tāpaṁ from tāgu

tūpaṁ from tūgu, etc.

This clearly shows that -gu is not a radical part of the root as ā or pō, but only a suffix.

Declinable Participles.

Present: No examples.

Future: The fut. decl. participle is formed by suffixing -ppa- or -v- to the roots.

Roots ending in -i and -u take -va: -va < -pa < -ppa.—

aḷi-va, iru-va, mugi-va. But rts. ending in a consonant take -ppa; appa. from *āy—to become (see āda above).

There is reason to believe that the future tense suffix was -ppa- at first and later it became -pa- and -va-. Later grammarians (SMD. 232, KSS. 503, 504), point out that the future tense suffix -va- becomes -pa- when preceded by -r, -ṛ, -l, -n, -g, -s, and -ō and this -pa- optionally becomes -ppa- under these circumstances, then -g and -s must be elided.

Examples: r: kūrpaṁ, parpaṁ.

ṛ: kīḷpaṁ.

l (ḍ): nōḷpaṁ, bēḷpaṁ.

n: nōmpaṁ.

g: pōpaṁ, tāpaṁ, mirupaṁ.

s: taripaṁ, baripaṁ.

ō: ōpaṁ.

doubling: toḷappaṁ, beḷappaṁ.

cf. T. kāppēn from kā 'to preserve'.

iruppēn from iru 'to be'; kalappēn from kala 'to mingle'; kaḷippēn from kaḷi 'to remove'

See T.H. Articles 64 and 66. But later grammarians¹ state that 'āgu, when followed by an affix beginning with p. *optionally* becomes ap;'' 'āgu when followed by an affix with p-, *optionally* becomes a-;'' 'āgu, when followed by an affix with k-, *optionally* becomes ak-'. These are attempts to explain an existing form without knowing the origin of it.

Caldwell² thinks that -a of the declinable pps. is the original -a, sign of the possessive; Kittel considers the decl. pp. the Gen. Sg. of the adv. pp.³ But the explanations given by these do not seem to be satisfactory. The exact significance of -a is unknown at present.

As stated under adjs., these pps. are always used as adjectives. They do not change for gender or number. The Dpp. is used in the future tense, as past tense form is used in 3-8.

When pronouns of the third person or their contractions-ōn,-ōm (sg.) and-ōr (pl.) are suffixed to these, these become adjl. substantives, and their meaning includes the signification of the relative pronoun (See "Adjectival Substantives" above.)

Examples:

		sg.	pl.
Masc	nom.	aliv-on	alivor.
		keyvon	uṇṇūr
		mutṭidon	uṇvōr
		salvon	kādōr
			palcīdor

1. KSS. 496—499.

2. CDG, p. 523.

3. KG. P. 112 Sect. 178.

<i>Examples :</i>		sg.
Neuter	nom.	ittodu
	acc.	ittudān
		mikkudān
	loc.	vittilalli.

There are three instances where the adv. participle of one rt. and the decl. participle of another rt. are used together to bring out the adjectival meaning. The decl. p. comes second.

1. pūṇi-iruva. Where pūṇi (past. adv. p. of pūṇ -to agree, to undertake).

iruva (fut. decl. p. of iru-to be) -
that have undertaken.

2. bhadramāgida.

āgi (past. adv. p. of āgu -to become)

ida (past decl. pl of iru -to be)

'that had become'

3. neredu+āda

neredu (past. adv. p. of nere -to become full+āda

(decl. pp. of āgu -to become)

'that had been completed.'

The Negative Participle.

The negative advl. and declinable participles are also found. The meaning is negative in such participles.

I. Negative adv. Participles.

The suffix -āde and -ade, are added to roots to convert them into neg. adv. participles.

The form of neg. adv. participle is the same for the past, the present and the future, the tense of the

neg. participle being determined by the tense of the finite verb in the sentence. Like -ān in the gen. the -āde suffix is more ancient than -ade. In O. T. and N. T. -āde forms are in use, but in M. K. and N. K. only -ade forms are found.

The examples are :—

-āde. allāde, tappāde,¹ veļeyāde (cf. N. T., O. T. allāmal, allāde, tappāde, veļeyāde), cf. T. H. illāda, paḷā, art. 112.

-ade. tankade, lekkisad-um.

Kittel's statement that the neg. participle is formed by suffixing -ade to the short form of the infinitive, is wrong. In the formation of adv. participles, there is a principle consistently followed: the tense-suffix and the participial suffix are clearly related and are almost the same.

	tense suffix.	parti. suffix.
past.	-da-	-du-
fut.	-va-	-va-

In the neg. adv. participles also, the same principle is followed: the negative suffix -ā- (later -a-) is added to the root and then -de, the participial suffix is affixed. The result is the same in either case: ira ade. (Kittel) and ir-ā-de.

III. Neg. declinable participle.

The neg. declinable participle is formed by suffixing -a to the negative adv. participle (as in the case of declinable participles generally).

Only example is nillada from nillade (neg. adv. p.) from nil-to stand.

1. Tappadu < Tavu + pa. + āde (SMD 240).

Conjugation.

As already stated, the fully inflected verb = rt. + tense suffix + pronominal termination, *i.e.*, it is a participle + a pronoun.

The tense suffix for the past is -da- and for the future it is -in- and -ppa-.

The personal terminations are :—

		sg.	pl.
I.	person	-en	...
II.	person	1. -oy
		2. rt. itself.	
III.	person	mas. -ān	-ār
		-an	...
		-am	...
	fem.	-āl	-ār
	neuter	-	-avu

These terminations are the same for all the tenses and for all kinds of verbs.

By suffixing these terminations to the participial forms, the conjugated forms of the verb are obtained. Thus it is seen that there is only one conjugation in Kanarese (with very few irregular forms).

As already stated, there are five moods—indicative, imperative, optative, infinitive and negative.

A. The Indicative Mood.

The past tense: The personal terminations are added to the past verbal participle.

There are no examples for the I and II persons. sg. and pl.

III person.	sg.	pl.
masc.	-ān	-ār

(a) <i>Transitive</i>	eydi-d-ān ērid-ān paḍe-d-ān	eydi-d-ār erid-ār paḍe-d-ār key-d-ān kon-d-ār viṭṭ-ār
<i>Intransitive</i>	āydān sandān.
<i>Causatives</i> -an (an)	muḍippidār -ar
(b) <i>Transitive</i>	ari-d-am koṭṭam koṭam
<i>Intransitive</i>	il-d-ar
<i>Causative</i>	muḍippidar biḍisidar
<i>Indicative-past</i>		
III person. fem.	-āl il-d-āl.

As stated before, -ān and -ār are more ancient than -an and -ar. In O. T. and N. T. -ān and -ār are still the suffixes in 3rd sg. and pl. masc. of all tenses. In Tel. in all the three persons, the terminations with the long vowel ā are in use. In N. K. in the present tense, 3rd sg. and pl. masc. and fem. -āne, -āle and -āre are still the only suffixes; -ānu, -ālu and -āru are still the suffixes in the sambhāvanārūpa of the verb where doubt is to be expressed.

All the examples (except āydān) (& ēridān & eydidān) are regularly formed from verbal participles. But in ēridān and eydidān, we have -da-, added to the past verbal participles ēri and eydi before suffixing personal terminations.

But āydān is formed from* āyda (the past decl. participle) + ān. But āyda is not found in these

inscriptions or *kāvya*s. See *āda* under "Declinable pps."

The present tense: No examples.

The future tense:

	person.	sg.	pl.
trans.	I	<i>aḷi-m-en</i>
	II
intrans.	III masc.	- <i>ār</i> - <i>āppār</i> <i>appār</i> - <i>ar</i> <i>appar</i> <i>olar.</i>

fem. no examples.

neuter. no examples.

In *aḷi-m-en*, -*m-* is the future tense suffix. Later grammarians say ¹. that the fut. tense suffix is -*v-*, -*m->-v-*. Probably, here, -*m-* had the phonetic value of -*v-*, and the conservative writing had -*m-* still; *āppār*, *appār*, and *appar* are the fut. 3rd pl masc. forms of *āḡu* (Pr. Kan.* *āy*) This shows that another future tense suffix is -*pp-*. The O. K. *āppār*, *appār*, *appar*, *apar*, M. K. *aharu*, replaced in N. K. by *āḡu -v- aru*.

In *ol-ar*, the 3. m. pl. fut. of *ul* 'to be', the rt. has become *ol-*. There is no tense suffix at all here. T. has *ul* 'to be.' Kural: *uḷḷār* (1127)-3rd m. pl. present and future. *uḷāl* (617)-3rd. f. sg. pr. and fut; *uḷen* (167) 1st s. pres. and fut.; *uḷēm* (1204) 1. pl. pr. and fut; *uṇṭu* (1098, etc.)

Te: *uṇḍu* 'wait, exist' 2. sg. pr.

unnadi 'it is' 3. N. sg. pr. and fut.

unnāru 'they are' 3. m. pl. p. and fut.

1. KBB. 196.

Why in K. $u\dot{1} > o\dot{1}$ is at present unknown (cf. $ku\dot{d}u > ko\dot{d}u$; $pugu\ pu\dot{d}i > po\dot{g}u, po\dot{d}e$, the secondary forms are all found in these inscriptions).

Later grammarians¹ state $ku\dot{d}u, pu\dot{g}u$, etc., when followed by an affix beginning with $-d-$, change their vowel into short o . But $ko\dot{d}u$ is found in the future also where the $-d-$ is not the suffix, but $-v-$. It is not known whether these changes of $-u-$ to $-o-$ are due to the presence of any suffix. It is also possible that originally verbs were formed without any tense suffix and the same form was used for all tenses, the meaning being determined by the context. cf. $akku\dot{m}$ used for all tenses; neg. verbal forms used for all tenses. $un\dot{t}u$ - the 3rd. n. sg. of $u\dot{1}$ is used for all tenses, all genders and all numbers in Kan. and T.; the tense is fixed by the finite verb. Later, the subtle distinctions of tense may have arisen. In some grammars, it is said that there were only two tenses in Kan. - the past and the future. The present tense was a later development. Anyway, $o\dot{1}ar$ is formed without any tense suffix either in T. or Kan.

The following forms are used in the fut. tense :

$akku\dot{m}$ ($aku\dot{m}$), $pirigu\dot{m}$.

1. $idāna\dot{l}idon\ pañcamahāpātakan\ akku\dot{m}$ 'he who destroys this will be guilty of the five heinous crimes.'

2. $S'rīrūpa-līla-dhana-vibhavamahārās'iga\dot{l}\ pirigu\dot{m}\ nillav\ ārgga\dot{m}$ 'the great treasures of beauty, pleasure, wealth and power will separate and not be permanent for anyone.'

$akku\dot{m}$ (3. m. sg. and pl. fut); $pirigu\dot{m}$ (3. pl. n. fut.)

Later grammarians¹ say that -kkuṁ, -kuṁ, -guṁ, -ku and -gu are the 3rd per. suffixes used in all tenses, in all numbers and genders.

This -kkuṁ is found only in two forms—not in these inscriptions, but in N. K. bēku < bēlkuṁ 'is wanted' < bēḷu - to want. sāku < sālkuṁ, 'is sufficient', < sāl - to be sufficient. akkuṁ has been replaced in N. K. by āgu-v-udu.

B. The Imperative Mood.

There are only two examples in II. sg. kēloy < kēḷ - to listen; nōḍu < nōḍu - to see.

The rt. is used as II sg. imp. in nōḍu. But in kēloy, the -oy is added. This -oy has survived in N. K. as -o. i.e. kēlo - people call the attention of a man to themselves by suffixing -ō to the root kēḷ or nōḍu in Colloquial Speech.

Later grammarians² have used the imperative for giving a blessing, advising, inducing respectfully to do, debating how to do, ordering an inferior to do, begging a superior to do, laying down the law, and praying.

C. The Optative.

The desire or a wish is expressed by an optative.

The optative is formed by the addition of -ge (-ke) to roots ending in -i, -u, e. and l, without any tense suffix:

taṇi-ge, keḍu-ge, peḷcu-ge, nene-ge, veḷe-ge, sal-ge.

Those used in the sense of a blessing: taṇi-ge. peḷcu-ge, nene-ge, veḷe-ge:

In the sense of a curse: keḍuge, sal-ge. (narakakke).

1. SMD. 227, KSS. 463, KG. p. 146.

2. KSS. 465, SMD. 229.

D. The Infinitive.

The infinitive is formed here by the addition of -e or -al to the verbal root (whether the root ends in a vowel or a consonant) without any tense-suffix. These remain the same in all the tenses and do not change for gender and number. The time denoted by the infinitive is to be determined by that of the finite verb. The infinitives here have a subject of their own and the finite verb of the sentence has its own subject. This use of the infinitive is a kind of locative absolute,¹ and is intended to denote the minor actions that take place contemporaneously with the principal action of the verb.

This kind of infinitive is not very much in use in N. K.

The forms here are :—appe, alare, āg-e, āl-e, eyd-e, oppe, koḷ-e, yen-e, (aḷkalō, uṇiye).

In aḷkalō, < aḷku, the suffix -alō is used? M.D. 121.

In uṇiye, the rt. is uṇ - to eat. This uṇiye is used in the sense of uṇṇe and uṇṇal - for eating (or for causing to be eaten.?)

The meaning of these infinitives is *e.g.* appe-when it embraced, embraces or will embrace (it embracing.)

E. The Negative Mood.

The Rt. + termination = the negative verb.

There are only two forms.

- I. sg. (1) meccen - I do not agree.
- III. pl. (2) nillavu - They do not remain.
- neuter.

The negative forms are used (1) for the present; and (2) for the future. These negative forms of verbs are rarely used in N. K.

1. SMD. 246. KSS. 587-588, cf. T. H. article 41, No. 8.

Voice.

There are two voices - active and passive. All the examples given under 'Conjugation' above are in the active voice. But there is only one passive form of the future 3rd. pl. masc. *eydappaḍuvār* < *eyd-al-paḍu-v-ār*.

rt. + infinitive suffix + *paḍu* + tense suffix + termination. = the passive (future) form.

There is only one passive participial noun : *eriveppaḍuvōr*. The passive is not common in O. K. and not popular in N. K.

Verbs and Participles in so-called Compounds.

See 'Use of Cases' and 'Composition' *ante*.

A list of verbal roots, used in these inscriptions.

<i>Transitive :</i>	Meaning.	<i>Transitive :</i>	Meaning.
aṭṭu	- to run after	tar	- to bring
aḍaḷ	- to ascend	tore	- to give up
appu	- to embrace	nene	- to remember
ali	- to destroy	nōḍu	- to see
āl	- to rule	nōn	- to vow religious penance
ikku	- to beat, to kill	paḍu	- to experience, to suffer
ī	- to give	paḍe	- to get
uṇ	- to eat	pa/cu	- to whisper
uy	- to carry	piri	- to separate
en	- to say	pūnu	- to promise
ettu	- to lift	pelen	- to increase
ēru	- to ascend	pēl	- to say
ondu	- to unite	pode	- to cover
kāy	- to protect	pōl	- to cleave asunder
kīl	- to uproot	biḍu	- to let go
koḍu	- to give	māḍu	- to do
kūḍu	- to bring together	muṭṭu	- to touch
key	- to do	meccu	- to assent, to agree
kēl	- to hear	meṭṭu	- to place the foot on
kore	- to cut or carve	viḍu	- to let go; cp. biḍu
kol	- to kill		
koḷ	- to take		
taṇku	- to touch		

Intransitive :—

al	- not to be suitable	ir	- to be
alar	- to open	il	- not to be
aḷku	- to be without strength	iḷ	- to abandon, to sacrifice
āgu	- to become	uḷ	- to be
		oppu	- to shine

kiḍu	-	to be ruined	pogu	-	to enter
taṇi	-	to feel satisfied	bāl	-	to live
tavu	-	to decrease	bar	-	to come
tōr	-	to appear	migu	-	to remain
naḍe	-	to walk			over, to ex-
nil	-	to stand			ceed
nere	-	to become full	mugi	-	to contract
		or perfect	sagi	-	?
			sal	-	to go

Causative :—

nirisu	-	to cause to stand	lekkisu	-	to cause to be reckoned with
pālisu	-	to cause to be protected	salisu	-	to cause to be given
biḍisu	-	to cause to be released	sādhisu	-	to cause to be accomplished.
māḍisu	-	to cause to be done			

Substantives derived from Verbal Roots.

The following substantives in these inscriptions are derived from verbal roots by the addition of suffixes :—

Abstract Nouns.

1. -ge. āl-ge (rule, government, from āl 'to rule')
osaḡe 'delight' from ose 'to be delighted'
cf. T. vālkai - living.
2. -te. negarte 'fame' from negaḡ 'to shine' Te.
negaḡta. cp T. naṭa-ttai.
3. -pi. nōmpi 'religious penance' from nōn 'to make
a religious vow.' T. nōmpu. Te.. nōmu.

4. -pu. varppu 'firmness' probably from T. varu 'to dry' T. varppu.
5. -me. mudu-me 'ripening, old age' from mudu 'to ripen, to advance in growth' T. -mai, illāmai 'poverty' and kuṭimai.
6. -vu. vāl-vu 'living, life' from vāl 'to live'
7. -(a) vu. iravu 'existence' from iru 'to be, to exist' T. iravu, iruppu; varavu 'arrival' from var 'to come' T. varavu.

-tana : okkaltana 'farming' from okkal 'thrashing' from 'okku' to tread out corn'. This suffix is said to be of Skt. origin. It is found in all the South Indian languages. T. kuḍittanam 'farming,' ēletanam 'poverty.'

Te. goppatanamu 'nobility'; cinnatanamu 'mean-ness.'

It is possible that it may have come from tan 'one's own self.' But abstract ideas are of later origin and hence the Kan. People may have borrowed this -tana from Skt. But the existence of a large number of suffixes for the formation of abstract nouns shows that the abstract notion was not new or strange to them. I believe that -tan may be Dravidian. There is another word in T. tanmai 'nature, inherent quality'. Here -mai is the abstract noun-forming suffix, corresponding to -me in Kana-rese. If tan-mai is Dravidian, it is certain that -tanam is Drn. also, as -am is the normal neuter formative in T. paḷam 'fruit', iṭam 'place' valam 'right' iṭam 'left' Japam 'repetition of mantras, counting the beads in prayer.'

In the following the Abstract Nouns formed are now used as common nouns :

nile : 'standing' from *nil* 'to stand'

nile is not found in Kittel. T. *Nilai*. K. *nela s. n.* sg. nom. - now used as *nele* 'permanent abode.

pāvu : 'spring' from *pāy* 'to spring'. Now used to denote an object which springs 'a snake' T. *pāmpu*. Te. *pāmu*.

The following two are roots used without change to denote the result of the action denoted by the verb :

pali : 'to slander' here 'slander', (T. *Paḷi*, N. and Vb.)

pulu : 'to rot, to decay', here 'a worm' T. *pulu* (N. and Vb.)

A few of such roots which are used both as rts. and nouns taken from Dictionaries is given under -u in the nom. under "Nouns." (*ante*)

ADVERBS.

There are three kinds of adverbs: 1. Adverbs of time, 2. Adverbs of place, and 3. Adverbs of manner.

1. Adverbs of time.

andu (' then), anduvalikke (thereafter), in (still), indu (now), endu (when), pin (before), begam (lw. soon).

2. Adverbs of place.

illi (here), kelage (down), porage (outside), mēl (above), mēle (above).

3. Adverbs of Manner.

antu (in that manner), ante (like), intu (in this manner), entu (how), dal (certainly), val (certainly), valam (certainly), vol (like), vole (like)
The following adverbs have the first syllable in common :

andu and antu; indu and intu; endu and entu.

Suffix -du makes them adverbs of time and -tu makes them adverbs of manner. These correspond to the pronouns, avan, ivan and ēn. anduvalikke is a compound adverb formed from andu (then) and valikke (afterwards).

Of the other adverbs, ante (probably from an - to say) - apparently; in (< proximate demonstrative base iv) - hence, from this

kelage (<kiḷ - the state of being low) - Under (loc. of keḷa-gu)

pora-ge (<pora - the outside) - loc. of pora-gu - outside.

baḷikke (<baḷi - going, passing on, following - a way, a road) - after-perhaps a dative.

mēl - the top-part, nom.

pōl - from pōl - to resemble and intervocalically vōl.

These are either nouns or verbal derivatives, used adverbially.

Since adverbs qualify verbs, their gender is dependent on that of the verbs they qualify.

Adverbs of place are preceded either

(1) *by an uninflected stem* :

adrimel, ṛṣigiris'ile-mēl, Kaḷvappubeṭṭammēl, tirthagiri-mēl, dhātri-mēl, s'ikhi-mēl ; (See "Use of Cases" *ante*.)

or

(2) *by a Noun in the gen. case.*

Kaṭavapranaligiriya mēl (on the top of the Kaṭavapra mountain), bālāmēl (on the sword), (SMD. 118), vārddhiya mēl (on the sea), tīradāṇadākeḷage - (under the edge of the land near the bank.)

The adverb of manner vōl is similarly preceded by an uninflected stem :

teravōl, mañjuvōl, suracāpambōl
(like the wave), (like the dew), (like the rainbow).

In suracāpambōl, v > b after the nasal.

In salva-vol, vol comes after salva, the future relative participle of sal - to go, and also in biṭṭavol, pōl and intervocalically vōl from pōl - to resemble ; the constant use of pōl as the second member of a compound may have led to the adoption of vōl as an adverb where initial p- becoming intervocalic, > -v-. vol is not used independently.

Adverbial post-positions :

(1) The use of āgi (adv. pp. of āgu - to become - having become) with a preceding noun in the nom. as an adverb is found in bhadram-āgi, ere-y-āgi,

(2) Nouns in the instrumental case are used to express an adverbial meaning (See "Use of Cases" under 'Nouns').

(3) A demonstrative pronoun in the nom. sg. denoting quantity is used in an adverbial sense.

inisu - (a little, this much).

(4) Nouns denoting time and preceded by numerals are used as adverbs:

irppattondu divasaṁ, ondutiṅgaḷ, murutiṅgaḷ
(See "Use of Cases").

avicāraṁ, S'āsvataṁ and Sarvvabādhā parihāraṁ, sarvvaparihāraṁ (lws.) - are used as adverbs.

INTERJECTIONS.

No examples.

CONJUNCTIONS.

The following conjunctions are used in these inscriptions to connect words and sentences, but -um̐ is the only conjunction used to connect sentences : — -um̐, -um̐, -am̐, -ānu, mēn.

These are suffixed to the case-terminations of nouns, pronouns and adjectival substantives except in the acc. where this conjunction comes in between the stem and the termination, and also to infinitives and participles. Each of the words and sentences to be combined has this -um̐, -um̐, -am̐ or -ānu added to it generally. The principle is the same for both numbers and all genders, sometimes this -um̐ is added to single words to mean 'also.'

The -m̐ of -um̐ and -am̐ remain unchanged when preconsonantal, but become -m or -n before a vowel. As the last syllable of a verse, it is found written as -um.

The origin of these is unknown at present.¹

-um̐ and -um̐ are found in N. K. as -ū with the loss of the final nasal. -am̐ is not found at all. But -ānu is replaced by āgali, the imperative form of āgu 'to become' and ādarū.

(A) I. *Substantives with um̐*

I. -um̐ : (also, and)

II. *-um*.

1. Alvarasarum mahādēviyarum Citravāhanarum; 2. bhaṁtamum kaviliya pālum eltuṁ
 3. polipukolliyum aramanetāṇadabhāgamum;
 4. Valliggāmeyara dāsadiyum Amaliyara dēvaḍiyum Alavalliyarā RavicandanumNīrilliyā. Sinderagānigarum;
 5. Sēnavarasarum dharinmagaraṇigarum;
 6. peranōrvvan koḷuvonum koḍuvonum;
 7. sthitadēhākamalōpamāṅga S' ubhamum.
- um connecting single words:*

āṭṭamum Koṇḍarssarum, ākkoreteyum.

-um connecting sentences:

There are two examples:—

1. nelanum veḷege pārvarum prajeyum taṇige,
2. koḍuvōrum pañcamahāpātaka-saiṇyuktar appār dēvaḍaṇḍadinda eriveppaḍuvōrum appār rājadaṇḍamum eydappaḍuvār.

In the following example, *-um* is added only to the last word:

“Banavāsiyanagaramum” and the three previous words which are connected have no *-um* suffixed to them:

Bhāvagāmuṇḍanu (1) Candagāmuṇḍanu (2) Eḍevol-alnāḍu (3) Banavāsiya nagaramum sakṣi (8 - 37 and 38).

I suspect that the final *-m* of 1, 2 and 3 are not clearly seen in the plates as given. The *-m* may be there. The other possibility is that *u* may stand for *ū* which is the N. K. equivalent of *-um*.

II. *Pronouns with -um*

avar-um; ār-um.

III. *Adj. substantives with -um*

1. adān alivorum alival palcidor (um) manade nenvōrum alimenendu upādesam koḍuvōrum;

2. idān koļvōnum koḍuvōnum;
3. int uņvōrum uņiye koḍuvōrum Dēvedittiye-
rindum Sāerindumkoļvōrum.....
ideyum koļvōrum koṇḍu uņvōrum;
4. koļvōrum; 5. torevōrum.....uņvōrum.

In the examples given above, the -um is suffixed to the nominatives mostly. But in the following, -um is suffixed to the acc. in between the stem and the termination, as already stated:—

(1) osageyum alavaṇavum aputrakaporudumān; 2. sāsira kavileyum pārvvarumān. Cp. Part I. A; p. 14, basuvarū haruvanān.

In these examples, the acc. ending is suffixed to the -um of the last word, -porudumān and pārvvarumān and not to (1) osageyum alavaṇavum and (2) kavileyum, though -an is implied in (1) and (2) from the context and -um is suffixed to each. The same usage is very common in N. K. cf. sthalaṅgala āyaṅgalaṇum (34) E. C. III. TN. 101; and kavileyānū brahmaṇaranū E. C. VII. Sh. 78.

But in 'Nāyarkhaṇḍamum Jeḷugūrālgeyān āluttu -um is not placed between ālge and -ān. All these examples are taken from prose inscriptions. There are no examples from verse inscriptions.

-um with the instrumental:

Dēvedittiye-rindum Sāerindum.

-um with the dative:

Only one example: eraḍum nālke 'to both the countries.' But eraḍum is a numeral used here as an adjective. In N. K. the form will be 'eraḍu nāḍigū' or ēraḍu nāḍugaḷigū.

-um with participles and infinitives:

adv. participle: āluttum.

negative infinitive: lekkisaḍum.

G, O, I.

(B) *-am* (also, even)

The examples are :

acc. ell-*am*-*ān*.

dat. *ārgg-am*.

This has not survived in N. K.

(C) *-ānu* :

As already stated *-ānu* is suffixed to each of the words it connects. The meaning is 'either - or.'

The only example is

Māranānu Vōkūliyānu (either *Māra* or *Vōkuli*)

This has not survived in N. K., but is replaced by 'āgali' or 'ādarū.'

The origin of this *-ānu* is not known (*-ān-um?*).

(D) *-mēṇ* - and.

mēṇ Sattar avicāram (61-10).

Word-Order.

The sentences in these inscriptions are generally of the following pattern :—

(1) (adj.) Subject, (adj.) Object, (adv.) verb.
(trans.)

(2) (adj.) Subject, adj. predicatively used, adv.
verb; (intrans.)

The exceptions which are very few, are found in verse more than in prose.

The attributives precede the substantives except in verse. When a proper noun appears with another substantive in apposition, the latter precedes the former in prose, while in verse, this order may differ. In strings of titles, the substantives in apposition follow the proper noun. When an adj. qualifies a substantive, it generally stands before the substantive, but when it is used predicatively, it follows the substantive. An adv. or advl. phrase which modifies an adj. or a participle (used as an adj.), precedes the adj. or the participle.

The subject comes at the beginning of the sentence and before the object if the verb is transitive. But if the vb. is intransitive, the subject comes as near the verb as possible.

An adv. or advl. phrase used as an attributive to the verb or participles, comes as near these as possible. When the adv. is a caseform such as the instrumental or the locative, or the dative, which are really enlargements of the predicate, they stand before the verb or participle, and as near as possible, except in poetry, where it may precede or follow the noun it modifies.

Absolute construction by the use of the infinitives in -e is found and this absolute phrase precedes

the clause with the finite verb. This, being an advl. adjunct, comes in the place where the adv. naturally comes.

The adv. participles are used to express a series of actions succeeding one another without the use of conjunctions; -um, the conjunctive particle is also used to connect words and sentences. In the only interrogative sentence, the interrogative pronoun 'ēn' is suffixed to the the adj. substantives. There are two imperative sentences wherein the second personal pronoun which is the subject is not expressed. These two sentences are in verse.

There are five optative sentences wherein the order is the subject, the enlargement of the verb and the intransitive verb.

There are two negative sentences where negation is expressed by the verb in the negative mood.

There are simple, complex and compound sentences. The word order in complex and compound sentences is not different from that of a simple sentence. But the simple sentence is only one sentence. In the complex sentence, there is a principal clause with one subordinate clause.

In a complex sentence, the internal word-order of different clauses does not differ from that of a simple sentence, except that the different clauses are correlated by means of adverbial participles. Further, the subordinate clauses in a complex sentence come first and the principal clause comes last. The subordinate clauses in the complex sentences in these inscriptions are noun clauses.

The compound sentence is a series of independent simple or complex sentences connected by the conjunctive particle-um.

The Subject:

The subject precedes the verb. But if the verb is transitive, the object comes in between the subject and the verb.

Examples:

(a) *with transitive verbs:*

1. (Kāndarbor) periyā osageyūn aputrakaporu-
dumān viṭṭār ' (Kāndarbor remitted (the fees leviable
at) the festivity of attaining puberty) and the duty
leviable in the case of a man dying without a son'
(5-5).

2. S'āntapana maga Dēvereyage Naṣṭappa
goṇḍu koṭṭan 'Having brought, Naṣṭappa gave to
Dēvereya, son of S'āntapa' (8-29).

3. Avar svarggāgramān ēridār 'He ascended
the high heaven' (25-2).

(b) *with intransitive verbs:*

1. Alivon pañcamahāpātakan akuṁ 'He who
destroys will become guilty of the five great sins.
(1-4).

2. kādu salvōn paramakalyāṇabhāgigaḷ āppōr
'He who protects this shall become the worthy
recipient of excellent good fortune' (6-17).

3. Carita S'rīnāmadhēya prabhu munin vratagaḷ
nōntu saukhyasthan āydān. 'The lord named Carita
S'rī, having observed the vows of a muni, became the
possessor of happiness.' (14-4).

(c) *In the following there is no verb:*

1. Kittereyarā nisidhige 'The tomb
(or epitaph) of Kittere.....ya' 19-2).

2. Devakhantiyarṇnisi (dige) 'The tomb or
epitaph of Dēvakhantiyar' (42-2).

3. Pūṣpasēna cāri.....ya nisidhige 'The tomb or epitaph of Puṣpasēnācāri.... ..' 47-2).

4. Guṇamatiavvegaḷā nisidhige. 'The tomb or epitaph of Guṇamatiavvegaḷ' (55-1).

5. Sṛī Jinamārggan nītisampannan Sarppa cūḷāmaṇi 'Sarppa-cūḷāmaṇi (Crest-jewel among serpents) follower of Jina and of righteous conduct' (61-1 and 2).

The verb is understood—'this is'.

(d) 1. *In the following the subject comes after the verb.*

Verb.

Vb. In prose:

'koṭṭār Sēnavarasaruṇ dharmmagaraṇigaruṇ' Sēnavarasa and the dharmakaraṇika (the palace officer in charge of charities) will (divide and) give' (3-9 and 10).

It is probable that the line is misplaced in the inscription.

Vb. In verse :

meccen ān 'I do not approve' (37-3).

2. *In this verse, a series of advl. trans. past participles is used without the subject coming first.*

In Poetry—participles:

The subject comes near the finite verb in the sentence:—'duritābhūḍ vṛkṣamān kiltu alare poded ajñānas' ailendramān, *poḷḍu*, Uramithyātvapramūḍhasthirataranṛpanān, *meṭṭi* gandhebbamaydān cārīta S'rīnāmadhēyaprabhu Saukhyasthan āyḍān.'

'Having uprooted the tree of sin, having smitten the mountain of ignorance, having cut asunder the silly but firm king of false doctrine, and having trampled on the five rutting elephants (the five

senses), beloved lord of Suravidyā (heavenly learning) named Carita S'rī, [on the hill named Kalbappu, praised by the god and sages,] observed the vows of a muni, became the possessor of happiness." (14-1—4).

The Object:

The object always comes after the subject and precedes the verb or adv. participle *in prose* :—

(1) avar Svarggāgramān ēridār 'He ascended the high heaven.' (25-2).

(2) Pegurama Suralōkavibhūti eydidār 'Pegurama attained the splendour of the world of gods' (24-2).

(3) aputraka porudumān viṭṭār ' (He) remitted the duty leviable in the case of a man dying without a son' (5-5).

But, *in poetry*, the object may come after the verb.

1. Rājñīmatīgantiyār namagind oltidu yendu ēri giriyaṇ 'Rājñīmatīganti, having said "This is good for us now" and having ascended the mountain' (43-3).

2. Mahānantāmatīgantiyār suralōka saukhyadeḍeyān tām eydi ildāl manam 'Mahānantā matīgantiyar, having reached the abode of the happiness of the world of gods, sacrificed (her) mind' (44-4).

3. In (d) 2 above, the participles come after their objects.

4. meccen ān ī dhāraṇiyuḷ iravān 'I do not approve existence on this earth' (37-3).

The verb:

Comes last in the sentence in prose.

1. aḷivon ēlaneya narakadā pulu akum 'He who destroys will become a worm in the (lowest) seventh hell' (1-4).

2. avar svarggāgramān ēridār. 'He ascended the high heaven' (25-4).

3. Kāndarbor aputraka porudumān viṭṭār (6-6).

4. Neḍuboreya Pānapa bhaṭārar nōntu muḍipidār 'Pānapabhaṭāra of Neḍubore, having observed the vows, ended his life' (13-1 & 2).

But in verse also, the verb comes in the end, but there are exceptions:

In verse.

1. perggoravam Samādhi neredon nōnt eydid ōr siddhiyān.

'The great guru accomplished Samādhi, and having observed the vow, attained perfection' (21-4).

2. niravadyann ēri Śvarggam sivanilepaḍedān sādhuḡaḷ pūjyamānan 'The stainless (he) being honoured by the good, attained the happy condition (36-4).

3. meccen ān idharaniyul iravān 'I do not approve existence on this earth' (37-3).

Participles.

Advl. and declinable participles take objects, if they be transitive.—Here the object precedes the participle

I. ADVL. PARTICIPLES.

Trans.—In prose.

1. Sri Pōgilli Sēndraka mahārajar Nāyarkhaṇḍamum Jeḷugūr āḷgeyān āḷuttu (m) "While the illustrious Pōgilli, the Sēndraka mahārāja is administering the Nāyarkhaṇḍa and the government of Jeḷugūr." (5-4).

2. Āḷuarasar Guṇasāgarādvitīyanāmadhēyan Kadambamaṇḍalaman āḷuttum 'When Āḷuayasa, with the second name of Guṇasāgara, was ruling the Kadambamaṇḍala' (62-2 & 3).

3. *tapamān keydu* 'Having practised penance' (44-1).

In poetry also, the object precedes the verb generally :

1. *tan dēham ikki* 'having sacrificed his body'
 2. *ghanammāriṭṭamān viṭṭu* 'Having given up the great misfortunes' (34-1).

3. *idān koḷe* 'If any one takes this' (6-15).

4. *idān kādu salvōn* 'He who preserves this' (6-17).

But, in some verses, probably for adjustment of metrical length, the object comes after the adv. participle :

1. *metṭi gandhēbha maydān* 'Having trampled down the five rutting elephants (the five senses)' (14-2).

2. *niravadyan ēri svarggam* 'The stainless (one) having ascended (to) heaven' (36-2).

3. *ēri giriyaṇ* 'Having ascended the mountain' (43-3).

II. DECLINABLE PARTICIPLES (TRANS) TAKE OBJECTS WHICH PRECEDE THE PARTICIPLES.

The declinable participles with gender suffixes > adj. substantives. These take objects which precede them.

1. *nitta dharmmamān kādōra kulam pelcuḡe* 'May the family of the man who preserves (protects) this permanent work of charity prosper' (3-8).

2. *idān alivon pañcamahāpātakan akum* 'He who destroys this becomes guilty of the five great sins (1-4).

3. *Sāsira kavileyum pārvarumān konda pañcamahāpātaka-saṃyuttan akkum* 'He will be guilty

of the five great sins' of having killed 1,000 brown cows and brahmins, (6-13 & 14).

Substantives in Apposition.

In prose and verse, the substantive in apposition precedes the proper noun:

1. Āneseṭiya *aliya* Basantakumāra, 'Basantakumāra, son-in-law of Aneseṭi,' (8-27).

2. Sāntapana *maga Dēvereyage* 'To Dēvereya, son of Sāntapa' (8-29).

3. Mōniguruvara s'iṣya Koṭṭarada Guṇasēnaguruvar 'Guṇasēnaguruvar of Koṭṭara, the disciple of Mōniguruva' (12-2 & 3).

In verse.

4. Vēgūrā parama prabhāva riṣiyar Sarvvajñabhāṭṭārakar 'Sarvvajñabhāṭṭārakar, a ṛiṣi or sage of supreme glory of Vēgūr' (15-2).

5. guravam nam Mauniyācāriyar 'Mauniyācāriyar, our guru' (50-1).

But in verse, the substantives in apposition follow the proper noun:

1. Māsēnar paramaprabhāvarīṣiyar 'Māsēna, the sage of supreme glory : (25-1).

2. Mahādēvan munipungavan 'Mahādeva, the chief of Sages' (35-1).

Strings of Titles.

1. sri Vinayāditya Rājās 'raya S' rīprthivīvalabha mahārājādhirāja paramēs'vara bhāṭāra (5, 6, & 7-1).

But in

2. S'rīmat prithivīvalabha Maṅgaḷisanā 'of Maṅgaḷisa, the favourite of the world.' (1-1)

Attributives precede the noun they qualify (numerals, cardinal and ordinal, adjectives and nouns are taken as attributives in this connection).

Prose.

1. *periyā osageyum* (5—5 & 6-5).
2. *ēlaneya narakadā puḷu akum* ' (he) will become the worm of the seventh hell ' (1-4).

Verse.

3. *rāga dvēṣatamōmala nyapagatar S'udhātma Saṁyōddhakar Vēgūrā* parama-prabhavarīṣiyar Sarvvajñabhaṭṭārakar ' Sarvvajña bhaṭṭārakar, a rīṣi or sage of supreme glory of Vēgūr, free from the dark stain of desire and hatred, a pure--souled warrior' (15-1 & 2).

4. *kare-il, naltapadharmmadā Sasimati S'rigantiyar* ' Sasimati S'riganti, stainless and of good penance and virtue ' (33-2) Verse. 3. *capal-illā, Navilūru Saṁghada Mahānantāmatīgantiyār* ' Mahānantāmatīgantiyar, firm-minded and of the Navilūr samgha " (44-2).

Declinable participles, functioning as adjs., precede the noun they qualify.

Verse.

1. *bhadramāgida dharmmam*, the (Jaina) faith which had greatly prospered (which was firmly established) (29-2).

Verse.

2. *S'rīsaṁgaṁgaḷa pēḷda Siddha Samayam tappāde nōntu* ' Having observed the vow in consonance with the rules of the siddhas, enunciated by the Saṁghas (25-1).

Verse.

3. *pēḷda vidhānadindu* ' In the prescribed manner (34-2).

Prose.

4. *kondaḥ pañcamahāpātakan* (5-14).

But when these attributives are used predicatively, these *follow* the noun they qualify and precede the verb :

1. ittodān alivon *pancamahāpātakan* akum He who destroys this gift becomes guilty of the five great sins (1-4).

2. alivon ēlaneya narakadā *pulu* akum (1-4).

3. koļvōrum unvōrum *panca mahāpāta saṃyut-tan* āgi. The buyer as well as the enjoyer having become guilty of the five great sins' (3-7).

4. idān kādu salvon *paramakalyānabhāgigaḷ* āppōr. He who protects this (charity) shall become the worthy recipients of the most extreme good fortune. (6-18)

Verse.

5. Carita S'ri nāmadhēyaprabhu muninvarataga, nōntu *Saukhyasthan* āydān (14-4).

Verse.

6. Akṣayakīrtti nontu bhaktiyim akṣimaṇakke ramyasuralōkasukakke *bhāgi ā* (dar) 'Having observed the vow with devotion, Akṣayakīrtti became a participator in the happiness of the gods, delightful to the eye and the mind' (20-4).

Verse.

7. *vinayācāra-prabhāvan tapadim adhikan Candradēvācāryanāman, niravadyam ēri* svarggaṃ (36-2).

Here in 7, two adjs. precede and one adj. follows the noun.

8. Kādarbor *adhikārigaḷ āge* (6-5).

9. gāmigarum *mukhamāge* (6-11).

10. idake kamara Vasanta kumāra sākṣi (8-31).

The gen. case of substantives and pronouns precede the nouns like attributives.

1. *narakadāpulu* (1-4).
2. *Maṁgali sara* kalmanege 'To the stonehouse of Manigalisa (1-1).
3. *Kilgānēsvaradā dēvara parivariya* bhaṁ-tamum (3-3).
4. *Veḍevaḷḷiyarā* dēvaḍiyum (5-8) 'Also the temple priest of Veḍevaḷḷi'
5. *Banavāsiya, Ānesetiya* aḷiya, the son-in-law of Āneseti of Banavāsi (8-27).
6. *Agali ya Mōniguruvara* s'iṣya 'The disciple of Moniguruva of Agali' (12-2).
7. *nammā Kaḷantūranam* 'Our (guru) of Kaḷan-turu (21-3).
8. *Tarekāḍa, perjeḍiya, modeya kalāpakada* guruvaḍigaḷ 'The guruvaḍi of Tarekāḍu, of the matted hair, of the Muñjagrass group.' (31-2 & 3).

Adverbs.

Adverbs or case forms of substantives used as adv. adjuncts precede the verb or the participle and are kept as near these as possible.

1. *Lakṣaṇavantar entu* enalu 'When those who knew the symptoms were in doubt how' (20-2).
2. (*perggoravam*) *sālāmbālatapōgrad intū* naḍa-dōm
3. *int endu* 'having said thus' (33-3).
4. *valav adu* divam pokka 'He entered heaven most certainly.'

Nouns in the nom. used as advs. precede the verbs or participles in the same manner :—

Adv. of time:

1. *ireḷpattarulam okkaltanam keyvon āvittidalli* veḷeyāde keḍuge 'He who practised agriculture for 140 years, let that which he sows rot, without sprouting (6-15).

Adv. of time:

2. *mārutimāgal nōntu muḍippidar.* (19-2)

Adv. of Place:

3. *bālāmel, Ś'ikhimēle sarppadamahādantā-gradul* salvavol *Śālāmbālatapōgrad* intu naḍadoṁ *“nāreṇṭu samvatsaram”* ‘He engaged himself for one hundred and eight years in the practice of severe penance which was like walking on the sharp edge of a sword or on fire, or passing over the great fangs of a cobra’ (21-1 & 3).

The last one marked with an * is an adv. of time coming after the verb-in verse.

The case forms of nouns used in an advl. sense :—

1. *nōntu bhaktiyim* ‘Having observed the vow with devotion’ (20-3).
2. *nontu inbinim* ‘Having observed correctly (or ‘sweetly’)’ (25-1).

In these verses the instr. case form comes after the participle they modify for purposes of metre.

The locative form of substantives, used adverbially, precede the verb or the participle :—
loc.

1. *Vāraṇās’iyaḷuḷ konda* (5-13) ‘of killing in Varāṇāśi’

2. *tīlthadoḷ nontu* ‘Having observed the vow on the holy Kaḷbappu’ (17-1).

3. *Sarppada mahādantāgradul* salvavōl ‘Like passing over the great fangs of a cobra’ (21-1).

4. *S’ailaduḷ* ‘On the mountain’ (34-2).

Dative:

1. *dēvarke pūṇi iruva* ‘Who have promised to work for God’ (1-2).

2. *naragakke salge* ‘May he go into hell’ (3-8).

3. eraḍuṁ nālke rāja S'rāvitamaḡe 'Having proclaimed to both the districts or nāḍs' (6-12).

4. Svarggālayakkēridār. 'He ascended (to) the abode of heaven' (33-4).

But in poetry the dative follows the verb in two cases.

1. S'rīrūpa līlā dhana vibhava mahārās'igal nillav ārggaṁ 'The large treasures of beauty, pleasure, wealth and power are transient and will not be permanent for any' (37-2).

2. āyusyaṁ entu nōḍ enaḡ int endu.

'enage' the dative of 1st person pron. sg. comes after the finite verb nōḍu (33-3).

Skt. lws. used as advs. precede the verb in prose.

1. Sarvvabādhāparihāram biṭṭār 'Gave it free of all taxes and imposts' (7-4).

2. Śasvataṁ eydidān (He obtained permanently) (41-4).

But in verse, it comes after the verb:—

3. mēṇ sattar avicāram 'And they died undoubtedly (for want of foresight)' (61-10).

Adverbial participles are used as adverbs and they precede the verbs:—

1. nōntu muḍippidar (13-2).

2. ēri svarggaṁ S'ivanile paḍedān sādhuḡal pūjyamānan (36-2).

3. tappāḍe nōntu inbinin svarggāgramānēridān. tappāḍe (neg. adv. participle) 'correctly' allāḍe, the neg. participle of al 'to be fit, to be suitable' is used here in the sense of 'excepting' or 'except'. This allāḍe comes after the noun in the nom. with its preceding genitive 'dēvāṁdevana pariḡanam allāḍe' (3-4) 'Except the attendants of the god of gods.'

Adv. past participles not only express the actions or circumstances of the subject, but also connect the action with the action denoted by the finite verb.

1. *guruvaḍiḡaḷ, nōntu muḍippidar* 'Having observed the vow, the Guru, ended his life.'

The observance of the vow is expressed by the adv. pp. *nōntu*, and the same is connected with the action denoted by the finite verb '*muḍippidar*.'

2. *Kaṭavapra S'ailamadālde perḡgoravaṇ samādhi Neredon nontu eydidor siddhiyān* (21-3 & 4). 'Having ascended the Kaṭavapra mountain, having observed the vow, he completed samādhi and attained perfection.'

3. Inscription 14. A series of adv. pps. connect the several actions with the finite verb.

II. The infinitive in an absolute construction, not only expresses a contemporary action, but also connects a series of actions like an adv. pp:—

S'rī Vinayāditya Rājaśraya S'ripṛthivī vallabha mahārājādhirāja paramēś'vara bhaṭāra prṛthivīrājyaṇ *keye*, S'ripōgilli Sēndraka mahārājar Nāyarkhaṇḍamum Jeḷugūr āḷgeyān āluttu Kāndarbor adhikārigaḷ *āge*, periyā osageyūm alavaṇavum aputrakaporudumān viṭṭār (5-1 to 6).

The conjunction Particles.

I. *ūm*, *-um* and *-am* are suffixed to each of the substantives or sentences to be connected:—

A. Substantives:

Prose. 1. *Valliggāmeyara dāsaḍiyūm Alavalli yarā Ravicandanum, Sorkkagāmuṇḍarūm, Edeyagāmuṇḍarūm, Molejaramaṇiya gāmuṇḍarūm Nāvalli-yarum Andugiyā gamigarum, Nīrilliyā Sindera gāmi-garum mukhavāge* (6-7-11 5-7-11).

Prose. 2. Bhāvagāmuṇḍanu Candagāmuṇḍanu, Eḍevolalnāḍu Banavāsiya nagaramum Sakṣi (8-37 & 38).

3. alivorum alival palcidor manade nenevōrum [alival palcidor manade nenevōrum] alimen end upādē s'am koḍuvōrum pañca mahāpātaka samyuktappār [62—(8-11).]

B. Sentences:

nelanum velege, pārvvarum prajeyum taṇige (6-18, 5-18).

II. ānu suffixed to each of the two nouns expresses the idea of 'either-or' Māranānu Vōkuḷiānu (*Either Māra or Vōkuli*).

III. mēṇ. mēṇ Sattar avicāram. Here mēṇ connects the sentences.

The absolute construction.

The infinitive which denotes a contemporary action gives rise to the abs. construction in the following and it is placed in the beginning of the sentence.

1. S'rīvinayāditya Rāja S'raya prthivitrāḷḷam keye S'rīpōgilli Sēndraka mahārājar Nāyarkhaṇḍamum Jelugūr Ālgeyan āluttu Kāndarbor adhikārigal āge, periyā osageyum alavaṇavum aputrakapordumān viṭṭār (5-3 to 6).

2. S'rīmat Citravāhana pinduvvāle Killum Nāgeṇṇan adhikārigal āge (3-1 & 2).

Here the subject of each of the infinitives is different.

The absolute construction comes in the middle of the sentence in verse: Māsēnarparamaprabhāva riṣiyar Kalvappinā veṭṭadul, S'rī Saṁ gaṁgaḷa pēḷḍa siddha Samayan tappāde nont inbinin prāsādāntaramān vicitra kanaka prajvalyadin mikkudān Sasirivar vvara paje daṇḍ uye, avar svarggāgramān ēriḍār.

Since the subject and the finite verb are far apart, the subject is the first and the verb the last, in this verse, the pronoun *avar* is used after the abs. construction.

The Interrogative sentence.

There is only one example and that in verse, as a subordinate noun clause in a complex sentence. *kaṭṭida Siṅghamen 'keṭṭod ēn emage, eṇḍu biṭṭavol* (61-9). 'In the same way as releasing the bound lion, saying 'What' is the harm to us.' The interrogative pronoun, *ēn* 'What' is used to convert the indicative into an interrogative sentence.

Imperative sentence:

There are two examples in verse:—(a) one is the main clause:

kēḷoy pin Kaṭavapra S'aila maḍaldē nammā Kaḷantū-ranaṁ bālē perggoravaṁ Samādhī neredon (21-2 & 3). *bālē kēḷoy* 'Oh girl, listen' is the correct prose order. But in this verse, the imperative second sg. comes first in this line and the vocative comes as the first word in the next line.

(b) The second is an imperative sentence, used as a noun clause and as an object of a participle:

"*āyuṣyaman entu nōḍ enage tān*" int *eṇḍu*. *nōḍu* 'See' is the imper. second sg. masc.

The sentence within quotation marks is used as the object of *eṇḍu*, pp. of *en*—to say.

The optative sentence:

All these sentences maintain the same word-order as an indicative sentence (but the verb takes the suffix-ge). These are used *to curse and to bless*.

Curse.

1. *Koṇḍu unvōrum pañcamahāpātakasamyuktan āgi pūti enva naragakke salge* (3-7 & 8) 'May he

who takes and enjoys (this) become guilty of the five great sins and go to the hell named pūti.'

2. idān koḷe okkaltanaṁ keyvon ā vittidalli veḷeyāde keḍuge (5-16).

Blessing.

1. īnittadharṁmamān kādōrā kulam pelcuḡe (3-8).

2. nelanuṁ veḷeḡe, pārvaruṁ prajeyuṁ taṇiḡe (5-18) May the earth also be fruitful, may both the Brahmins and the people enjoy satisfaction.

Negative sentence:

These two sentences are in verse. The order of words is not the same as that in prose :—

1. piriguṁ S'rīrūpalilā dhanavibhava mahārās' iḡaḷ nillav ārggaṁ endu (37-2).

2. meccen ān īdḡaraṇiyuḷ iravān endu (37-3).

In these the finite verb comes first and the subject comes next, probably for the needs of metre.

In 1. there are two finite verbs of which one comes before, and the other comes after, the subject.

Simple, complex and compound sentences:

The Complex sentence:—As already stated, the word-order in complex and compound sentences does not differ very much in prose. But the complex or compound sentence is only one sentence. In a complex sentence, the different clauses are correlated by means of adverbial participles; the subordinate clauses come first and the principal clause comes last.

The subordinate clauses in these inscriptions are noun clauses :—

1. kēḷoy pin Kaṭavapra S'ailaṁ aḡaldē nammā Kaḷantūranam bālē perḡgoravaṁ samādhī neredon nōntu eydidor siddhiyān (21-3 & 4). 'O girl, hear of him of Kaḷantūr, who having ascended the holy

mountain of Kaṭavapra, the great guru accomplished Samādhi, and having observed the vow, attained perfection'.

2. S'asimati S'rīgantiyar vvandu mēlarid 'āyus-yaman entu nod enage tān int' endu Kalvappinuḷ toraḍ ā rādhane nōntu tīrtthagirimēl svarggālayakk-ēridār (33-3 & 4).

3. 'Suracāpaṁbole vidyullategaḷa teravol mañ-juvol tōribegaṁ piriguṁ S'rīrūpalīla dhana-vibhava mahāsās'igaḷ nillav ārggaṁ, paramārtham meccen āo idharapiyuḷ iravān endu Nandisēna pravara muni-varan dēvalōkakke sandān.'

4. 'vaḷv aḍ arid inn enage' endu Suralōkamahā vibhavasthanan ādam. (40-4).

5. Rājñīmatīgantiyār 'namag ind olt ida nendu ēri giriyaṁ svarggālayam ēridār (43-3 & 4).

6. Kaṭṭidasasiṁghaman 'keṭṭodēn emage' endu biṭṭavōl kalige viparitamgahitarkkaḷ keṭṭar (61-9 & 10).

The compound sentence.

As already stated, the compound sentence is a series of independent simple or complex sentences, often connected by the conjunctive particle-um. The word-order in a compound sentence in prose does not differ from that of the simple sentence.

Two or more simple sentences.

1. koṇḍu uṇvōrum pancamahāpātakasaṁyuktan āgi pūti enva naragakke salge, initta dharimamān kādōrā kulaṁ pelcuge (two sentences) (3-7 & 8).

2. nelanuṁ veḷege pāravaruṁ prajeyuṁ taṇige (5-18).

Simple and complex sentences.

3. aḍān aḷivōrum aḷival pa/cidōr manade nene vōruṁ aḷimen endu upādēs'am koḍuvōruṁ

paucambā-patakasamyuktarappar dēvaḍaṇḍadinde eri-
veppaḍu-vōrum appār rājaḍaṇḍamum eydappaḍuvār
(three sentences) (62-8 to 13).

“Those who ruin that, or whisper its ruin, or think it in the mind, or advise others to ruin it, are guilty of the five great sins, and incur the punishment of the gods and also the punishment of the king.”

- anupamadivya (52-4) - incomparable and divine. slw. °divya-ads. n. sg. nom. B. L. Rice puts in -m- between divya and appa- the next word.
- anēkaṁ (49-1) - slw. probably an adj. qualifying guṇa-?
- anēkaguṇadā (46-1)- of many good qualities-slz. guṇa-s. n. sg. gen.
- anēkaguṇa śiladi (58-1)- by many qualities and virtues. slw. śila-s. n. sg. loc (meaning instr.) cf. anēka Śilaguṇamālegaḡin (56-2).
- anēka s'ilagunamālegaḡin (56-2) - by strings of good qualities and virtues. slw. māle- s. n. sg. instr.
- antu (63-19) - adv. in that manner. cf. andu-then.
- anduvaḡikke (29-2) adv.- afterwards. andu - then; vaḡikka - after. N. K. ābaḡika. T. anru-then.
- appa (52-4) - that will be. ft. p. of intr. āgu - to become. O. K. appa>apa, M. K. >aha, M. K. replaced by N. K. āguva; see akkuṁ.
- apunarbhavakke (29-4) - to the cessation of birth. slw. °bhava-. S. n. sg. dat.
- aputrakaporudumān (5-6) - the property of those dying without heirs. slw. aputraka-. s. n. sg.

- acc. with the conjunctive particle -um before the acc. ending. cf. °poruḷumān (6-6), T. poruḷ-money, wealth; M. Poruḷ- what belongs to one. N. K. poruḷu - essence.
- aputraka poruḷumān (6-6) - same as aputraka-porudumān (5-6)
- appar (4-8) - will become. vb. ft. 3. pl. of āgu - to become, O. K. āppār, appār, apār; >apar M. K. appar, apparu, ahar-u. replaced in N. K. by agu-v-ar-u. (See āgi)
- apār (63-21) - same as appar.
- appār (62-11, 12) - same as appar.
- appe (35-2) - it embracing. inf. of tr. appu - to embrace.
- apōr (63-25) - same as appar.
- abharam (3-6) probably - that weight or the burden. Probably ābharam or ā bhāram slw. ābhara- or bhāra- s. n. sg. acc. in meaning, nom. in form.
- amalaṁ (43-2) - pure. slw. amala-adj. n. sg. inst. in meaning, nom. in form.
- Amaliyara (5-7; 6-7) - of the people of the village, Amali. s. pr. m. pl. gen.
- amirā dol (65-19)? S. (numeral)?
- amōghavicāra (7-6)?
- ayōgy n (52-2)?
- aydu mura ra (63-25; 26)? five three?
- aydān (14-2) - five. (numeral) N. acc. pl. T. eindu, añju, M. añju; Tel. eidu; Tu. eidu.
- ayvan (38-1)?
- ara-maṇṭama (65-16) - an alms-shed. slw. maṇḍapa- T. aram - virtue, charity, dharma; M. ara-dharma. cf. aramane - King's house (r and not r). cf. aravaṇṭige

- aramane-tāṇada (3-9) - of the palace office. slw. tāṇa < sthāna; aramane - king's house; a palace. T. araśan- king; T. araṇmanai - a palace; Te. arasu. M. aracan. Tu. arasu.
- aral (24-3) - 1. a flower. S.N. sg. nom. 2. later inscriptions; alar. T. alar - a blown flower, M. alar - a flower. Tel. alaru - a flower, Tu. aralu - a flower. for 1. See S.M.D.; 28, T. viral; Te. vrēlu; vēlu.
- aridu (40-2) - difficult, impossible. adj. n. sg. probably from ari - to cut off. T. aridu - difficult; rareness. Te. aridi - rare. cf. aridu.
- aripīṭhadi (24-1) - in the seat of honour. slw. ° pīṭha - s. n. sg. loc.
- arcikeyye (24-2) - when he worshipped. slw. arc. - to worship or arcā - worship. inf. of. key - to do, with arcā, -i of arci- probably due to the analogy of arc-isu. T. arcikka; Tel. arcīncu.
- arddhavīśadi (1-3) - at the rate of half a vīśa. slw. vīśa - s. N. sg. loc. vīśa from vimśa - 1/16 of a paṇa) T. vīśam; Te. (pkt.) vīśamu; M. vīś'am; (a rice corn's weight of gold or 1/16 of a paṇa); Tu. vīśa. See vīśa.
- aridaṁ (58-3) - he knew. vb. past. 3. sg. m. of ari - to know. N.K. aridanu. adv. pp. aridu (33-3; 45-1; 53-1) T. arindān - he knew; M. ari - to know; aridu (33-3; 45-1- 53-1) - having known or recognised, adv. pp. of ari- to know. cf. ari-to cut off. T. arindu; Tel. erunḡi. See. aridaṁ.
- aruḷam (5-15; 6-15) - years. slw. for varṣa. s. n. sg. nom. meaning adverbial. varṣa > varuṣa > aruḷa. T. varuṣam - a year.
- alare (14-1) - rejoicing. inf. of alar - to rejoice. to expand. T. alar - to rejoice. Te. alaru.
- Alamvāḷḷiyarā (5-8) - of the people of the village of Alamvāḷḷi, s. pr. m. pl. gen. T. paḷḷi - a settlement,

a village. M. palli; Te. palli, palle; Tu. haḷḷi. N. K. haḷḷi; Skt. pallī (fem.) - a small village, a settlement of wild tribes. lw. in skt.? see Alavaḷḷiyarā

alavaṇavum (5-6, 6-5) - a tax (Rice). Fleet thinks it to be arupaṇam- six paṇam. Probably it means 'ālavaṇam' or 'ālaṁvaṇam'. - the tax on the āla or banyan tree. or ālavaṇam - the tax on sugarcane mill. Also called gāṇadere and āledere- in some inscriptions. āle- is also written as -ārre cf. toradu (33-4) and naḍadu (50-3), the roots also tore and naḍe respectively. Dr. Buhler suggests that ālavaṇa may stand for ālapana, Marāṭhi ālāp- a funeral lament, singing the praises of the dead, denoting some domestic ceremony. But ālevaṇa or ālavaṇa seems to be more satisfactory. cf. 1 āledere. Ec. III. Sr. 105; 2 page 41 part I A. See Hindu Adm. Institutions. P. 340. Tax on Sugarcane mill = 60 paṇamum. s. n. sg. nom. + um (conjunctive particle)

Alavaḷḷiyarā (6-8) - of the people of the village of Alavaḷḷi. s. n. pl. gen. see Alamaḷḷiyarā (5-8).

besageyvalli (63-3; 64-3)—while worshipping. Slw. besa from vidhā—to honour. To worship (?) according to Kittel. vaṣa, besa and basa seem to be more apt.

bēgam (35-1)—quickly. Slw. s. n. sg. nom. Used as an adv. N.K. bēga. T. vēgam—swiftness. Te. vēga, vēgamu—quickness; M. vēgam—haste; Tu. bēga—speedily.

BHA.

bhaktiyim (20-3)—with devotion. Slw. bhakti- s. n. sg. instr.

Bhaṭṭārakar, bhaṭṭarar, bhaṭṭaraka (18-1)—Pkt. for bhartā—venerable or worshipful person, used of gods, scholars and men of rank; a kind of śaiva monk. bhaṭṭa < bharta—doctor. a designation of great scholars. baṭara is the Tdb. of bhaṭṭāraka (See E. C. II. 19. Dēvaṇandibaṭara.)

bhaṭṭāraka is from bhaṭṭāraka. There are two reasons for this nasal.

I. -ṭṭ- is written in early inscriptions as °ṭ, like all long consts. The° is like an anusvāra and hence bhaṁṭāraka and later bhaṭṭāraka.

cf. (1) hesarani °ṭu for hesaraniṭṭu E.C. IV. Hg. 112 (1342).

(2) ta° pidavanu for tappidavanu E.C. IV. Hg. 112 (1342).

(3) ca° kravarttige for cakkravarttige E.C. IV. Hg. 112 (1342).

Why not for -ṭṭ- is not known.

(4) ta° naguru (2) do

(4) a° nadāni (8) E.C. IV. HS. 94, 1262.

(6) vu° nata (15) E.C. VII. Sk. 3131. 1390.

(7) ga° de (15) for gadde } E.C. IV. Hg. 112.

(8) si° dāya (16) for siddāya }

(9) Gopa° ṇa for Gopaṇṇa E.C. VII. Sk. 282.

(10) Gu° maṭanāthana (4) } E.C. II. 342, (1412).

sa° nidhiyalli (4)

(11) .sampa° narum E.C. IV. Hs. 101. (1450.)

This explains some of the nasals in the Pkt. loan words like Chaṁtamuni.

- II. There is *penḍāra gopāladēvaru* (E.C. III: TN. 97, 1276) 29.

penḍāra—not in Kittel.

T. *paṇṭāram*—a religious mendicant wearing beads and yellow garments; a monk; Skt. *piṇḍāra*—a religious mendicant or beggar; a cowherd; a term of censure. *bhaṇṭāraka* may probably be a contamination between *paṇḍāram* and *bhaṇṭāraka*.

bhadram (āgi) (29-2)—firm, happy, auspicious, prosperous. Slw. *bhadram*. s. n. sg. nom. subject of *āgi*.

Bhadravāhusacandrāguptamunīndrayugmadin (29-1)—with the pair of the great sages, *Bhadravāhu* and *Candrāgupta*. s. m. sg. instr. Slw. *yugma*—See I. Ant. XXI. p. 156; E.C. II. Introd. pp. 36-42; E. I. IV. p. 22; DKD. p. 284. JRAS. 1909-23; JRAS. 1911-18: 16; E.I. IV. 339; Vienna Oriental Journal: VII. 352. Thomas: *Jainism or the Early Faith of Aśoka*. p. 23.

I. Tradition *re* *Bhadrabāhu* and *Candrāgupta*.

II. Inscriptions: Ec II—67 of 1129; 64 of 1163; 258 of 1432.

III. *Bṛhatkathākōśa* by *Harīṣeṇa* 931 AD—B. son of *Somaśarma* and *Somaśrī*, taken by *Govardhana*. *Candrāgupta* of *Ujjain*. *Bhadrabāhu* died at *Bhadrāpāda-Ujjain*.

IV. *Bhadrabāhu Carita* by *Ratnanandi*. *Candrāgupti*, King of *Ujjain*.

V. *Muniśamsābhyaudaya* of *Cidānanda* (680) B Killed by a tiger, C came on a pilgrimage stayed and died at *Belgola* 9.

VI. *Rājavalīkathe* (1838) by *Devacandra*, C, King of *Pāṭaliputra*. became B's disciple.

Edeyagāmundaḡ (5 and 6), Candagamundaḡ (8), Bhāvagāmundaḡ (8), Māra (8), Moḡeyūramaniyagāmundaḡ (5 and 6), Vīrasēnagāmundaḡ (66), Vōkuḡi (8), Sorkkagāmundaḡ (5 and 6.)

9. *Names of writers of inscriptions* :—

Pallavācāri, S'ri Rāmapuṇaya vallabha (8), (20).

About the names 'Dallaga (38)' and 'Nārāyaṇayyaṇḡaḡ' (66) the details are not known, as the inscriptions are incomplete.

10. *Names of Places* :—

Agāḡi (12), Aṇḡugi (5 and 6), Amali (5 and 6)) Alamvaḡḡi (5 and 6), Uḡḡikkal (10), Kaḡbappu (kaḡvappu), (33, 34), Kittūr (22), Kiḡḡa (64), Kiḡḡu (3), Kiḡḡāna (62), Koṭṭara (12), Koḡakaṇi (7), Koḡattur (32, 49), Cittūr (19), Cendugoli (4), Jeḡugūr (5 and 6), Tarekāḡu (31), Thiṭṭagaḡpāna (18), Navilur (43, 44, 48, 46), Nāvalli

(5 and 6), Nīrilli (5 and 6), Neḍubore (13) Banavāse (8) Madure (21), Malanūr (23), (66), Moleūr (5 and 6), Vāraṇāsi (5 and 6), Valliggāma (5 and 6), Veḍevalli (5 and 6), Vēgūr (15), Sinderā (5 and 6), and Saluvuge (8).

11. *Names of Countries* :—

Adeyere-nāḍu (19), Eḍevolal-nāḍu (8), Nadirāṣṭra (36), Nāyarkhaṇḍa (5 and 6).

The name of Namil-ur (the peacock village) is translated into Skt. as Mayūra-grāma (52, 57.)

APPENDIX III.

VERSE INSCRIPTIONS.

Of the 66 inscriptions, 22 are in verse.

Inscriptions 35, 41, 46, 51, 54 seem to be in verse, but the exact nature of the metre cannot be ascertained on account of the missing words. 46 seems to be in Śārdūla or Mattēbha vikrīḍitavṛtta- a samapāda metre in Skt.

Of the 22 verse inscriptions, 61 is in Kanarese metre tripadi¹, excepting the first stanza. It is a metre of three lines; each line differs from the other in length and in the number of moras (or mātrās); there is alliteration of the second letter of each line.

The distribution of moras in each of these three lines is:—

1. 20 moras in 4 feet.
2. 17 moras in 4 feet.
3. 13 moras in 3 feet according to Nāgavarmma.

But the 2nd foot has more than 18 moras here in the third and fourth stanzas.

This is a viṣamapāḍavṛtta in Kanarese.

The other stanzas are all in Skt. metres. They are.—

<i>Name of vṛtta.</i>	<i>No. of the inscription where it is found.</i>
1. utpalamāle (203) ² 20, 52.
2. carṇpakamāle (206) 40, 53.

1. Chandombudhi, 299 p. 98.

2. A descriptive account of these vṛttas is given in Nāgavarma's Karṇāṭaka Chandombudhi. The number in brackets against the names of the vṛttas refers to the verse wherein its lakṣanas or characteristics are given in the book referred to above.

<i>Name of vṛtta.</i>	<i>No. of the inscription where it is found.</i>
3. maṅgaḷam (185) 57.
4. mattēbhavikrīḍita (202) 33, 34, 44, 45, 50.
5. mallikānāle (194) 29.
6. mahāśragdharā (210) 14, 36, 37.
7. vamaśastha (150) 57.
8. vasantatilaka (171) 49.
9. śārdūlavikrīḍita (200) 15, 21, 25, 60.

The characteristics of each of these metres are the same as those in Skt. except the alliteration (prāsa) of the second letter in each line in Kanarese. These are all samapāda vṛttas or stanzas having four lines of equal length.

The following verses do not conform to the description given above:—

Inscription 36—1st line—words missing.

36.—ll. 1, 3 and 4 defective—words missing in 1 and 4, and more words in l. 3.

59.—1st line defective because of long ē. There are only three lines.

63.—ll. 2 and 3 are defective—words missing in 1 and 4; two mātras are in excess.

In alliteration, there are short and long letters, bindu and double consonants. When analysed, the following types of alliteration are found:—¹

1. Short letters (laghu): 14, 33, 34, 37, 44, 45, 51, 53, 57.

1. Chandombudhi 43 to 50.

2. Long letters (guru) : (by nature or position.),
15, 20, 21, 25, 29, and Badāmi (1), 56, 60)
1 (2 and 3).
3. Bindu with a consonant : 50, 52.
4. Double consonants : 29.

Later writers on prosody call 1, 2, 3 and 4 simhaprāsa, gajaprāsa, vṛṣabhaprāsa and hayaprāsa respectively.

In 34 the consonants of a varga are treated as prāsa letters.

The later writers call this 'vargōdita' prāsa.¹

In 25 there is the alliteration of the first two letters of each line, which is called by later writers 'dviprāsa.'²

The prāsa in 36: the last two lines have -di- and -ra-instead of -na of the first two lines. This is defective, according to later Kanarese writers.

1. Chandombudhi 56.

2. Do 65.

APPENDIX III.

FIGURES OF SPEECH IN THE INSCRIPTIONS.

The following alaṅkāras are found :—

- A. upamālaṅkāra (simile)¹ 21, 34, 37.
- B. Rūpakālaṅkāra (metaphor)² 14, 15, 20, 29, 33,
35, 44.

1. KVV. 159; KRM. III 59, et seq.

2. KVV. 161; KRM. III 12, et seq.

APPENDIX IV.

SKT. VERSES IN KANARESE INSCRIPTIONS.

In the following inscriptions, Skt. ślōkas are found:—

8, 32, 58, and 62.

1. In 8. The first 26 lines; lines 31-36.

Nāgasēna managham guṇādhikam

In 32, Nāganāyaka-jitāri maṇḍalam

raja-pūjyanamalam śriyāmpadam.

kāmadam hatamadam namāmyaham.

This is in praise of Nāgasēnaguruvaḍigaḷ who ended his life by Sanyāsanavidhi.

2. In 53. Mayūraggrāmasaṅghēśya,

saundaryyā Āryyanāmikā

Kaṭapragiri śailēca

sādhitasya samādhitaḥ.

There are a few words missing in this inscription. The name of the person who ended his life is not found.

3. In 58 grāme Mayūrasaṅghēśya,

Āryyikā Damitāmatī

Kaṭvapragirimadhyasthā

sādhitā ca samādhitā

The death by sanyāśana of a lady is referred to here. The name cannot be made out as the word is only 'Damtāmatī

In 8, the history of the grantor is narrated in Skt. in the first 26 lines. In ll. 35 and 36

"Mahāsāndhi-vigrahika śrī Rāmapuṇyavallabhēna likhitamidam ś'asanam."

In the Taṭṭukōṭi inscription of about 700 A.D. (62) the following Skt. ślōka appears after the first Kan. stanza :

varan tējasvinō mṛtṭyur
na tu māmāvakhaṇḍanān
mṛtṭyus tatksaṇikō duhkham,
mūnabhaṅgam dinē-dinē.

APPENDIX V.

INDO-ARYAN LOANWORDS.

The following Indo-Aryan loanwords are found in these inscriptions.

- A. 1. ayya < ārya (SMD. 270, 232)¹; 2. avve, abbe < ambā 3. appa < ātmā 4. ācāri < ācārya (SMD. 254); 5. īsara < īśvara (SMD. 253, 251); 6. kavilo < kapilo (SMD. 258); 7. khanti, ganti < gantrī (SMD. 261); 8. gōsiga < ghōṣika; 9. canda < chanda (SMD. 255); 10. canda < candra (SMD. 261); 11. Janna < yajña (SMD. 269); 12. Jeḍe < Jāṭe (SMD. 255, 271); 13. tapaccalle < tapacchalā? (SMD. 255); 14. tāṇa < sthāna (SMD. 257, 278, KSS. 149); 15. dēgula < dēvakula (SMD. 295); 16. dhōṇe < drōṇi (SMD. 261, KSS. 154); 17. nisidige < niśēdhikā (SMD. 254); 18. paḍi < prati (SMD. 261); 19. baṭa < bhaṭṭāraka, bhaṭāra < bhartā, bhartāra; 20. bhanta < bhakta (SMD. 295); 21. māṇākka < māṇavaka; 22. meṇasu < marica (SMD. 282); 23. mode < munja (SMD. 282, 285?); 24. riṣi < ṛṣi (SMD. 268, KSS. 159); 25. vīsa < vimśa; 26. sakki < sāksi (SMD. 254, 262, 270); 27. sasimati < śāśimati (SMD. 254); 28. sāsira < sahasra (SMD. 254); 29. singa, simgha < simha (SMD. 263); 30. siri < śrī (SMD. 254, KSS. 147); 31. seṭṭi < śrēṣṭhin (SMD. 254, KSS. 138).

These are treated as tadbhavas⁴ or words corrupted from Skt. by later grammarians. But such a modification of Skt. words in Kanarese is not

1. The number within brackets gives the sutra which explains the formation of the form.

2. K.R.M. uses this word in II 53 (K.B. Pathak's Edition) and II 55 in the Madras University Edition), but K.R.M. is a translation of Dandin's Kavyadarsa and this verse corresponds to tadbhava used in that Book I 32-37, in a different sense. See SMD. 235, KSS. 138-160.

possible as can be seen from B. *infra*. Further, these words are found in Pkt. in almost the same form. Hence the loans are from Pkt. and not from Skt. though no Kan. grammarian has stated that these are Pkt. loans. The rules framed by Kan. grammarians are practically translations of the sūtras of Prakṛtaprakāś'a with slight modifications to suit the genius of the Kan. language.

These Pkt. lws. came into Kan. when Pkt. was a spoken language in the Kanarese country¹: (a) The existence of Aśoka's inscriptions (1) at Brahmagiri, Śiddāpura and Jaṅga Rāmes'vara Hill in what is now the Mysore State; (2) at Palkigundu and Gavimaṭha² in what is now the Hyderabad State (Deccan) with later Kan. inscriptions on the other side of the same rocks; (b) the existence of Pkt. inscriptions at Malavalli (E. C. VII. Sk. 263) and (c) the prevalence of Jainism in South India before the spread of Buddhism, show that Pkt. was used as a spoken language in South India about the third century B. C.

Gōsiga, dēgula and nisidige represent the loans from an earlier stage of Pkt; baṭa shows the characteristic tendency of the Kan. language to shorten long consonants; in bhaṁta and siṁgha, aspirates are retained; the nasal of bhaṁta is noticed by later grammarians, but is left unexplained (N. K. bhatta and batta.)

B. 1. nāgir < nāyakiyar; 2. nitta < nitya; 3. parūta < parvata; 4. Banavāsi < Vanavāsi; bēgaṁ < vēgaṁ; 5. mattaru < mātrā; 6. mariyāde < mariyādā; 7. māsēna < mahāsēna (SMD. 291); 8. mōni < mauni (SMD. 292); 9. riṣi < ṛṣi, probably contamination between Skt. ṛṣi and Pkt. risi; 10. ś'iṣittiyar < ś'iṣya + ittiyar; 11. saṁgha.

1. MAR. 1928 pp. 10-14, and I Ant. 1912, p. 230.

2. Professor R. L. Turner. The Gavimaṭh and Palkigundu scriptures of Asoka (1932)
